

**State Term Contract  
No. 80101507-23-STC-ITSA  
for  
Information Technology Staff Augmentation Services**

This Contract is between the State of Florida, Department of Management Services (Department), an agency of the State of Florida, and **HLP Integration LLC** (Contractor), collectively referred to herein as the “Parties.”

Accordingly, the Parties agree as follows:

**I. Initial Contract Term.**

The Initial Contract Term shall be for three years, with no renewals. The Initial Contract Term shall begin on October 31, 2024, or on the last date signed by all parties, whichever is later. The Contract shall expire on September 30, 2027, unless terminated earlier in accordance with the Special Contract Conditions or Additional Special Contract Conditions.

**II. Contract.**

As used in this document, “Contract” (whether or not capitalized) shall, unless the context requires otherwise, include this document and all incorporated Exhibits, which set forth the entire understanding of the Parties and supersedes all prior agreements. All modifications to this Contract must be in writing and signed by all Parties.

All Contract Exhibits listed below are incorporated in their entirety into, and form part of, this Contract. The Contract document and Exhibits shall have priority in the following order:

- a) This Contract document
- b) Contract Exhibit A, Scope of Work
- c) Contract Exhibit B, Enterprise Standard Terms and Conditions
- d) Contract Exhibit E, Contractor’s submitted Price Sheet
- e) Contract Exhibit F, Resume Self-Certification Form
- f) Contract Exhibit G, Contractor Selection Justification Form
- g) Contract Exhibit H, Contractor Performance Survey
- h) Contract Exhibit J, Job Family Descriptions
- i) Contract Exhibit K, Foreign Country of Concern Attestation

State Term Contract No. 80101507-23-STC-ITSA-Supplemental24  
for  
Information Technology Staff Augmentation Services

III. Contract Management.

Department’s Contract Manager:

Frank Miller  
Division of State Purchasing  
Florida Department of Management Services  
4050 Esplanade Way, Suite 360  
Tallahassee, Florida 32399-0950  
Telephone: (850) 488-8855  
Email: [frank.miller@dms.fl.gov](mailto:frank.miller@dms.fl.gov)

Contractor’s Contract Manager:

Name: Josh Hewitt  
HLP Integration LLC  
Address: 8331 SR 33 N  
City, State, Zip: Lakeland, FL 33809  
Telephone: 202-393-0399  
Email: [josh.hewitt@hlpintegration.com](mailto:josh.hewitt@hlpintegration.com)

This Contract is executed by the undersigned officials as duly authorized. This Contract is not valid and binding on all Parties until signed and dated by both Parties.

## **Exhibit A Scope of Work**

### **1. Purpose**

To provide Customers with a State Term Contract (STC) for Information Technology Staff Augmentation Services, pursuant to the terms set forth in this Scope of Work. The Department intends to issue a supplemental Invitation to Bid on an annual basis for the remaining term of the State Term Contract beginning in 2024. New Vendors may submit a bid for Prequalification annually. Additionally, current Vendors on the State Term Contract may submit supplemental bids annually beginning in 2024 to prequalify for additional Job Titles.

### **2. Definitions**

**Business Day** – Monday through Friday, inclusive, except for those holidays specified in section 110.117, F.S., from 8:00 a.m. to 5:00 p.m., in the time zone the Customer is located.

**Ceiling Rate** – The maximum price a Contractor may charge for an associated Job Title or Scope Variant.

**Confidential Information** – Information that is trade secret or otherwise confidential or exempt from disclosure under Florida or federal law.

**Contract** – The written agreement between the Department and the Contractor resulting from 23-80101507-ITB.

**Contractor** – A Vendor that enters into a Contract with the Department as a result of 23-80101507-ITB.

**Customer** – A State Agency or Eligible User, as defined in Rule 60A-1.001, Florida Administrative Code (F.A.C.).

**Department** – The Department of Management Services, a State Agency.

**Information Technology (IT)** – as defined in 287.012(15), Florida Statutes (F.S.).

**Information Technology (IT) Experience** – Experience working in the computer science industry that involves performing IT services and utilizing equipment, hardware, software, firmware, programs, systems, networks, infrastructure, media, and related material.

**Information Technology (IT) Staff Augmentation Contract Experience** – Demonstrated prior work experience in the allocation and outsourcing of qualified IT Staff to augment a workforce on a temporary basis.

**Job Family** – A group of related Job Titles within Exhibit H, Job Family Descriptions.

**Job Title** – The position described within Exhibit H, Job Family Descriptions. The Job Family Descriptions document includes each Job Title's general characteristics and dimensions.

**MyFloridaMarkerPlace (MFMP)** – the State of Florida's eProcurement system and connects vendors with state government organizations that purchase goods and services.

**Operational Formula** – The day-to-day actions of a company that are guided by a policy or procedure that is prescribed for repetitive use as a practice, in accordance with agreed upon operations that are aimed at obtaining a desired outcome.

**Principal Personnel** – The management of the Contractor's company who makes operational decisions.

**Proposed Price** – The Vendor's maximum hourly rate for an associated Job Title or Scope Variant for the initial and renewal term. A "not to exceed" price.

**Scope Variant** – A gradation of experience within a Job Title.

**Staff** – The temporary staff provided by the Contractor or Contractor's subcontractor(s) to render information technology services identified by Customers.

**State** – The State of Florida.

### **3. Contractor's General Responsibilities**

The Contractor, regardless of any delegation or subcontract entered by the Contractor, shall be responsible for the following when providing Information Technology Staff Augmentation Services:

- 3.1 The Contractor is responsible for the comprehensive management of Staff. Staff shall not be deemed an employee of the State or deemed to be entitled to any benefits associated with such employment and the Contractor shall be responsible for the administration and maintenance of all employment and payroll records, payroll processing, remittance of payroll and taxes, and all administrative tasks required by State and federal law associated with payment of Staff.
- 3.2 The Contractor shall provide Staff in accordance with Customer Request for Quotes (RFQ), and as described in Exhibit H, Job Family Descriptions document. Customers may include a detailed scope of work, specific requirements of the work to be performed, and any requirements of Staff within the Request for Quotes.
- 3.3 The Contractor shall possess the professional and technical Staff necessary to allocate, outsource, and manage qualified Staff to perform the services requested by the Customer.
- 3.4 The Contractor shall provide Customers with Staff who have sufficient skill and experience to perform the services assigned to them.
- 3.5 The Contractor is responsible for ensuring that all Information Technology Staff Augmentation Services furnished under the Contract meet the professional standards and quality that prevails among information technology professionals in the same discipline and of similar knowledge and skill engaged in related work throughout Florida under the same or similar circumstances.
- 3.6 The Contractor shall provide, at its own expense, any training necessary for keeping Contractor's Staff abreast of industry advances and for maintaining proficiency in equipment and systems that are available on the commercial market.

- 3.7 The Contractor shall, at its own expense, be responsible for adhering to the Contract background screening requirements, testing, evaluations, advertising, recruitment, and disciplinary actions of Contractor's Staff.
- 3.8 The Contractor, throughout the term of the Contract, shall maintain all licenses, permits, qualifications, insurance, and approvals of whatever nature that are legally required for Contractor and Staff to perform the Information Technology Staff Augmentation Services.
- 3.9 Contractor shall be responsible for all costs associated with the administration of this Contract.
- 3.10 The Contractor shall adhere to all work policies, procedures, and standards established by the Department and Customer.
- 3.11 The Contractor shall ensure that Staff conform with the Customer's policies in all respects while on the Customer's premises, and is responsible for obtaining all rules, regulations, policies, etc.
- 3.12 The Contractor shall only provide Information Technology Staff Augmentation services for those Job Titles awarded to the Contractor. Contractor shall be paid on an hourly basis unless Customer requests in their RFQ a project-based pricing structure in accordance with Section 9.5, below.

#### **4. Subcontracts and Staff**

- 4.1 The Contractor is fully responsible for satisfactory completion of all work on this Contract. The Contractor shall ensure and provide assurances to the Department or Customer upon request, that any subcontractor(s) or Staff provided under this Contract has the necessary qualifications and abilities to perform in accordance with the terms and conditions of this Contract.

The Contractor must provide the Customer with the names of Staff considered for work on a purchase order issued under this Contract. The Customer shall retain the right to reject any Staff whose qualifications or performance, in the Customer's exclusive judgment, is insufficient.

- 4.2 The Contractor agrees to be responsible for all work performed and all expenses incurred by subcontractors and Staff while performing work under this Contract.
- 4.3 Any subcontract or Staff arrangements must be evidenced by a written document available to the Department or Customer.
- 4.4 The Contractor agrees to make payments to the subcontractor or Staff within seven working days after receipt of full or partial payments from the Customer in accordance with Section 287.0585, F.S., unless otherwise stated in the contract between Contractor and subcontractor or required by law.

- 4.5 The Contractor agrees that neither the Department nor the Customer shall be liable to any subcontractor or Staff for any expenses or liabilities incurred in furtherance of this Contract, and Contractor shall be solely liable to the subcontractor and Staff for all expenses and liabilities incurred under the Contractor's contract or subcontract. The Contractor, at its expense, shall defend the Customer and the Department against any subcontractor or Staff claims regarding compensation or payment.
- 4.6 The Department supports diversity in its procurements and contracts, and requests that Contractors who engage in subcontracting offer subcontracting opportunities to certified woman-, veteran-, and minority-owned small businesses. The Contractor may contact the Office of Supplier Diversity at [osdinfo@dms.myflorida.com](mailto:osdinfo@dms.myflorida.com) for information on certified business enterprises available for subcontracting opportunities.

## **5. Conduct of Employees and Staff**

Contractor shall ensure that all of Contractor's employees and Staff provided under the Contract shall adhere to the standards of conduct prescribed in the Customer's personnel policy and procedure guidelines, particularly rules of conduct, security procedures, and any other applicable rules, regulations, policies, and procedures of the Customer, including but not limited to Rule Chapter 33-208, Florida Administrative Code. The Contractor shall ensure that all Staff and employees wear attire suitable for the position, either a standard uniform or business casual dress, identified by the Customer.

## **6. Contractor Security Clearance**

Customers may designate certain duties and/or positions as positions of "special trust" because they involve special trust responsibilities, are located in sensitive locations, or have key capabilities with access to sensitive or confidential information. The designation of a special trust position or duties is at the sole discretion of the Customer. Contractor or Contractor's employees and Staff who, in the performance of this Contract, will be assigned to work in positions determined by the Customer to be positions of special trust, may be required to submit to background screening and be approved by the Customer to work on this Contract.

## **7. Purchasing Card**

The State has implemented a purchasing card (P-Card). The Contractor may receive payments via the State's P-Card. P-Card acceptance for purchases is a mandatory requirement for the Contract but is not the exclusive method of payment. If the State changes its P-Card platform during the term of Contract, the Contractor shall make all necessary changes to accept payment via the State's new P-Card platform within 30 calendar days of notification of such change.

## **8. Purchase Order Requirements**

Customers shall use a Request for Quote per section 287.056(2), Florida Statutes, when making purchases off of this State Term Contract. Customers shall issue Request for Quotes to at least 25 vendors to provide IT Staff Augmentation services in accordance with section 287.0591(5), Florida Statutes. Customers shall order services from the Request for Quote via a Purchase Order with the Customers' selected Contractor. The terms of the Purchase Order shall not conflict with the terms and conditions established by this Contract.

In accepting a Purchase Order, the Contractor recognizes its responsibility for all tasks and deliverables contained therein, warrants that it has fully informed itself of all relevant factors

affecting accomplishment of the tasks and deliverables and agrees to be fully accountable for the performance thereof.

## **9. Request for Quotes**

- 9.1 Customers needing Information Technology Staff Augmentation Services will issue a Request for Quote (RFQ) each time they desire to solicit Information Technology Staff Augmentation Services. The Customer shall issue a detailed RFQ that includes a pricing model, term, service levels, educational qualifications and experience needed. Pursuant to sections 287.056(2) and 287.0591(5), F.S., an Agency must ensure that a RFQ is issued to a minimum of 25 contracted vendors awarded to provide the applicable Information Technology Staff Augmentation contractual services sought by the Agency. Some contractors are not contracted to provide all Job Titles, and the vendors selected to issue a RFQ to must have been awarded to provide the specific Job Title(s) as requested in the Agency RFQ.
- 9.2 Pursuant to section 287.056(2), F.S., RFQs performed within the scope of this Contract are not independent competitive solicitations and are not subject to the notice or challenge provisions of section 120.57(3), F.S.
- 9.3 While the specific format of the RFQ is left to the discretion of the agency, Customers will issue a RFQ document each time they desire to solicit Information Technology Staff Augmentation Services and shall send the RFQ document electronically via email or through MFMP to at least 25 Contractors that offer the specific awarded Job Title(s) sought by the Agency. When responding to a RFQ, Contractor must submit a completed Resume Self-Certification Form with the Contractor's response.
- 9.4 Customers issuing RFQs against this Contract should note when responses are due and when the Customer anticipates awarding the RFQ.
- 9.5 RFQs with project-based pricing, and any Purchase Orders issued from such RFQs, shall require payment dependent on completion of deliverables and tasks only and may not contain payment for hourly work. Customers who choose to use project-based pricing are not exempt from the requirements listed in Section 3.5, Request for Quote(s) Requirement, and must negotiate all pricing, fees, and related expenses associated with the completion of each task and deliverable. Project-based RFQs and Purchase Orders shall not include services that were not awarded to the Contractor or commodities that are not contemplated by this Contract. Quotes received in response to project-based RFQs shall include, and the total cost of the Purchase Order issued shall not exceed, an estimated cost to complete the RFQ requirements under the hourly pricing model for comparison. Project-based pricing is intended to provide predictability and a discount to Customers relative to the maximum hourly rates. Under no circumstances may a project-based price be permitted to be greater than the hourly rates.

## **10. Resume Self-Certification Form**

When submitting a response to an RFQ, the Contractor shall submit with its response a completed and signed Exhibit E, Resume Self-Certification Form to the Customer for each proposed Staff member identified in the RFQ response.

### 11. Ongoing Performance Measures

The Department intends to use performance-reporting tools in order to measure the performance of Contractor(s). These tools will include the Contractor Performance Survey (Exhibit G), to be completed by Customers on a quarterly basis. Such measures will allow the Department to better track Vendor performance through the term of the Contract(s) and ensure that Contractor(s) consistently provide quality services to the State and its Customers. The Department reserves the right to modify the Contractor Performance Survey document and introduce additional performance-reporting tools as they are developed, including online tools (e.g. tools within MFMP or on the Department's website).

### 12. Holidays

The following days are observed as holidays by state agencies in accordance with section 110.117, F.S.:

- New Year's Day
- Birthday of Martin Luther King, Jr., third Monday in January
- Memorial Day
- Independence Day
- Labor Day
- Veterans' Day, November 11
- Thanksgiving Day
- Friday after Thanksgiving
- Christmas Day

If any of these holidays falls on Saturday, the preceding Friday shall be observed as a holiday. If any of these holidays falls on Sunday, the following Monday shall be observed as a holiday. Customers may have additional holiday(s) observed specifically by the Customer which will be detailed in the Customer's order.

### 13. Contract Reporting

The Contractor shall report information on orders received from Customers associated with this Contract. The Contractor shall submit reports in accordance with the following schedule:

| Report                                          | Period Covered         | Due Date                                     |
|-------------------------------------------------|------------------------|----------------------------------------------|
| MFMP Transaction Fee Report                     | Calendar month         | 15 calendar days after the end of each month |
| Quarterly Sales Report                          | State's Fiscal Quarter | 30 calendar days after close of the period   |
| Diversity Report<br>(submitted to the Customer) | State Fiscal Year      | 30 Business Days after close of the period   |

### 14. MFMP Transaction Fee Report

The Contractor is required to submit monthly MFMP Transaction Fee Reports in the Department's electronic format. Reports are due 15 calendar days after the end of the reporting period. For information on how to submit Transaction Fee Reports online, please reference the detailed fee reporting instructions and vendor training presentations available online at the

“Transaction Fee & Reporting” section and “Training for Vendors” subsections under the “Vendors” tab on the MFMP website. Assistance with Transaction Fee Reporting is also available from the MFMP Customer Service Desk by email at: [VendorHelp@myfloridamarketplace.com](mailto:VendorHelp@myfloridamarketplace.com) or telephone 866-FLA-EPRO (866-352-3776) from 8:00 a.m. to 6:00 p.m. Eastern Time.

### **15. Quarterly Sales Reports**

The Contractor shall submit a completed Quarterly Sales Report electronically, in the required format, to the Department’s Contract Manager within thirty (30) calendar days after close of each quarter. The State’s fiscal quarters close on September 30, December 31, March 31, and June 30. The quarterly sales report can be found here:

[https://www.dms.myflorida.com/business\\_operations/state\\_purchasing/vendor\\_resources/quarterly\\_sales\\_report\\_format](https://www.dms.myflorida.com/business_operations/state_purchasing/vendor_resources/quarterly_sales_report_format).

The Contract Quarterly Sales Report will include all sales and orders associated with this Contract from Customers received during the reporting period. Initiation and submission of the Sales Report is the responsibility of the Contractor without prompting or notification from the DMS Contract Manager.

Failure to provide the quarterly sales report will result in the imposition of financial consequences and may result in the Contractor being found in default and the termination of the Contract. Initiation and submission of the quarterly sales report are the responsibility of the Contractor without prompting or notification by the Department. Sales will be reviewed on a quarterly basis. If no sales are recorded during the period, the Contractor must submit a report stating that there was no activity. If no sales are recorded in two consecutive quarters, the Contractor may be placed in probationary status or the Department may terminate the Contract.

Quarter 1 – (July-September) – due 30 calendar days after the close of the period  
 Quarter 2 – (October-December) – due 30 calendar days after the close of the period  
 Quarter 3 – (January-March) – due 30 calendar days after the close of the period  
 Quarter 4 – (April-June) due 30 calendar days after the close of the period

Exceptions may be made if a delay in submitting reports is attributable to circumstances that are clearly beyond the control of the Contractor. The burden of proof of unavoidable delay shall rest with the Contractor and shall be supplied in a written form and submitted to the Department.

The Department reserves the right to request additional sales information as needed.

### **16. Certified and Minority Business Enterprises Reports**

Upon Customer request, the Contractor shall report to the requesting Customer the Contractor’s spend with certified and other minority business enterprises in the provision of commodities or services related to the Customer’s orders. These reports shall include the period covered, the name, minority code, and Federal Employer Identification Number of each minority business utilized during the period; commodities and services provided by the minority business enterprise, and the amount paid to each minority business enterprise on behalf of the Customer.

### **17. Ad Hoc Reports**

The Department or Customer may require additional Contract information such as copies of purchase orders or ad hoc sales reports. The Contractor shall submit information in response to these specific ad hoc requests for reports within the specified amount of time as requested by the Department or Customer.

### 18. Business Review Meetings

In order to maintain the relationship between the Department and the Contractor, each quarter the Department may request a business review meeting. The business review meeting may include, but is not limited to, the following:

- Successful completion of deliverables
- Review of the Contractor's performance
- Review of minimum required reports
- Addressing of any elevated Customer issues
- Review of continuous improvement ideas that may help lower total costs and improve business efficiencies.

### 19. Financial Consequences

The Department reserves the right to impose financial consequences when the Contractor fails to comply with the requirements of the Contract. The following financial consequences will apply for the Contractor's non-performance under the Contract. The Customer and the Contractor may agree to add additional Financial Consequences on an as-needed basis beyond those stated herein to apply to that Customer's resultant contract or purchase order. The State of Florida reserves the right to withhold payment or implement other appropriate remedies, such as Contract termination or nonrenewal, when the Contractor has failed to comply with the provisions of the Contract. The Contractor and the Department agree that financial consequences for non-performance are an estimate of damages which are difficult to ascertain and are not penalties.

The financial consequences below will be paid and received by the Department of Management Services within 30 calendar days from the due date specified by the Department. These financial consequences below are individually assessed for failures over each target period beginning with the first full month or quarter of the Contract performance and every month or quarter, respectively, thereafter.

| <b>Deliverable</b>                                                   | <b>Performance Metric</b>                                                               | <b>Performance Due Date</b>                                                                                 | <b>Financial Consequence for Non-Performance</b>                 |
|----------------------------------------------------------------------|-----------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------|
| Contractor will timely submit completed Quarterly Sales Reports      | All Quarterly Sales Reports will be submitted timely with the required information      | Reports are due on or before the 30 <sup>th</sup> calendar day after the close of each State fiscal quarter | \$250 per Calendar Day late/not received by the Contract Manager |
| Contractor will timely submit completed MFMP Transaction Fee Reports | All MFMP Transaction Fee Reports will be submitted timely with the required information | Reports are due on or before the 15 <sup>th</sup> calendar day after the close of each month                | \$100 per Calendar Day late/not received by the Contract Manager |

**Failure to timely provide Quarterly Sales Reports, transaction fee reports, or other reports as required will result in the imposition of financial consequences and repeated**

**failures or non- payment of financial consequences owed under this Contract may result in the Contractor being found in default and the termination of the Contract.**

**No favorable action will be considered when Contractor has outstanding Contract Quarterly Sales Reports, MFMP Transaction Fee Reports, or any other documentation owed to the Department or Customer, to include fees / monies, that is required under this Contract.**

## **20. Routine Communications**

All routine communications related to the Contract shall be sent to the Department's Contract Manager. If any of the Contractor's contract information changes during the life of the Contract, the Contractor shall notify the Department's Contract Manager; such updates do not necessitate a formal amendment to the Contract. Communications relating to a Customer contract or purchase order should be addressed to the contact person identified in the contract or purchase order. Routine communications may be my email, regular mail, or telephone.

## **21. Contract Transition**

Upon Contract expiration or termination, the Contractor shall ensure a seamless transfer of Contract responsibilities with any subsequent Contractor necessary to transition the Products and services of the Contract. The incumbent Contractor assumes all expenses related to the contract transition.

## **22. Other Fees and Charges**

Additional fees (including but not limited to, property taxes, fuel surcharges, interest fees, license fees, and late payment fees except where permitted by section 215.422(3)(b), F.S.) or fees not permitted elsewhere in the Contract are prohibited.

## Exhibit B

## ENTERPRISE STANDARD TERMS AND CONDITIONS

**These Enterprise Standard Terms and Conditions set forth the terms and conditions regarding the administration of the Term Contract, including the provision of Products to Customers. Customer specific terms for purchases off this Term Contract shall be set forth in the Customer specific agreement.**

## SECTION 1. DEFINITIONS

Capitalized terms used herein are defined as follows:

**“Attachments”** means the attachments, addenda, schedules, exhibits, and other documents, however so titled, attached hereto or incorporated by reference herein.

**“Business Days”** means Monday through Friday, inclusive, excluding State holidays specified in section 110.117, Florida Statutes (“F.S.”).

**“Contractor”** means the person or entity that is a party to the Term Contract and is offering Products for purchase.

**“Customer”** means the agency, as defined in section 287.012, F.S., or eligible user, as defined in Rule 60A-1.001, Florida Administrative Code (“F.A.C.”), that makes a purchase off the Term Contract. For the avoidance of doubt, this also includes the Department when it purchases off the Term Contract.

**“Department”** means the Department of Management Services, an agency as defined in section 287.012, F.S., responsible for the administration of this Term Contract.

**“Enterprise Alternate Contract Source”** means a contract authorized pursuant to section 287.042(16), F.S., or approved pursuant to section 287.057(3)(b), F.S., for statewide use.

**“Product”** means any deliverable under the Term Contract, which may include commodities and contractual services, as each is defined in section 287.012, F.S. “Product” does not include, and no State funding under the Term Contract is being provided for, promoting, advocating for, or providing training or education on “Diversity, Equity, and Inclusion” (“DEI”). DEI is any program, activity, or policy that classifies individuals on the basis of race, color, sex, national origin, gender identity, or sexual orientation and promotes differential or preferential treatment of individuals on the basis of such classification, or promotes the position that a group or an individual’s action is inherently, unconsciously, or implicitly biased on the basis of such classification.

**“State”** means the State of Florida

**“State Term Contract”** means a term contract that is competitively procured by the department pursuant to section 287.057, F.S. and that is used by agencies and eligible users pursuant to section 287.056, F.S.

**“Term Contract”** means the legally enforceable term contract, as defined in section 287.012, F.S., between the Department and Contractor to which these Enterprise Standard Terms and Conditions apply, including all Attachments thereto. The Term Contract is either a State Term Contract or an Enterprise Alternate Contract Source.

## SECTION 2. CONTRACT AMENDMENT

**2.1 Amendment.** The Term Contract contains all the terms and conditions agreed upon by the parties. Unless otherwise stated in Term Contract, the Term Contract may only be amended upon mutual written agreement signed by the parties. No oral agreements or representations will be valid or binding upon the Department or the Contractor. Unless explicitly agreed to by the Department in the Term Contract, no unilateral alteration or modification of the Term

Contract terms, including substitution of Product, will be valid or binding against the Customer.

The Department and Contractor may modify the Term Contract to alter, add to, or deduct from the Term Contract specifications, provided that such changes are within the general scope of the Term Contract. The parties may make an equitable adjustment in the Term Contract price or delivery date if the change affects the cost or time of performance.

### **SECTION 3. CONTRACT CONSTRUCTION AND ADMINISTRATION**

**3.1 Construction.** Unless the context requires otherwise, (i) the words "include," "includes," and "including" are deemed to be followed by the words "without limitation;" (ii) the word "or" is not exclusive; and (iii) the words "herein," "hereof," "hereby," "hereto," and "hereunder" refer to the Term Contract as a whole, inclusive of all Attachments. Unless the context requires otherwise, references herein to (i) sections or Attachments mean the sections of, or Attachments to, the Term Contract; (ii) an agreement, instrument, or other document means such agreement, instrument, or other document as amended, supplemented, and modified from time to time to the extent permitted by the provisions thereof; and (iii) a statute, rule, or other law or regulation means such statute, rule, or other law or regulation as amended from time to time and includes any successor legislation thereto and any regulations promulgated thereunder.

Unless the context requires otherwise, whenever the masculine is used in the Term Contract, the same will include the feminine and whenever the feminine is used herein, the same will include the masculine. Unless the context requires otherwise, whenever the singular is used in the Term Contract, the same will include the plural, and whenever the plural is used herein, the same will include the singular, where appropriate. All references to "\$" or "dollars" means the United States Dollar, the official and lawful currency of the United States of America.

The Term Contract will be construed without regard to any presumption or rule requiring construction or interpretation against the party drafting an instrument or causing any instrument to be drafted. The Attachments referred to herein will be construed with, and as an integral part of, the Term Contract to the same extent as if they were set forth verbatim herein.

**3.2 Administration.** Execution in Counterparts. The Term Contract may be executed in counterparts, each of which will be an original and all of which will constitute but one and the same instrument.

**3.2.1 Notices.** Where the term "written notice" is used to specify a notice requirement herein, said notice will be deemed to have been given (i) when personally delivered; (ii) email (with confirmation of receipt) the day immediately following the day (except if not a Business Day then the next Business Day) on which the notice or communication has been provided prepaid by the sender to a recognized overnight delivery service; or (iii) on the date actually received except where there is a date of the certification of receipt.

Unless otherwise specified, the Contractor shall deliver all notices to the Department's Contract Manager and the Department shall deliver all notices to the Contractor's Contract Manager.

3.2.2 **Severability.** If a court deems any non-material provision of the Term Contract void or unenforceable, all other provisions will remain in full force and effect. Upon a determination that any material provision is void or unenforceable, the parties shall negotiate in good faith to modify this Term Contract to give effect to the original intent of the parties as closely as possible in order that the transactions contemplated hereby are consummated as originally contemplated to the greatest extent possible.

3.2.3 **Waiver.** The delay or failure by the Department to exercise or enforce any of its rights under the Term Contract will not constitute or be deemed a waiver of the Department's right thereafter to enforce those rights, nor will any single or partial exercise of any such right preclude any other or further exercise thereof or the exercise of any other right.

3.2.4 **Survivability.** The Term Contract and any and all promises, covenants, and representations made herein are binding upon the parties hereto and any and all respective heirs, assigns, and successors in interest. The respective obligations of the parties, which by their nature would continue beyond the termination or expiration of the Term Contract, including without limitation, the obligations regarding confidentiality, proprietary interests, reporting, and public records, will survive termination or expiration of the Term Contract.

3.2.5 **Third Party Beneficiaries.** The parties acknowledge and agree that the Term Contract is for the benefit of the parties hereto. The Term Contract is not intended to confer any legal rights or benefits on any other party, except such rights and benefits associated with a purchase made by a Customer off this Term Contract.

## **SECTION 4. CONTRACT TERM, SUSPENSION, AND TERMINATION.**

4.1 **Term.** The initial term will begin on the date set forth in the Term Contract documents or on the date the Term Contract is signed by all parties, whichever is later.

Upon written agreement, the Department and the Contractor may renew the Term Contract in whole or in part only as set forth in the Term Contract documents, and in accordance with section 287.057(13), F.S. No costs may be charged for the renewals.

### **4.2 Suspension of Work and Termination.**

4.2.1 **Suspension of Work.** The Department may, in its sole discretion, suspend any or all activities under the Term Contract, at any time, when it is in the best interest of the State of Florida to do so. The Department will provide the Contractor written notice outlining the particulars of the suspension. After receiving a suspension notice, the Contractor must comply with the notice and will cease the performance of the Term Contract. Suspension of work will not entitle the Contractor to any compensation for services not performed or commodities not delivered during the suspension period nor for any additional compensation.

4.2.2 **Termination for Convenience.** The Term Contract may be terminated by the Department, by written notice to the Contractor thirty (30) calendar days in advance, in whole or in part at any time, when the Department determines in its sole discretion that it is in the Department's interest to do so. The Contractor shall not furnish any Product after it receives the notice of termination, except as necessary to complete

the continued portion of the Term Contract, or a continued purchase off the Term Contract, if any. The Contractor will not be entitled to recover any cancellation charges or lost profits. If the Term Contract is terminated before performance is completed, the Contractor will be paid only for that work satisfactorily performed for which costs can be substantiated. Such payment, however, may not exceed an amount which is the same percentage of any Customer contract price as the amount of work satisfactorily performed. All work in progress will become the property of the Customer and will be turned over promptly by the Contractor.

- 4.2.3 **Termination for Cause.** The Department may terminate the Term Contract if the Contractor fails to (i) on multiple occasions, timely deliver Products purchased by Customers, (ii) on multiple occasions, maintain adequate progress on Customer purchases, thus endangering performance, (iii) honor any term of the Term Contract, or (iv) abide by any statutory, regulatory, or licensing requirement. The Department may, at its sole discretion, (i) immediately terminate the Term Contract, (ii) notify the Contractor of the deficiency and require that the deficiency be corrected within a specified time, otherwise the Term Contract will terminate at the end of such time, or (iii) take other action deemed appropriate by the Department. The Contractor shall continue work on any work not terminated.

Except for defaults of subcontractors at any tier, the Contractor will not be liable for any excess costs if the failure to perform arises from events completely beyond the control, and without the fault or negligence, of the Contractor. If the failure to perform is caused by the default of a subcontractor at any tier, and if the cause of the default is completely beyond the control of both the Contractor and the subcontractor, and without the fault or negligence of either, the Contractor will not be liable for any excess costs for failure to perform, unless the subcontracted Products were obtainable from other sources in sufficient time for the Contractor to meet the required delivery schedule. If, after termination, it is determined that the Contractor was not in default, or that the default was excusable, the rights and obligations of the parties will be the same as if the termination had been issued for the convenience of the Department. The rights and remedies of the Department in this clause are in addition to any other rights and remedies provided by law or under the Term Contract. The Customer will notify the Department of any vendor that has met the grounds for placement of the vendor on the Department of Management Services' Suspended Vendor List, as required in section 287.1351, F.S.

- 4.2.4 **Termination for Non-Compliance with E-Verify.** Pursuant to section 448.095(5)(c)1., F.S., the Department shall terminate the Term Contract if it has a good faith belief that the Contractor has knowingly violated section 448.09(1), F.S. Pursuant to section 448.095(5)(c)2., F.S., if the Department has a good faith belief that a subcontractor knowingly violated section 448.09(1), F.S., the Department shall promptly notify the Contractor and order the Contractor to immediately terminate the contract with the subcontractor.
- 4.2.5 **Termination Related to Statutory Certifications.** At the Department's option, the Term Contract may be terminated if the Contractor is placed on any of the lists referenced in the attached PUR 7801, Vendor Certification Form, or would otherwise be prohibited from entering into or renewing the Term Contract based on the statutory provisions referenced therein.

- 4.2.6 **Termination for Refusing Access to Public Records.** In accordance with section 287.058, F.S., the Department may unilaterally terminate the Term Contract for refusal by the Contractor to allow public access to all documents, papers, letters, or other material made or received by the Contractor in conjunction with the Term Contract, unless the records are exempt from s. 24(a) of Art. I of the State Constitution and section 119.071(1), F.S.

## **SECTION 5. PURCHASES OFF THE TERM CONTRACT.**

- 5.1 Purchases.** By executing the Term Contract, the Contractor agrees to allow Customers to make purchases off the Term Contract. Purchases from Customers other than the Department are independent of the agreement between the Department and the Contractor, and the Department shall not be a party to such transaction. Customers' purchases off the Term Contract are limited to Products offered under the Term Contract, and no additional Products may be provided under a purchase off the Term Contract.
- 5.2 Purchase Submission.** For any purchases off the Term Contract, either the contract (as defined in Rule 60A-1.001, F.A.C.) must be executed between the Customer and Contractor, or the purchase order (as defined in Rule 60A-1.001, F.A.C.) must be issued by the Customer to the Contractor, no later than the last day of the Term Contract's term to be considered timely. Contracts executed, or purchase orders issued, after the last day of the Term Contract's term shall be considered void.
- 5.3 Terms.** The terms of the Form PUR 1000, General Contract Conditions, incorporated in Rule 60A-1.002, F.A.C., and linked here <http://www.flrules.org/Gateway/reference.asp?No=Ref-16731>, are hereby incorporated by reference herein and will apply to all purchases made by a Customer off the Term Contract. The Customer may attach additional terms and conditions specific to its particular purchase made off the Term Contract, which are considered Special Conditions. The term "Special Conditions" does not include any Contractor-provided documents, including attachments or standard preprinted forms, service agreements, end user agreements, product literature, or "shrink wrap" terms accompanying or affixed to a Product, whether written or electronic, or terms incorporated onto the Contractor's order or fiscal forms or other documents forwarded by the Contractor for payment. Any Customer Special Conditions shall not become a part of the Term Contract.
- 5.3.1 Term.** The term of the Customer purchase off the Term Contract will be as specified in the purchase, except that if renewals of the purchase are permitted, the Customer and Contractor shall not renew the purchase if the Term Contract expires prior to the effective date of the renewal. Any existing term of a purchase off the Term Contract shall not extend more than forty-eight (48) months beyond the end of the Term Contract. However, if an extended pricing plan offered in the Term Contract is agreed upon by the Customer and Contractor and extends more than forty-eight (48) months beyond the end of the Term Contract, the agreed upon extended pricing plan terms shall govern the maximum duration of the purchase. The Contractor is required to fulfill timely purchases that extend performance beyond the Term Contract term even when such extended delivery will occur after expiration of the Term Contract. For such purchases, all terms and conditions of the Term Contract shall survive the termination or expiration of the Term Contract and apply to the Contractor's continued performance.
- 5.3.2 Additional Requirements.** All Customer purchases off the Term Contract shall

contain the Term Contract name and number and shall be placed by the Customer. Delivery or furnishing Products shall not occur until the Customer executes their contract or transmits the purchase order, as defined in Rule 60A-1.001, F.A.C.

## **SECTION 6. PAYMENT AND FEES.**

**6.1 Pricing.** The Contractor shall not exceed the pricing set forth in the Term Contract documents.

**6.2 Best Pricing Offer.** During the term of the Term Contract, if the Department or Customer becomes aware of better pricing offered by the Contractor for substantially the same or a smaller quantity of a Product outside the Term Contract, but upon the same or similar terms of the Term Contract, then the Department or Customer may request that the Contractor immediately reduce to the lower price.

**6.3 Price Decreases.** The following price decrease terms will apply to the Term Contract:

**6.3.1 Quantity Discounts.** The Contractor may offer additional discounts for one-time delivery of large single orders. The Customer should seek to negotiate additional price concessions on quantity purchases of any Products offered under the Term Contract.

**6.3.2 Sales Promotions.** In addition to decreasing prices for the balance of the Term Contract term due to a change in market conditions, the Contractor may conduct sales promotions involving price reductions for a specified lesser period. If conducting a sales promotion, the Contractor must submit documentation to the Department's Contract Manager identifying the proposed: (1) starting and ending dates of the promotion, (2) Products involved, and (3) promotional prices compared to then-authorized prices. The Contractor shall provide notice to Customers of the promotion and shall make the promotional prices available to all Customers.

**6.3.3 Equitable Adjustment.** The Department may, in its sole discretion, make an equitable adjustment in the Term Contract terms or pricing if pricing or availability of supply is affected by extreme and unforeseen volatility in the marketplace, that is, by circumstances that satisfy all the following criteria: (1) the volatility is due to causes wholly beyond the Contractor's control, (2) the volatility affects the marketplace or industry, not just the particular Term Contract source of supply, (3) the effect on pricing or availability of supply is substantial, and (4) the volatility so affects the Contractor that continued performance of the Term Contract would result in a substantial loss.

**6.4 Purchase Prerequisites.** The Contractor may be required to accept the State of Florida Purchasing Card and MyFloridaMarketPlace (MFMP) purchase orders. The Contractor must ensure that entities receiving payment directly from Customers under this Term Contract must have met the following requirements:

- Have an active registration with the Florida Department of State, Division of Corporations ([www.sunbiz.org](http://www.sunbiz.org)), or, if exempt from the registration requirements, provide the Department with the basis for such exemption.
- Be registered in the MFMP Vendor Information Portal (<https://vendor.myfloridamarketplace.com>).
- Have a current W-9 filed with the Florida Department of Financial Services (<https://flvendor.myfloridacfo.com>)

**6.5 Transaction Fees.** The State of Florida, through the Department of Management Services,

has instituted MyFloridaMarketPlace, a statewide eProcurement system pursuant to section 287.057(24), Florida Statutes (F.S.). All payments issued by Agencies to registered vendors for purchases of Commodities or Contractual Services under Chapter 287, F.S., shall be assessed the Transaction Fee of one percent (1.0%) of the total amount of the payments received from the State or Eligible Users, as prescribed by Rule 60A-1.031, Florida Administrative Code (F.A.C.), or as may otherwise be established by law. Vendors shall pay the Transaction Fee and are subject to automatic deduction of the Transaction Fee, when automatic deduction becomes available. Vendors shall submit any monthly reports required pursuant to Rule 60A-1.031, F.A.C. All such reports and payments are subject to audit. The Agency will have grounds for declaring the vendor in default if the vendor fails to comply with the payment of the Transaction Fee or reporting of payments, which may subject the vendor to being suspended from business with the State of Florida.

- 6.6 Exclusivity.** The Term Contract is not an exclusive license to provide the Products described in the Term Contract. The Department may, without limitation and without recourse by the Contractor, contract with other vendors to provide the same or similar Products.

## **SECTION 7. PERFORMANCE**

- 7.1 Warranty of Ability to Perform.** Upon the effective date of the Term Contract, and each year on the anniversary date of the Term Contract, the Contractor shall submit to the Department a completed PUR 7801, Vendor Certification Form. The Contractor warrants that, to the best of its knowledge, there is no pending or threatened action, proceeding, or investigation, or any other legal or financial condition, that would in any way prohibit, restrain, or diminish the Contractor's ability to satisfy its Term Contract obligations.

Additionally, the Contractor shall promptly notify the Department in writing if its ability to perform is compromised in any manner during the term of the Term Contract (including potential inability to renew the Term Contract due to section 287.138 or 908.111, F.S.) or if it or its suppliers, subcontractors, or consultants under the Term Contract are placed on the Suspended Vendor, Convicted Vendor, Discriminatory Vendor, Forced Labor Vendor, or Antitrust Violator Vendor Lists. The Contractor shall use commercially reasonable efforts to avoid or minimize any delays in performance and shall inform the Department of the steps the Contractor is taking or will take to do so, and the projected actual completion (or delivery) time. If the Contractor believes a delay in performance by the Department has caused or will cause the Contractor to be unable to perform its obligations on time, the Contractor shall promptly so notify the Department and use commercially reasonable efforts to perform its obligations on time notwithstanding the Department's delay.

- 7.2 Further Assurances.** The parties shall, with reasonable diligence, do all things and provide all reasonable assurances as may be necessary to complete the requirements of the Term Contract, and each party shall provide such further documents or instruments requested by the other party as may be reasonably necessary or desirable to give effect to the Term Contract and to carry out its provisions. The Department is entitled at all times, upon request, to be advised as to the status of work being done by the Contractor and the details thereof.
- 7.3 Assignment.** The Contractor shall not sell, assign or transfer any of its rights, duties or obligations under the Term Contract without the prior written consent of the Department. In the event of any assignment, the Contractor remains secondarily liable for performance of

the Term Contract, unless the Department expressly waives such secondary liability. The Department may assign the Term Contract with prior written notice to Contractor of its intent to do so.

#### **7.4 Employees, Subcontractors, and Agents.**

7.4.1 **Subcontractors.** The Contractor will not subcontract any work under the Term Contract without prior written consent of the Department. The Contractor shall obtain prior written consent using the process identified on the Department's website: [Subcontractor/Dealer/Reseller Forms / Vendor Resources / State Purchasing / Business Operations - Florida Department of Management Services \(myflorida.com\)](https://myflorida.com/procurement/subcontractor-dealer-reseller-forms/). The use of the term "subcontractor" may refer to affiliates, resellers, dealers, distributors, partners, teammates, and all other third parties utilized by the Contractor at any tier under the Term Contract. The Contractor is responsible for ensuring that its subcontractors providing commodities and performing services in furtherance of the Term Contract do so in compliance with the terms and conditions of the Term Contract. By execution of the Term Contract, the Contractor acknowledges that it will not be released of its contractual obligations to Customers because of any failure of a subcontractor. The Contractor is fully responsible for satisfactory completion of all work performed under the Term Contract. The Contractor's use of a subcontractor not approved by the Department will be considered a material breach of the Term Contract.

7.4.2 **Independent Contractor.** The Contractor and its employees, agents, representatives, and subcontractors are not employees or agents of the Department or the State and are not entitled to the benefits of Department or State employees. Neither the Customer nor the State will be bound by any acts or conduct of the Contractor or its employees, subcontractors, or agents. The Contractor shall include this provision in all of its subcontracts under the Term Contract.

**7.5 Force Majeure, Notice of Delay, and No Damages for Delay.** The Contractor will not be responsible for delay resulting from its failure to perform if neither the fault nor the negligence of the Contractor or its employees, subcontractors, or agents contributed to the delay and the delay is due directly to acts of God, wars, acts of public enemies, strikes, fires, floods, or other similar cause wholly beyond the Contractor's control, or for any of the foregoing that affect suppliers if no alternate source of supply is available to the Contractor.

In case of any delay the Contractor believes is excusable, the Contractor shall notify the Department in writing of the delay or potential delay and describe the cause of the delay either (i) within ten (10) calendar days after the cause that creates or will create the delay first arose, if the Contractor could reasonably foresee that a delay could occur as a result; or (ii) if a delay is not reasonably foreseeable, within five (5) calendar days after the date the Contractor first had reason to believe that a delay could result. THE FOREGOING WILL CONSTITUTE THE CONTRACTOR'S SOLE REMEDY OR EXCUSE WITH RESPECT TO ANY DELAY except if such delay is caused by the fraud, bad faith, or active interference of the Department. Providing notice in strict accordance with this paragraph is a condition precedent to such remedy, and a rebuttable presumption of prejudice will exist based on Contractor's untimely notice. The Contractor shall not assert any claim for damages related to such delay. The Contractor will not be entitled to an increase in the Term Contract price or payment of any kind from the Department for direct, indirect, consequential, impact, or other costs, expenses, or damages, including costs of acceleration or inefficiency, arising

because of delay, disruption, interference, or hindrance from any cause whatsoever.

If performance is suspended or delayed, in whole or in part, due to any of the causes described in this subsection, the Department may unilaterally (and with no recourse on the part of the Contractor) identify and use an alternate source to complete any work under the Term Contract as the Department deems necessary, in its sole discretion. After the causes have ceased to exist, the Contractor shall perform at no increased cost, unless the Department determines, in its sole discretion, that the delay will significantly impair the value of the Contract to the Department or State, in which case the Department may (i) accept allocated performance or deliveries from the Contractor, provided that the Contractor grants preferential treatment to the Department with respect to Products subjected to allocation; or (ii) terminate the Term Contract in whole or in part.

## **SECTION 8. CONTRACT MANAGEMENT**

**8.1 Department's Contract Manager.** The Department's Contract Manager for the Term Contract, who is primarily responsible for the Department's oversight of the Term Contract, will be identified in a separate writing to the Contractor upon Term Contract signing in the following format:

Department's Contract Manager Name  
 Department's Name  
 Department's Physical Address  
 Department's Telephone #  
 Department's Email Address

**8.2 Contractor's Contract Manager.** The Contractor's Contract Manager, who is primarily responsible for the Contractor's oversight of the Term Contract performance, will be identified in a separate writing to the Department upon Term Contract signing in the following format:

Contractor's Contract Manager Name  
 Contractor's Name  
 Contractor's Physical Address  
 Contractor's Telephone #  
 Contractor's Email Address

Either party may notify the other by email of a change to a designated contact providing the contact information for the newly designated contact, and such notice is sufficient to effectuate this change without requiring a written amendment to the Term Contract.

## **SECTION 9. COMPLIANCE WITH LAWS.**

**9.1 Conduct of Business.** The Contractor shall comply with all laws, rules, codes, ordinances, and licensing requirements that are applicable to the conduct of its business and that are applicable to the Term Contract, including those of federal, state, and local agencies having jurisdiction and authority, and shall ensure that any and all subcontractors utilized do the same. The Contractor represents and warrants that no part of the funding under the Term Contract will be used in violation of any state or federal law, including, but not limited to, 8 U.S.C. § 1324 or 8 U.S.C. § 1325, or to aid or abet another in violating state or federal law. The Department may terminate the Term Contract at any time if the Contractor violates, or aids or abets another in violating, any state or federal law.

If the requirements of the Term Contract conflict with any governing law, codes or regulations, the Contractor shall notify the Department in writing and the parties shall amend the Term Contract to comply with the applicable code or regulation. Similarly, if the Contractor believes that any governmental restrictions have been imposed that require alteration of the material, quality, workmanship or performance of the Products offered under the Term Contract, the Contractor shall immediately notify the Department in writing, indicating the specific restriction. The Department reserves the right and the complete discretion to accept any such alteration or to cancel the Term Contract at no further expense to the Department.

Pursuant to section 287.057(26), F.S., the Contractor shall answer all questions of, and ensure a representative will be available to, a Customer's continuing oversight team for purchases off this Term Contract.

**9.2 Integrity.** In addition to any applicable statutory restrictions, the Contractor shall not, in connection with this or any other agreement with the State, directly or indirectly (i) offer, confer, or agree to confer any pecuniary benefit on anyone as consideration for any State officer or employee's decision, opinion, recommendation, vote, other exercise of discretion, or violation of a known legal duty; or (ii) offer, give, or agree to give to anyone any gratuity for the benefit of, or at the direction or request of, any State officer or employee. For purposes of clause (ii), "gratuity" means any payment in the form of cash, travel, entertainment, gifts, meals, lodging, loans, subscriptions, advances, deposits of money, services, employment, or contracts of any kind.

## **SECTION 10. DISPUTES AND LIABILITIES.**

**10.1 Dispute Resolution.** Should any disputes arise between the Department and the Contractor with respect to the Term Contract, the Contractor and the Department shall act immediately to resolve any such disputes. Time is of the essence in the resolution of disputes.

Exhaustion of this administrative remedy detailed in the Dispute Resolution Process contemplated in this Term Contract is an absolute condition precedent to the Contractor's ability to seek other remedies related to the Term Contract.

### **10.2 Dispute Resolution Process.**

- (a) Department Review. The parties shall resolve disputes through written submission of their dispute to the Department's Contract Manager. The Department shall respond to the dispute in writing within ten (10) Business Days from the date that the Department's Contract Manager receives the dispute. The Department's decision shall be final unless a party provides the other party with written notice of the party's disagreement with the decision within ten (10) Business Days from the date of the Department's decision. If a party disagrees with the Department's decision, the party may proceed to subsection (b) below.
- (b) Meeting between the Principals. If either party disagrees with the Department's decision, such disagreeing party shall notify the other party of the disagreement within ten (10) Business Days. The parties shall then schedule a meeting between each party's principal (for the Department, the Department head or designee; for the Contractor, the Chief Executive Officer or designee) on a mutually agreed upon date, no later than ten (10) Business Days after the provision of the notice. The principals shall attempt to mutually resolve the disagreement at such meeting.
- (c) Mediation. If the dispute is not resolved through a meeting of the Principals, the parties, upon mutual agreement, may mediate such dispute. If such mediation is not completed

within 100 calendar days from receipt of the Department's decision, then either party may seek other remedies.

If the dispute is not resolved through the full process in subsections (a) - (c) above (or (a) – (b), if mediation is not agreed to), either party may pursue any other remedies.

**10.3 Contractor's Obligation to Perform While Disputes are Pending.** The Contractor shall proceed diligently with performance under the Term Contract pending the final resolution of any dispute or request for relief, claim, appeal, or action arising under the Term Contract and shall comply with directions to perform from the Department. Should the Contractor not perform while a dispute is pending, including by not performing disputed work, such nonperformance by the Contractor may be deemed to be an unexcused breach of the Term Contract which is separate and apart from any other dispute.

**10.4 Governing Law and Venue.** The Term Contract will be governed by, and construed in accordance with, the laws of the State. Jurisdiction and venue for suit arising under the terms of the Term Contract will exclusively be in the appropriate State court located in Leon County, Florida. Except as otherwise provided by law, the parties agree to be responsible for their own attorney's fees and costs incurred in connection with disputes arising under the terms of the Term Contract.

**10.5 Remedies Cumulative.** No remedy herein conferred upon or reserved to either party is intended to be exclusive of any other remedy or remedies, and each and every such remedy will be cumulative, and will be in addition to every other remedy given hereunder or now or hereafter existing at law or in equity.

**10.6 JURY WAIVER. THE PARTIES, ON BEHALF OF THEMSELVES AND ASSIGNS, WAIVE ALL RIGHT TO TRIAL BY JURY FOR ANY ACTION, APPEAL, CLAIM, OR PROCEEDING, WHETHER IN LAW IN OR IN EQUITY, WHICH IN ANY WAY ARISES OUT OF OR RELATES TO THE TERM CONTRACT OR ITS SUBJECT MATTER.**

**10.7 Indemnification.** For any and all third-party claims, actions, demands, liabilities, and expenses of any kind which are caused by, related to, growing out of or happening in connection with the Term Contract (including any determination arising out of or related to the Term Contract that the Contractor or its employees, agents, subcontractors, assignees, or delegates are not independent contractors in relation to the Department or State), the Contractor shall be fully liable for the actions of its employees, subcontractors, and agents and shall fully indemnify, defend, and hold harmless the Department and the State (including each of their current and former officers, agents, and employees) for any and all loss, damage, injury, costs, reasonable expenses, or other casualty to person or property. Without limiting this indemnification requirement, the Department may provide the Contractor (i) written notice of any action or threatened action, (ii) the opportunity to take over and settle or defend any such action at the Contractor's sole expense, and (iii) assistance in defending the action at the Contractor's sole expense. The above indemnity requirement does not apply to that portion of any loss or damages proximately caused by the negligent act or omission of the Department or the State. Nothing herein is intended to act as a waiver of the Department's or State's sovereign immunity or to be deemed consent by the Department or State or its subdivisions to suit by third parties.

## **SECTION 11. MISCELLANEOUS.**

**11.1 Department of State Registration.** Consistent with Title XXXVI, F.S., if the Contractor asserts status other than that of a sole proprietor, it must provide the Department with i) conclusive evidence of a certificate of status, not subject to qualification, if a Florida business entity; ii) a certificate of authorization if a foreign business entity; or iii) if exempt from the registration requirements, a basis for such exemption.

**11.2 Time is of the Essence.** Time is of the essence regarding every obligation of the Contractor under the Term Contract. Each obligation is deemed material, and a breach of any such obligation (including a breach resulting from untimely performance) is a material breach.

**11.3 Cooperative Purchasing.** Pursuant to their own governing laws, and subject to the agreement of the Contractor, governmental entities that are not Customers may make purchases under the terms and conditions contained herein, if agreed to by the Contractor. Such purchases are independent of the Term Contract between the Department and the Contractor, and the Department is not a party to these transactions.

## **SECTION 12. PUBLIC RECORDS, TRADE SECRETS, DOCUMENT MANAGEMENT, AND INTELLECTUAL PROPERTY.**

**12.1 General Record Management and Retention.** The Contractor shall retain all records that were made in relation to the Term Contract for the longer of five (5) years after expiration of the Term Contract or the period required by the General Records Schedules maintained by the Florida Department of State available at: <https://dos.fl.gov/library-archives/records-management/general-records-schedules/>.

**12.2 Identification and Protection of Confidential Information.** Article 1, section 24, of the Florida Constitution, guarantees every person access to public records, and section 119.011, F.S., provides a broad definition of “public record.” As such, records submitted to the Department (or any other State agency) are public records and are subject to disclosure unless exempt from disclosure by law. If the Contractor considers any portion of a record it provides to the Department (or any other State agency) to be trade secret or otherwise confidential or exempt from disclosure under Florida or federal law (“Confidential Information”), the Contractor shall mark as “confidential” each page of a document or specific portion of a document containing Confidential Information and simultaneously provide the Department (or other State agency) with a separate, redacted copy of the record. The Contractor shall state the basis of the exemption that the Contractor contends is applicable to each portion of the record redacted, including the specific statutory citation for such exemption. The Contractor shall only redact portions of records that it claims contains Confidential Information. If the Contractor fails to mark a record it claims contains Confidential Information as “confidential,” or fails to submit a redacted copy in accordance with this section of a record it claims contains Confidential Information, the Department (or other State agency) shall have no liability for release of such record. The foregoing will apply to every instance in which the Contractor fails to both mark a record “confidential” and redact it in accordance with this section, regardless of whether the Contractor may have properly marked and redacted the same or similar Confidential Information in another instance or record submitted to the Department (or any other State agency).

In the event of a public records request, to which records the Contractor marked as “confidential” are responsive to the request, the Department shall provide the Contractor-redacted copy to the requestor. If the Contractor has marked a record as “confidential” but

failed to provide a Contractor-redacted copy to the Department, the Customer may notify the Contractor of the request and the Contractor may have up to ten (10) Business Days from the date of the notice to provide a Contractor-redacted copy, or else the Department may release the unredacted record to the requestor without liability. If the Department provides a Contractor-redacted copy of the documents and the requestor asserts a right to the Contractor-redacted Confidential Information, the Department shall promptly notify the Contractor such an assertion has been made. The notice will provide that if the Contractor seeks to protect the Contractor-redacted Confidential Information from release it must, within thirty (30) days after the date of the notice and at its own expense, file a cause of action seeking a declaratory judgment that the information in question is exempt from section 119.07(1), F.S., or other applicable law and an order prohibiting the Department from publicly disclosing the information. The Contractor shall provide written notice to the Department of any cause of action filed. If the Contractor fails to file a cause of action within thirty (30) days the Department may release the unredacted copy of the record to the requestor without liability.

If the Department is requested or compelled in any legal proceeding to disclose documents that are marked as "confidential" (whether by oral questions, interrogatories, requests for information or documents, subpoena, or similar process), unless otherwise prohibited by law, the Department shall give the Contractor prompt written notice of the demand or request prior to disclosing any Confidential Information to allow the Contractor to seek a protective order or other appropriate relief at the Contractor's sole discretion and expense. If the Contractor fails to take appropriate and timely action to protect the Confidential Information contained within documents it has marked as "confidential" or fails to provide a redacted copy that may be disclosed, the Department may provide the unredacted records in response to the demand without liability.

The Contractor shall protect, defend, and indemnify the Department for all claims, costs, fines, settlement fees, and attorneys' fees, at both the trial and appellate levels, arising from or relating to the Contractor's determination that its records contain Confidential Information. In the event of a third-party claim brought against the Department for failure to release the Contractor's redacted Confidential Information, the Contractor shall assume, at its sole expense, the defense or settlement of such claim, including attorney's fees and costs at both the trial and appellate levels. If the Contractor fails to continuously undertake the defense or settlement of such claim or if the Contractor and Department mutually agree that the Department is best suited to undertake the defense or settlement, the Department will have the right, but not the obligation, to undertake the defense or settlement of such claim, at its discretion. The Contractor shall be bound by any defense or settlement the Department may make as to such claim, and the Contractor agrees to reimburse the Department for the expense, including reasonable attorney's fees and costs at both the trial and appellate levels associated with any defense or settlement that the Department may undertake to defend Contractor's Confidential Information. The Department will also be entitled to join the Contractor in any third-party claim for the purpose of enforcing any right of indemnity under this section.

If at any point the Department is reasonably advised by its counsel that disclosure of the Confidential Information is required by law, including but not limited to Florida's public records laws, the Department may disclose such Confidential Information without liability hereunder.

**12.3 Public Records Requirements Pursuant to Section 119.0701, F.S.** Solely for the purpose of this section, the Department's Contract Manager is the agency custodian of public records. If, under the Term Contract, the Contractor is providing services and is acting on behalf of the public agency, as provided in section 119.0701, F.S., the Contractor shall:

- i. Keep and maintain public records required by the Department to perform the service.
- ii. Upon request from the Department's custodian of public records, provide the Department with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in Chapter 119, F.S., or as otherwise provided by law.
- iii. Ensure that public records that are exempt or confidential and exempt from public records disclosure are not disclosed except as authorized by law for the duration of the Term Contract term and following the completion of the Term Contract if the Contractor does not transfer the records to the Department.
- iv. Upon completion of the Term Contract, transfer, at no cost, to the Department all public records in possession of the Contractor or keep and maintain public records required by the Department to perform the service. If the Contractor transfers all public records to the Department upon completion of the contract, the Contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the Contractor keeps and maintains public records upon completion of the Term Contract, the Contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the Department, upon request from the Department's custodian of public records, in a format that is compatible with the information technology systems of the Department.

**IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS TERM CONTRACT, CONTACT THE DEPARTMENT'S CUSTODIAN OF PUBLIC RECORDS AT [PUBLICRECORDS@DMS.FL.GOV](mailto:PUBLICRECORDS@DMS.FL.GOV), (850) 487-1082 OR 4050 ESPLANADE WAY, SUITE 160, TALLAHASSEE, FLORIDA 32399-0950.**

**12.4 Advertising.** Subject to Chapter 119, Florida Statutes, the Contractor shall not publicly disseminate any information concerning the Term Contract without prior written approval from the Department, including mentioning the Term Contract in a press release or other promotional material, identifying the Department or the State as a reference, or otherwise linking the Contractor's name and either a description of the Term Contract or the name of the Department or the State in any material published, either in print or electronically, to any entity that is not a party to the Term Contract, except potential or actual Customers or authorized distributors, dealers, resellers, or service representatives.

**12.5 Intellectual Property.**

**12.5.1 Ownership.** Unless specifically addressed otherwise in the Customer's contract, the State of Florida shall be the owner of all intellectual property rights to all new property created or developed in connection with the Customer's contract. This shall not apply

to intellectual property developed prior to the execution of the Term Contract.

**12.5.2 Patentable Inventions or Discoveries.** Any inventions or discoveries developed in the course, or as a result, of services in connection with the Customer's contract that are patentable pursuant to 35 U.S.C. § 101 are the sole property of the State of Florida. Contractor must inform the Customer and the Department of any inventions or discoveries developed or made through performance of the Customer's contract, and such inventions or discoveries will be referred to the Florida Department of State for a determination on whether patent protection will be sought. The State of Florida will be the sole owner of all patents resulting from any invention or discovery made through performance of the Customer's contract. This shall not apply to any invention or discovery made prior to the execution of the Term Contract.

**12.5.3 Copyrightable Works.** Contractor must notify the Customer and the Department of any publications, artwork, or other copyrightable works developed in connection with the Customer's contract. All copyrights created or developed through performance of the Customer's contract are owned solely by the State of Florida. This shall not apply to any copyrightable works created or developed prior to the execution of the Term Contract.

## **SECTION 13. DATA SECURITY.**

The Contractor will maintain the security of State of Florida data including, but not limited to, maintaining a secure area around any displayed visible data and ensuring data is stored and secured when not in use. "State of Florida data" means data collected by, transmitted from, created for, or provided by the Department or the Customer. The Contractor will not allow any State of Florida data to be sent by any medium, transmitted, or accessed outside the United States due to Contractor's action or inaction. In the event of a Security Incident involving State of Florida data, the Contractor shall give notice to the Customer and the Department within one business day of becoming aware of the Security Incident. "Security Incident" for purposes of this section will refer to an actual or imminent threat of a violation of information technology resources, security, policies, or practices, unauthorized access of State of Florida data, or occurrences that compromise the confidentiality, integrity, or availability of State of Florida data. An imminent threat refers to a situation in which the Contractor has a factual basis for believing that a specific incident is about to occur. Once a data breach has been contained, the Contractor must provide the Department and the Customer with a post-incident report documenting all containment, eradication, and recovery measures taken. The Department reserves the right in its sole discretion to enlist a third party to audit Contractor's findings and produce an independent report, and the Contractor will fully cooperate with the third party. The Contractor will also comply with all HIPAA requirements and any other current state and federal rules and regulations regarding security of information.

## **SECTION 14. CONTRACT MONITORING.**

**14.1 Performance Standards.** The Contractor agrees to perform all tasks and provide deliverables as set forth in the Term Contract. The Customer will be entitled at all times, upon request, to be advised as to the status of work being done by the Contractor and of the details thereof.

**14.2 Contract Reporting.** The Contractor shall provide the Department the following accurate and complete reports associated with this Term Contract.

- 14.2.1 **Term Contract Quarterly Sales Reports.** The Contractor shall submit Quarterly Sales Reports in the manner and format required by the Department within 30 calendar days after the close of each State fiscal quarter (the State's fiscal quarters close on September 30, December 31, March 31, and June 30).

The Quarterly Sales Report template can be found here: [Quarterly Sales Report Format / Vendor Resources / State Purchasing / Business Operations / Florida Department of Management Services - DMS \(myflorida.com\)](#). Initiation and submission of the most recent version of the Quarterly Sales Report posted on the DMS website is the responsibility of the Contractor without prompting or notification from the Department. Sales will be reviewed on a quarterly basis. If no sales are recorded in two consecutive quarters, the Contractor may be placed on probationary status, or the Department may terminate the Term Contract. Failure to provide the Quarterly Sales Report, or other reports requested by the Department, will result in the imposition of financial consequences and may result in the Contractor being found in default and the termination of the Term Contract.

- 14.2.2 **Certified and Minority Business Enterprises Reports.** Upon Customer request, the Contractor shall report to each Customer spend with certified and other minority business enterprises in the provision of commodities or services related to the Customer orders. These reports shall include the period covered; the name, minority code, and Vendor Identification Information of each minority business enterprise utilized during the period; commodities and services provided by the minority business enterprise; and the amount paid to each minority business enterprise on behalf of the Customer.

- 14.2.3 **Ad Hoc Sales Reports.** The Department may require additional Term Contract sales information such as copies of purchase orders or ad hoc sales reports. The Contractor shall submit these documents and reports in the format acceptable to the Department and within the timeframe specified by the Department.

- 14.2.4 **MFMP Transaction Fee Reports.** The Contractor shall submit complete monthly MFMP Transaction Fee Reports to the Department. Reports are due 15 calendar days after the end of each month. Information on how to submit MFMP Transaction Fee Reports online can be located at [https://www.dms.myflorida.com/business\\_operations/state\\_myfloridamarketplace/mfmp\\_vendors/transaction\\_fee\\_and\\_reporting](https://www.dms.myflorida.com/business_operations/state_myfloridamarketplace/mfmp_vendors/transaction_fee_and_reporting). Assistance with transaction fee reporting is also available by email at [feeprocessing@myfloridamarketplace.com](mailto:feeprocessing@myfloridamarketplace.com) or telephone at 866-FLA-EPRO (866-352-3776) from 8:00 a.m. to 6:00 p.m. Eastern Time.

- 14.3 **Business Review Meetings.** Both the Department and Customer reserve the right to schedule business review meetings. The Department or Customer may specify the format or agenda for the meeting. At a minimum, the Business Review Meeting may include the following topics:

- Term Contract or Customer contract compliance
- Term Contract savings (in dollar amount and cost avoidance)
- Spend reports by Customer
- Recommendations for improved compliance and performance

#### 14.4 Performance Deficiencies.

14.4.1 **Proposal of a Corrective Action Plan.** In addition to the processes set forth in the Term Contract (e.g., service level agreements), if the Customer or the Department determines that there is a performance deficiency that requires correction by the Contractor, then the Customer or the Department will notify the Contractor. The correction must be made within a timeframe specified by the Customer or the Department. The Contractor must provide the Customer or the Department with a corrective action plan describing how the Contractor will address all performance deficiencies identified by the Customer or the Department.

14.4.2 **Retainage for Unacceptable Corrective Action Plan or Plan Failure.** For Customer-requested Corrective Action Plans, if the corrective action plan is unacceptable to the Customer, or implementation of the plan fails to remedy the performance deficiencies, the Customer will retain ten percent (10%) of the total invoice amount. The retainage will be withheld until the Contractor resolves the performance deficiencies. If the performance deficiencies are resolved, the Contractor may invoice the Customer for the retained amount. If the Contractor fails to resolve the performance deficiencies, the retained amount will be forfeited to compensate the Customer for the performance deficiencies.

#### 14.5 Inspection.

14.5.1 **Inspection at Contractor's Site.** The Department reserves the right to inspect, or enlist a third-party to perform, at any reasonable time with prior notice, the equipment, product, plant or other facilities of the Contractor to assess conformity with Term Contract requirements and to determine whether they are adequate and suitable for proper and effective Term Contract performance.

14.5.2 **Statutory Inspection Rights.** If services are to be provided pursuant to the Term Contract, in accordance with section 216.1366, F.S., the Department is authorized to inspect the: (i) financial records, papers, and documents of the Contractor that are directly related to the performance of the Term Contract or the expenditure of State funds; and (ii) programmatic records, papers, and documents of the Contractor which the Department determines are necessary to monitor the performance of the Term Contract or to ensure that the terms of the Term Contract are being met. The Contractor shall provide such records, papers, and documents requested by the Department within ten (10) Business Days after the request is made.

Further, for any Term Contract for services with a nonprofit organization as defined in section 215.97(2)(m), F.S., the Contractor must provide documentation that indicates the amount of state funds:

1. Allocated to be used during the full term of the Term Contract for remuneration to any member of the board of directors or an officer of the contractor; and
2. Allocated under each payment by the public agency to be used for remuneration of any member of the board of directors or an officer of the contractor.

The documentation must indicate the amounts and recipients of the remuneration.

**14.5.3 Inspection Compliance.** The Contractor understands its, and its subcontractors (if any), duty, pursuant to section 20.055(5), F.S., to cooperate with the Inspector General in any investigation, audit, inspection, review, or hearing. Upon request of the Department's Inspector General, or other authorized State official, the Contractor shall provide any type of information the State official deems relevant to the Contractor's integrity or responsibility. Such information may include the Contractor's business or financial records, documents, or files of any type or form that refer to or relate to the Term Contract. The Contractor agrees to reimburse the State for the reasonable costs of investigation incurred by the Inspector General or other authorized State official for investigations of the Contractor's compliance with the terms of the Term Contract or any other agreement between the Contractor and the State which results in the suspension or debarment of the Contractor. Such costs will include salaries of investigators, including overtime; travel and lodging expenses; and expert witness and documentary fees. The Contractor shall not be responsible for any costs of investigations that do not result in the Contractor's suspension or debarment.

## **SECTION 15. PERFORMANCE OR COMPLIANCE AUDITS.**

The Department may conduct or have conducted performance and/or compliance audits of the Contractor and subcontractors as determined by the Department. The Department may conduct an audit and review all the Contractor's and subcontractors' data and records that directly relate to the Term Contract. To the extent necessary to verify the Contractor's fees and claims for payment under the Term Contract, the Contractor's agreements or contracts with subcontractors, partners, or agents of the Contractor, pertaining to the Term Contract, may be inspected by the Department upon fifteen (15) calendar days' notice, during normal working hours and in accordance with the Contractor's facility access procedures where facility access is required. Release statements from its subcontractors, partners, or agents are not required for the Department or its designee to conduct compliance and performance audits on any of the Contractor's contracts relating to this Term Contract.

## **SECTION 16. CONFIDENTIALITY.**

The Contractor shall not divulge to third parties any confidential information obtained by the Contractor or its employees, subcontractors, or agents in the course of performing Term Contract work, including security procedures, business operations information, or commercial proprietary information in the possession of the Customer or State. The Contractor will not be required to keep confidential information or material that is publicly available through no fault of the Contractor, material that the Contractor developed independently without relying on the Customer's or State's confidential information, or material that is otherwise obtainable under State law as a public record. To ensure confidentiality, the Contractor shall take appropriate steps as to its employees, subcontractors, and agents.

## **SECTION 17. SUPPLIER DEVELOPMENT.**

**17.1 Office of Supplier Development.** The State of Florida supports its business community by creating opportunities for business enterprises to participate in procurements and contracts. The Department encourages supplier development through certain certifications and provides advocacy, outreach, and networking through regional business events. For additional information, please contact the Office of Supplier Development (OSD) at [OSDHelp@dms.fl.gov](mailto:OSDHelp@dms.fl.gov).

**17.2 Reporting Certified Business Enterprises.** Upon request, the Contractor will report to the Department its spend with business enterprises certified by the OSD. These reports must include the time period covered, the name and vendor identification information of each business enterprise utilized during the period, commodities and contractual services provided by the business enterprise, and the amount paid to the business enterprise on behalf of each agency purchasing under the Term Contract.

Resume Self-Certification Form**

Contractor’s candidates shall complete this Resume Self-Certification Form. Completed Resume Self-Certification Forms shall be submitted within the Contractor’s response to Customer’s Request for Quotes.

“I the undersigned do hereby certify, under the penalty of perjury, that information in my resume submitted for consideration of the State of Florida contract position is true, correct, complete, and made in good faith to the best of my knowledge and belief. If an omission, falsification, misstatement, or misrepresentation has been made regarding my education, work ability, experience, employment history, and/or fitness for employment as a contractor, I may be disqualified as a contractor, and the matter will be reported to appropriate agency or law enforcement personnel. I understand that there may be civil and/or criminal penalties for misrepresenting pertinent information in connection with contract positions, including, but not limited to, penalties available under sections 287.133 or 817.566, Florida Statutes. I further understand that if I am not a United States citizen, violation cases may be reported to the US Department of Homeland Security for potential deportation.”

“In addition, I the undersigned do hereby consent to the release of my information by employers, educational institutions, law enforcement agencies, and other individuals and organizations to investigators and other authorized agents of Florida for verification and investigation purposes. I understand that any documents submitted to procure a contract(s) with the State of Florida, including resumes, are public records.”

## **Contractor Performance Survey Rating Definitions**

### **Excellent (3)**

- There are no quality problems.
- There are no cost issues.
- There are no delays.
- Responses to inquiries, technical, service, and administrative issues are effective and responsive.

### **Acceptable (2)**

- Non-conformances do not impact achievement of contract requirements.
- Cost issues do not impact achievement of contract requirements.
- Delays do not impact achievement of contract requirements.
- Response to inquiries, technical, service, and administrative issues is usually effective and responsive.

### **Poor (1)**

- Non-conformances are compromising the achievement of contract requirements.
- Cost issues are compromising performance of contract requirements.
- Delays are compromising the achievement of contract requirements.
- Response to inquiries, technical, service, and administrative issues is not effective and responsive.

---

**Scoring:** Ratings will be averaged together and then rounded to achieve the Overall Contractor Performance Rating.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: APPLICATIONS DEVELOPMENT****Job Title: Director, Systems and Programming****Job#: 1200****General Characteristics**

Responsible for the full systems development life cycle management of projects/programs. Provides direction for technical and business resources. Actively participates in long-range strategy planning and manages policy development to address complex business issues, provides leadership to cross-functional teams. Serves as the primary point of contact from project/program inception to delivery. Defines and develops project management infrastructure, manages a methodology driven quality plan, monitors and controls the quality of the deliverable, as well as manages the project completion process through customer acceptance. Works with business unit managers and forms alliances on projects, operational decisions, scheduling requirements/conflicts and vendor contract clarification.

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 10 years of IT and business/industry work experience, with at least 3 years of leadership experience in managing multiple, large, cross-functional teams or projects, and influencing senior level management and key stakeholders. Requires advanced technical and business knowledge in software development life cycle, quality assurance, project management and other related disciplines/processes.

**Breadth:**

Senior level management in systems analysis and applications development. Has overall responsibility for department decisions and management. Provides strategic direction, coaches and mentors more junior management staff and/or senior technical staff. Accountable for IT functional/departmental results. Frequently reports to a Chief Information Officer or Chief Technology Officer.

## **Exhibit J**

### **JOB FAMILY DESCRIPTIONS**

#### **JOB FAMILY: APPLICATIONS DEVELOPMENT**

**Job Title: Manager, Applications Development**

**Job#: 1210**

##### **General Characteristics**

Coordinates systems analysis and applications development activities through direct and indirect staff. Directs development teams in the areas of scheduling, technical direction, future planning and standard development practices. Participates in budgeting and capital equipment processes and quality improvement activities for the development organization. Meets scheduled milestones to ensure project/ program objectives are met in a timely manner and has an in-depth knowledge of the principles, theories, practices and techniques for managing the activities related to planning, managing and implementing systems analysis and applications development projects and programs.

##### **Dimensions**

###### **Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

###### **Experience:**

A minimum of 7 years of IT and business work experience including managing team(s) in systems analysis and/or programming functions.

###### **Breadth:**

Middle level management in systems analysis and programming functions. Typically manages and mentors supervisors, project leads and/or technical staff. Works under general direction of senior level management. Frequently reports to a Director, Systems and Programming, Departmental IT Executive or Operating Unit IT Executive.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: APPLICATIONS DEVELOPMENT****Job Title: Applications Architect****Job#: 1220****General Characteristics**

Provides design recommendations based on long-term IT organization strategy. Develops enterprise level application and custom integration solutions including major enhancements and interfaces, functions and features. Uses a variety of platforms to provide automated systems applications to customers. Provides expertise regarding the integration of applications across the business. Determines specifications, then plans, designs, and develops the most complex and business critical software solutions, utilizing appropriate software engineering processes—either individually or in concert with project team. Will assist in the most difficult support problems.

Develops programming and development standards and procedures as well as programming architectures for code reuse. Has in-depth knowledge of state-of-the art programming languages and object-oriented approaches in designing, coding, testing and debugging programs. Understands and consistently applies the attributes and processes of current application development methodologies. Researches and maintains knowledge in emerging technologies and possible application to the business. Viewed both internally and externally as a technical expert and critical technical resource across multiple disciplines. Acts as an internal consultant, advocate, mentor and change agent.

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of experience in multiple IT areas and 2–3 years of relevant architecture experience. Requires advanced to expert level knowledge and understanding of architecture, applicationssystems design and integration.

**Complexity:**

Expert/lead technical role. Typically works on multiple IT projects as a project leader. Works on projects/issues of high complexity that require in-depth knowledge across multiple technical areas and business segments. Coaches and mentors more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: APPLICATIONS DEVELOPMENT****Job Title: Enterprise Application Integration (EAI) Engineer****Job#: 1230****General Characteristics**

Responsible for developing and deploying integrated solutions aimed at modernizing, consolidating and coordinating the independently designed applications within and across the enterprises. Determines how existing applications, legacy systems, databases, Web interfaces and/or hardware logic, which may be currently operating on multiple platforms, work together to meet the new and emerging enterprise requirements. Develops methods to efficiently reuse existing components. Works with users to gather business requirements, performs database analysis, codes and tests middleware routines to ensure successful and seamless communication among the various IT systems and applications components. Participates in component and data architecture design, software product evaluation and buy vs. build recommendations. Possesses skills and knowledge of Enterprise Application Integration (EAI) methodologies and processes such as object-oriented programming, distributed, cross-platform program communication using message brokers with Common Object Request Broker Architecture, enterprise-wide content and data distribution using common databases and data standards implemented with the Extensible Markup Language (XML), middleware applications and message queuing approaches.

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 5 years of programming/systems analysis experience with emphasis in applications and systems architectural design and development, database and middleware technologies.

**Complexity:**

Advanced professional level role. Works on projects that may span a broad range of systems and enterprise-wide complex components. Requires in-depth knowledge across multiple technical environments and possesses increased level of business knowledge. Works on major projects providing subject matter expertise and technical direction to more junior technical staff.

## **Exhibit J**

### **JOB FAMILY DESCRIPTIONS**

#### **JOB FAMILY: APPLICATIONS DEVELOPMENT**

**Job Title: Systems Analyst**

**Job#: 1240**

##### **General Characteristics**

Responsible for the design and development of IT systems. Develops design and functional specifications, produces deliverables related to the project(s) assigned and assists in post implementation support and system enhancements. Responsible for selecting appropriate C.A.S.E. tools to develop systems and software. Responsible for gathering, compiling and synthesizing information with regard to technology processes or systems. Possesses experience in minicomputer or client/server environments including the implementation and support of resource planning, sales automation, marketing, financial and distribution systems.

##### **Dimensions**

###### **Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

###### **Experience:**

A minimum of 3 years of systems analysis/programming experience.

###### **Complexity:**

Intermediate professional level role. Develops systems solutions requiring analysis and research. Works on small to large, complex projects that require increased skill in multiple technical environments and possesses knowledge in a specific business area. Works on one or more projects as a project team member or sometimes as a project lead. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: APPLICATIONS DEVELOPMENT****Job Title: Applications Development Analyst****Job#: 1250****General Characteristics**

Works closely with customers, business analysts, and team members to understand business requirements that drive the analysis and design of quality technical solutions. These solutions must be aligned with business and IT strategies and comply with the organization's architectural standards. Involved in the full systems life cycle and is responsible for designing, coding, testing, implementing, maintaining and supporting applications software that is delivered on time and within budget. Makes recommendations towards the development of new code or reuse of existing code. Responsibilities may also include participation in component and data architecture design, performance monitoring, product evaluation and buy vs. build recommendations. Has experience in systems analysis, design and a solid understanding of development, quality assurance and integration methodologies.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems or other related field. Or equivalent work experience.

**Experience:**

A minimum of 2 years of programming/systems analysis experience.

**Complexity:**

Intermediate professional level role. Develops solutions requiring analysis and research. Works on small to large, complex projects that require increased skill in multiple technical environments and possesses knowledge in a specific business area. Works on one or more projects as a project team member or occasionally as a project lead. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: DATA STRATEGY AND MANAGEMENT****Job Title: Database Manager****Job#: 1400****General Characteristics**

Responsible for ensuring the design, maintenance and implementation of database management systems, which provides the organization with orderly methods of data storage and controlled access to data. Possesses the technical expertise to provide leadership and manage the design and development of the organization's database environment. Ensures the design and installation of database management system applications and the establishment of the appropriate linkages to existing database applications and to other data processing systems. Ensures the development of a backup and recovery scheme for the database environment and the development and implementation of disaster recovery and business continuance procedures.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of experience in development, implementation and maintenance of database management systems across multiple platforms. Requires prior management, supervisory or team leader experience including project management experience.

**Breadth:**

Middle level management in database management and administration functions. Works under general direction of senior level management. Typically manages and mentors supervisors, project leaders and/or technical staff. Frequently reports to a Chief Technology Officer, IT Chief Operating Officer, Director, Systems and Programming, Operating Unit IT Executive or Departmental IT Executive.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: DATA STRATEGY AND MANAGEMENT****Job Title: Data Architect****Job#: 1410****General Characteristics**

Responsible for enterprise-wide data design, balancing optimization of data access with batch loading and resource utilization factors. Knowledgeable in most aspects of designing and constructing data architectures, operational data stores, and data marts. Focuses on enterprise-wide data modeling and database design. Defines data architecture standards, policies and procedures for the organization, structure, attributes and nomenclature of data elements, and applies accepted data content standards to technology projects. Responsible for business analysis, data acquisition and access analysis and design, Database Management Systems optimization, recovery strategy and load strategy design and implementation.

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of experience with large and complex database management systems.

**Complexity:**

Expert/lead technical role. Defines and plans database architectures for enterprise systems. Works on multiple projects as a project leader or as the subject matter expert. Works on projects/issues of high complexity that require in-depth knowledge across multiple technical areas and business segments. Coaches and mentors more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: DATA STRATEGY AND MANAGEMENT****Job Title: Data Modeler****Job#: 1420****General Characteristics**

Accountable for analyzing and developing complex logical database designs, logical data models and relational data definitions in support of corporate and customer information systems requirements. Understands the methodologies and technologies that depict the flow of data within and between technology systems and business functions/operations. Responsible for the identification and resolution of information flow, content issues and the transformation of business requirements into logical data models. This position identifies opportunities to reduce data redundancy, trends in data uses and single sources of data.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 4 years of IT work experience in data modeling, data analysis, relational DBMS design and support and relevant computing environments.

**Complexity:**

Intermediate professional level role. Designs logical data models of low to medium complexity. Works on small to large, complex projects that require increased skill in multiple technical environments. Works on one or more projects as a project team member or sometimes as a project lead. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: DATA STRATEGY AND MANAGEMENT****Job Title: Database Analyst****Job#: 1430****General Characteristics**

Responsible for designing, modeling, developing and supporting Database Management Systems (DBMS). Analyzes data requirements, application and processing architectures, data dictionaries, and database schema(s), and then designs, develops, amends, optimizes, and certifies database schema design to meet system(s) requirements. Gathers, analyzes, and normalizes relevant information related to, and from business processes, functions, and operations to evaluate data credibility and determine relevance and meaning. Develops database and warehousing designs across multiple platforms and computing environments. Develops an overall data architecture that supports the information needs of the business in a flexible but secure environment.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of IT work experience in DBA, DBMS design and support and relevant computing environments.

**Complexity:**

Intermediate professional level role. Designs and supports DBMS of low to medium complexity. Works on one or more projects as a project team member or sometimes as a project leader. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: DATA STRATEGY AND MANAGEMENT****Job Title: Database Administrator****Job#: 1440****General Characteristics**

Manages and maintains all production and non-production databases. Responsible for standards and design of physical data storage, maintenance, access and security administration. Performs backup and recovery on Database Management Systems, configures database parameters, and prototype designs against logical data models, defines data repository requirements, data dictionaries and warehousing requirements. This position optimizes database access and allocates/re-allocates database resources for optimum configuration, database performance and cost.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of experience working with various database management systems in database design, testing, implementation, maintenance and administration in a multiple platform environment.

**Complexity:**

Intermediate professional level role. Supports multiple services and multiple databases of medium to high complexity (complexity defined by database size, technology used, systems feeds and interfaces) with multiple concurrent users, ensuring control, integrity and accessibility of data. Works on multiple projects as a project leader or sometimes as a project advisor. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: QUALITY ASSURANCE****Job Title: Manager, Quality Assurance****Job#: 1600****General Characteristics**

Responsible for managing the definition, implementation and integration of quality principles and quality processes into the design and development of software and IT processes. Ensures that quality methods and procedures are executed. Ensures that products, applications, and systems are in compliance with established quality standards, and meet customer requirements. Analyzes best-in-class processes, establishes customer satisfaction metrics, understands the interaction and relationship of business operations and operating systems and network processes. Champions the application of quality principles in business and IT processes through training, meeting and team facilitation, communication programs and team building activities. Responsible for researching, developing and implementing testing methods and procedures. Ensures that products meet the highest quality standards. Monitors and reports on defects.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of systems development and business experience. Experience in developing and conducting test processes for multiple types of systems, client users and/or units across an organization. Requires prior management, supervisory or team leader experience.

**Breadth:**

Middle level management in quality assurance functions. Works under general direction of senior level management. Typically manages and mentors supervisors, project leaders and/or technical staff. Acts as a project leader and a subject matter expert on multiple and complex projects. Frequently reports to a IT Chief Operating Officer, Operating Unit IT Executive, Departmental IT Executive or Director, Systems and Programming.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: QUALITY ASSURANCE****Job Title: Quality Engineering Consultant****Job#: 1610****General Characteristics**

Responsible for establishing and implementing quality assurance and compliance processes for the IT organization. Works closely with IT leaders to develop and implement an overall quality maturity roadmap and plan for each IT functional area. Works with development, testing and production teams to develop, publish and implement software quality assurance plans. Reviews progress toward the plan regularly with IT leaders, technical teams and customers to make modifications as necessary. Establishes internal IT service quality control standards, policies and procedures. Monitors, evaluates, manages and executes audit processes to ensure compliance. Coordinates and facilitates quality assurance activities across projects with project managers. Provides guidance and subject matter expertise to IT teams on QA methodologies and processes, educates them on their responsibilities/accountabilities for the purpose of achieving on-time and quality deliverables. Makes recommendations and directs improvements to the software development lifecycle process. Documents non-compliance to policies, process and standards and assists in their resolution. Analyzes and identifies trends in IT performance metrics. Designs, monitors and analyzes performance metrics program for quality improvement initiatives. Conducts audits and analyzes findings to develop appropriate corrective action recommendations. Provides training on established processes and policies. Needed skills and knowledge include systems lifecycle development, project management, quality management and improvement methodologies and standards such as Total Quality Management (TQM), Six Sigma and the Software Engineering Institute—Capability Maturity Model (SEI-CMM).

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, Business Administration, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of IT and business experience, with at least 5 years in Quality Assurance, 2 to 3 years of audit or assessment or other relevant experience.

**Complexity:**

Expert/lead technical role. Provides strategic direction, guidance and integrated solutions to enterprise-wide quality engineering initiatives. Works on multiple projects as a project leader or as the subject matter expert. Works on projects/issues of high complexity that require in-depth knowledge across multiple technical areas and business segments. Coaches and mentors more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: QUALITY ASSURANCE****Job Title: Quality Assurance Analyst****Job#: 1620****General Characteristics**

Responsible for developing and executing formal test plans to ensure the delivery of quality software applications. Involved in test planning, writing test cases/scripts, test case automation and test execution. Defines and tracks quality assurance metrics such as defects, defect counts, test results and test status. Collects and analyzes data for software process evaluation and improvements, and integrates them into business processes to address the business needs. Documents all problems and assists in their resolution. Delivers quality process training to technical staff and acts as an internal quality consultant to advise or influence business or technical partners. Performs quality audits across the various IT functions to ensure quality standards, procedures and methodologies are being followed.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or similar. Or equivalent work experience.

**Experience:**

A minimum of 3 years of systems development, testing and/or business experience.

**Complexity:**

Intermediate professional level role. Works on projects of moderate to high complexity within one or more development environments. Works on multiple programs/systems as a project team member. Considered a subject matter expert for a single program/system. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: TECHNOLOGY RESEARCH****Job Title: Manager, Technology Research****Job#: 1800****General Characteristics**

Understands the strategic direction of enterprise and the supporting IT systems and architectures. Maintains knowledge of emerging technological trends and utilizes this knowledge to educate both IT and the business on opportunities to build better IT solutions that support and drive business decisions. Assists in the definition of the architecture and technology needs of the organization based on new and emerging technologies, and establishes priorities and strategies consistent with business goals and economic viability. Establishes foundation architecture for organization to standardize on hardware and software usage. Serves as a consultant and advisor to senior IT leadership on advanced technologies and evaluates the business impact through cost/benefit analysis. Recommends and incorporates technology with long-term business plans. Transfers knowledge of key learnings throughout the enterprise, and establishes and communicates strategic and technological plans.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of IT work experience including managing team(s) responsible for systems development and architecture functions.

**Breadth:**

Middle level management in technology research area. Works under general direction from senior level management. Works on multiple programs as a project team leader and a subject matter expert. Manages and mentors supervisors, project leaders and/or technical staff. Frequently reports to a Chief Technology Officer, Operating Unit IT Executive or Departmental IT Executive.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: TECHNOLOGY RESEARCH****Job Title: Technology Research Analyst****Job#: 1810****General Characteristics**

Maintains a strong understanding of the enterprise's IT systems and architectures. Assists in the analysis of the requirements for the enterprise and applying emerging technologies to support long-term business objectives. Responsible for researching, collecting, and disseminating information on emerging technologies and key learnings throughout the enterprise. Researches and recommends changes to foundation architecture. Supports research projects to identify and evaluate emerging technologies. Interfaces with users and staff to evaluate possible implementation of the new technology in the enterprise, consistent with the goal of improving existing systems and technologies and in meeting the needs of the business. Analyzes and researches process of deployment and assists in this process.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of IT work experience in architecture design, systems analysis and development.

**Complexity:**

Intermediate professional level role. Works on projects of moderate to high complexity across multiple computing environments. Works on multiple projects as a project team member. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: CLIENT TECHNOLOGIES****Job Title: Manager, Client Technologies****Job#: 2000****General Characteristics**

Responsible for providing IT users with desktop equipment and support, determining user needs and incorporating them into the design and overall plan for desktop support. The range of accountabilities minimally covers hardware and software planning, vendor selection, acquisition, Tier 2 problem resolution, set-up, integration, testing and installation. Works with organizations supported to establish performance metrics to ensure needs are being properly met. Monitors and analyzes performance metrics, sharing results with users. Organizes and coordinates the activities associated with installation, deployment and upgrade of software, hardware and network facilities as it relates to the desktop environment. Desktop applications may include productivity tools, email, and applications that are used by groups without programming customization. Evaluates and provides techniques for increasing user desktop productivity.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of IT work experience including managing team(s) responsible for desktop support function. Experience in managing support operation in a 24x7, multi-site environment. Experience with budgeting, expense management and contract management.

**Breadth:**

Middle level management in PC/desktop support and maintenance functions. Works under general direction of senior level management. Typically manages and mentors supervisors, project leaders and/or technical staff. Frequently reports to an IT Chief Operating Officer, Operating Unit IT Executive or Departmental IT Executive.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: CLIENT TECHNOLOGIES****Job Title: Client Technologies Analyst****Job#: 2010****General Characteristics**

Configures, installs, monitors and maintains IT users' desktop software and hardware; supports mobile workforce. Provides consultation to IT users for all aspects of end-user computing and desktop-based LAN systems software. Provides technical support and guidance through Tier 2 support and works with vendors to resolve Tier 3 issues. Responsible for documenting solutions to problems and developing end-user guidelines. May provide on-site training to users. Evaluates, maintains, modifies (e.g., creates macros, templates) and documents desktop application packages, participates in the testing and evaluation of new desktop packages and implements prototypes. Consults with and makes recommendations to IT users on selection of hardware and software products to address business requirements.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of IT work experience in supporting desktop software and hardware products and problem solving/troubleshooting.

**Complexity:**

Intermediate professional level role. Provides maintenance and support for moderately complex to complex client products. Works on one or more projects concurrently as a project team member. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: CLIENT TECHNOLOGIES****Job Title: Client Technologies Technician****Job#: 2020****General Characteristics**

Configures and installs software for IT users' desktops and laptops. Involved in the installation and rollout of new software packages, upgrades and new desktop hardware. Maintains desktop software and hardware; supports mobile workforce. Provides Tier 2 support to IT users for basic software and hardware of end-user computing and desktop-based LAN systems. Troubleshoots problems using scripts and checklists as guides. Escalates to Tier 3 support when necessary. Documents problems and resolutions. May perform end-user training. Strong customer service skills are important in this position. Participates in the testing and evaluation of new desktop packages and implements prototypes.

**Dimensions****Education:**

Associate's or Bachelor's Degree, or technical institute degree/certificate. Or equivalent work experience.

**Experience:**

0 to 1 year of IT work experience with demonstrated working knowledge of the basic hardware and software products and problem solving/troubleshooting skills.

**Complexity:**

Learner/entry level role. Provides maintenance and support for basic client products, peripherals, network and physical moves. Works on one project at a time as a project team member. Functions, somewhat independently, under direction of senior technician or supervisor/manager. Generally follows documented procedures and checklists.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: CUSTOMER SUPPORT****Job Title: Manager, Customer Support****Job#: 2200****General Characteristics**

Defines service levels, service agreements and manages the help desk operation. Establishes processes to identify, track, escalate, resolve and report customer problems. Jointly, with the customer, defines standards and measures for quality and customer satisfaction requirements. Analyzes the technical performance and reliability of products, systems and services against identified industry standards to ensure customer satisfaction. Responsible for developing and implementing technical service restorations and troubleshooting procedures for identifying, testing and diagnosing computer system and peripheral equipment faults.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of IT work experience including managing team(s) responsible for desktop support, customer service and/or production support in multi-platform environments.

**Breadth:**

Middle level management in help desk/customer support functions. Works under general direction of senior level management. Typically manages and mentors supervisors, project leaders and/or technical staff. Frequently reports to an IT Chief Operating Officer, Operating Unit IT Executive or Departmental IT Executive.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: CUSTOMER SUPPORT****Job Title: Customer Support Analyst****Job#: 2210****General Characteristics**

Responsible for Tier 1 and 2 software and hardware support. Provides technical advice, guidance and informal training to customers using hardware and software programs. Troubleshoots and restores routine technical service and equipment problems by analyzing, identifying and diagnosing faults and symptoms using established processes and procedures. Performs root cause analysis and develops checklists for typical problems. Recommends procedures and controls for problem prevention. Maintains knowledge database and call tracking database to enhance quality of problem resolutions. Works in a team setting, sharing information and assisting others with calls.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 2 years of IT work experience with demonstrated working knowledge of basic to moderately complex hardware and software products and problem solving/troubleshooting skills.

**Complexity:**

Intermediate professional level role. Provides Tier 1 and Tier 2 support of medium to high complexity. Works in a team as a team member. May coach more junior technical staff.

### **JOB FAMILY DESCRIPTIONS**

#### **JOB FAMILY: CUSTOMER SUPPORT**

**Job Title: Customer Support Technician**

**Job#: 2220**

##### **General Characteristics**

Responsible for Tier I software and hardware support. Diagnoses and resolves problems using documented procedures and checklists in the performance of most responsibilities. Enters call data into a tracking system. Escalates problems to higher level technical support professionals when necessary. Assists in the resolution of application, hardware and software problems.

##### **Dimensions**

###### **Education:**

Associate's or Bachelor's Degree, or technical institute degree/certificate in Computer Science, Information Systems, or other related field. Or equivalent work experience.

###### **Experience:**

0 to 1 year of IT work experience in computer systems or support with demonstrated working knowledge of basic hardware and software products and problem solving/troubleshooting skills.

###### **Complexity:**

Learner/entry level role. Provides Tier 1 support of low to medium complexity. Functions, somewhat independently, under general direction of more senior customer service representatives, supervisors or managers. Generally follows documented procedures and checklists.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: NETWORK MANAGEMENT****Job Title: Director, Network Operations****Job#: 2400****General Characteristics**

Responsible for developing business and technology standards and best practices for department. Overall responsibility for all network operations work, including the integration of new network technologies such as wireless. Develops enterprise service levels for data and voice networking equipment and for both in-house and third party software applications. Oversees development of procedures and processes for enterprise network operations. Responsible for ensuring that the enterprise has the capability to support new technologies and maintain high levels of network performance and reliability.

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 10 years of IT and business/industry work experience, with at least 3 years of leadership experience in managing multiple, large, cross-functional teams or projects, and influencing senior level management and key stakeholders. Experience in areas such as data communications software and hardware, network administration, support and maintenance.

**Breadth:**

Senior level management in network operations and management functions. Has overall responsibility for department decisions and management. Provides strategic direction, coaches and mentors more junior management staff. Accountable for IT functional/departmental results. Frequently reports to a Chief Information Officer or IT Chief Operating Officer.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: NETWORK MANAGEMENT****Job Title: Manager, Network Operations****Job#: 2410****General Characteristics**

Responsible for network operations and service levels for data and voice networking equipment and software including mainframe equipment, PBX, mid-range and network processing devices. Develops and implements standards, procedures, and processes for the network operations group. Plans and manages the support of new technologies (including wireless), network performance, and reliability. Defines and negotiates service level agreements. Oversees and coordinates the daily activities of the network operations center. Plans for human resources, equipment arrangements, electrical power and cable requirements for telecommunications and information processing equipment.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of IT work experience including managing team(s) responsible for technical service for hardware/software engineering, support and maintenance in LAN/WAN and multi-platform environment.

**Breadth:**

Middle level management in network operations functions. Works under general direction of senior level management. Typically manages and mentors supervisors, project leaders and/or technical staff. Frequently reports to an IT Chief Operating Officer, Director, Network Operations or Operating Unit IT Executive.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: NETWORK MANAGEMENT****Job Title: Network Architect****Job#: 2420****General Characteristics**

Responsible for high-level network planning, design, and optimization. Develops strategies and direction for network systems solutions using current and emerging technologies (including wireless). Translates business requirements into network or process designs. Plans and recommends network hardware, systems management software and architecture. Approves and modifies network design and architecture to ensure compliance. Configures and maintains routers, switches, and hubs for the network systems (including wireless). Evaluates and recommends new products, maintains knowledge of emerging technologies for application to the enterprise. Monitors network performance, ensures capacity planning is performed, and is proactive in assessing and making recommendations for improvement. Performs troubleshooting procedures and designs resolution scripts. May take on role of Project Leader for special enterprise-wide assignments.

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of IT work experience in infrastructure/network environments performing network planning, architecture design, engineering (hardware and software) and optimization.

**Complexity:**

Expert/lead technical role. Defines network architectures and design for the enterprise. Works on multiple projects as a project leader or as the subject matter expert. Works on projects/issues of high complexity that require in-depth knowledge across multiple technical areas and business segments. Coaches and mentors more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: NETWORK MANAGEMENT****Job Title: Network Engineer****Job#: 2430****General Characteristics**

Assists in the planning, forecasting, implementation, and identification of resource requirements for network systems (including wireless) of moderate complexity. Participates in network planning, network architecture design and engineering. Integrates and schematically depicts communication architectures, topologies, hardware, software, transmission and signaling links and protocols into complete network configurations. Evaluates new products, performs network problem resolution and assists in the development and documentation of technical standards and interface applications. Monitors protocol compatibility, performs system tuning and makes recommendations for improvement.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of IT work experience in infrastructure/network environments performing network engineering (hardware and/or software), design, planning and implementation.

**Complexity:**

Intermediate professional level role. Works on projects/ systems/issues of medium to high complexity surrounding network planning, configuration and optimization. Works on one or more projects as a project team member, occasionally as a project team lead. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: NETWORK MANAGEMENT****Job Title: Network Analyst****Job#: 2440****General Characteristics**

Responsible for designing, installing and troubleshooting network systems (including wireless) to meet the functional objectives of the business. Involved with the configuration and maintenance of physical and logical network components. Assists in the design of the network architecture, designs the network infrastructure, and plans and designs LAN/WAN/wireless solutions. Performs capacity and resource planning, assessing network risks and contingency planning. Responsible for the implementation and maintenance of network management software; researching, analyzing and implementing software patches or hardware changes to fix any network deficiencies. Provides Tier 2 support. Involved in the evaluation of new products and services, may manage vendor service level agreements.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of IT work experience in infrastructure/network environments in network design, implementation, administration and support.

**Complexity:**

Intermediate professional level role. Works on projects/systems/issues of medium to high complexity. Provides support in designing, implementing, supporting and maintaining network systems. Works on one or more projects as a project team member, occasionally as a project leader. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: NETWORK MANAGEMENT****Job Title: Network Administrator****Job#: 2450****General Characteristics**

Monitors, troubleshoots and maintains network (LAN, WAN and wireless) multiplexers, hubs and routers, and uses remote monitoring tools. The duties of this position can be broad and may include such tasks as installing new workstations and other devices, adding and removing individuals from the list of authorized users, archiving files, overseeing password protection and other security measures, monitoring usage of shared resources, and handling malfunctioning equipment. Selects, develops, integrates and implements network management applications for Internet components.

**Dimensions****Education:**

Bachelor's Degree or technical institute degree/certificate in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of IT work experience in infrastructure/network environments in network operations, support, maintenance and administration.

**Complexity:**

Intermediate professional level role. Works on projects/systems/issues of medium to high complexity. Provides daily operations support, maintenance and administration for network systems. Works on one or more projects as a project team member, occasionally as a project leader. May coach more junior technical staff.

## Exhibit J

### JOB FAMILY DESCRIPTIONS

#### JOB FAMILY: NETWORK MANAGEMENT

**Job Title: Network Technician**

**Job#: 2460**

##### **General Characteristics**

Provides daily operations support and maintenance for network systems (including wireless). Proactively monitors networks to provide stable, dependable network services across multiple platforms. Configures and troubleshoots computer networks. Maintains LAN/WAN/wireless operations by working with network facility and hardware/software vendors to ensure timely problem resolution. Maintains and utilizes network management applications to identify network faults, to ensure the provision of data or other telecommunications access to customers, and the movement of information from one location to the other.

##### **Dimensions**

##### **Education:**

Associate's or Bachelor's Degree, or technical institute degree/certificate in Computer Science, Information Systems, or other related field. Or equivalent work experience.

##### **Experience:**

0 to 1 year of IT work experience in infrastructure/network environments.

##### **Complexity:**

Learner/entry level role. Works on projects/systems/issues of small to medium complexity. Provides daily operations support and maintenance for network systems. Works on one project at a time as a project team member. Functions, somewhat independently, under general direction of senior technicians/engineers, supervisors or managers. Generally follows documented procedures and checklists.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: INTERNET PLANNING, ENGINEERING AND OPERATIONS****Job Title: Manager, Internet Operations****Job#: 2600****General Characteristics**

Responsible for the development, release, and maintenance of Internet, Intranet, and Extranet systems and services supporting a wide range of content. Works with key business leaders and other IT groups to prioritize projects, maximize the effectiveness of Internet technologies in supporting the business strategy, improving communications, and enabling greater access to information. Ensures the coordination of all Internet and Web development activities, ensuring integration with other technologies utilized in the enterprise and continuity across applications. Develops standards for Internet and Web project initiation, design, development, and support. Key challenge of this position is in managing and prioritizing the numerous requests by the business, and influencing and coordinating the development of Internet based technologies occurring in areas outside of IT.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of IT and business work experience including managing team(s) responsible for development, implementation and maintenance of systems across multiple platforms. Experience with online relational database management systems, multimedia, Web applications development and testing.

**Breadth:**

Middle level management in Web systems and services operations and management functions. Works under general direction of senior level management. Typically manages and mentors supervisors, project leaders and/or technical staff. Works on multiple, complex projects as a project leader and a subject matter expert. Frequently reports to a Chief Technology Officer, IT Chief Operating Officer, E-Business Executive or Departmental IT Executive.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: INTERNET PLANNING, ENGINEERING AND OPERATIONS****Job Title: Internet/Web Architect****Job#: 2610****General Characteristics**

Responsible for gathering business requirements and translating them into Internet/Web architecture to achieve business objectives. Analyzes assigned specifications, planning, designing, and developing solutions, utilizing appropriate Internet/Intranet/Extranet architecture processes supporting a wide range of content—either individually or in concert with project team members. Provides appropriate documentation for object design decisions, estimating assumptions, applets, and performance metrics—as required by organization architecture process standards, or as assigned. Responsible for minimizing the issues between the client and the server applications and for the overall set-up and design of the Internet and Web server architecture. Impact and complexity of this job increases if organization is utilizing Internet solutions (vs. only Intranet), especially those with significant business impact (e.g., e-business).

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 5 years of IT work experience with demonstrated knowledge in architecture design, software development, database management systems and systems integration in multi-platform environments.

**Complexity:**

Advanced professional level role. Defines Web architectures and design for the enterprise. Works on multiple projects as a project leader or frequently as the subject matter expert. Works on projects/issues of medium to high complexity that require demonstrated knowledge across multiple technical areas and business segments. Coaches and mentors more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: INTERNET PLANNING, ENGINEERING AND OPERATIONS****Job Title: Internet/Web Engineer****Job#: 2620****General Characteristics**

Integrally involved in the development and support of all Internet/Intranet/Extranet sites and supporting systems. Works closely with other IT groups and customers to define the system design and user interface based on customer needs and objectives. Participates in all phases of the development and implementation process, and may act as a project manager on special projects. Ensures the integration of the Web servers and all other supporting systems. Responsible for system tuning, optimization of information/data processing, maintenance and support of the production environment.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 4 years of IT work experience in systems analysis, development and engineering in an online environment.

**Complexity:**

Intermediate professional level role. Develops solutions requiring analysis and research. Works on small to large, complex projects that require increased skill in multiple technical environments and possesses knowledge in a specific business area. Works on one or more projects as a project team member or occasionally as a project leader. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: INTERNET PLANNING, ENGINEERING AND OPERATIONS****Job Title: Web Applications Programmer****Job#: 2630****General Characteristics**

Develops, maintains, and supports applications for the organization's Internet/Intranet sites. Gathers and analyzes requirements. Programs all or selected components of Web applications. Documents components and applications. Develops automation techniques to enable end-user content publishing; programs, tests and implements mapped graphic images, forms and HTML pages; handles client browser support inquiries; maintains links to external sites and accuracy on internal links while ensuring up-to-date information. Researches, evaluates and recommends new Internet tools and applications for use in assigned responsibilities. The senior level Web Applications Programmer has experience in a variety of the more difficult Web tools and languages.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of IT work experience in software development, installation and modification in an online environment.

**Complexity:**

Intermediate professional level role. Develops solutions requiring analysis and research. Works on small to large, complex projects that require increased skill in multiple technical environments and possesses knowledge in a specific business area. Works on one or more projects as a project team member or occasionally as a project leader. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: INTERNET PLANNING, ENGINEERING AND OPERATIONS****Job Title: Web Designer****Job#: 2640****General Characteristics**

Responsible for the design, development and creation of user-centered designs for Web sites. Responsibilities include human factors engineering, heuristic evaluations and usability testing for Web and client based applications as well as metrics setting and monitoring for assessing the usability of the Web application. Works to improve the usability, usefulness, and desirability of Web sites in collaboration with Graphic Designers, Product Managers, Engineering Staff and other Web Designers. Must be able to perform usability tests, provide design prototypes and provide ad hoc user interface consulting.

Responsible for requirements gathering and articulation of user interface issues—including development of page/site prototypes. Must be knowledgeable of user-centered design methodology, user scenarios, usability testing, storyboarding, paper and interactive prototypes.

Must have demonstrated skills in graphic applications, HTML development tools and other applicable authoring tools, Web production, front-end development using programming and scripting languages. Must be able to integrate design into program rules and system architecture and create innovative approaches to improving the end-user experience. Must be familiar with platform/browser compatibility and basic usability issues.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, Graphic Design, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of combined IT and graphic design experience. Able to understand HTML and strong working knowledge of Web generators and photographic libraries. Possesses a portfolio of Web sites or solutions.

**Complexity:**

Intermediate professional level role. Works on moderately complex, to complex projects that require a solid understanding of Web design and layout. Works on multiple projects as a team member and sometimes as a project leader. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: INTERNET PLANNING, ENGINEERING AND OPERATIONS****Job Title: Webmaster****Job#: 2650****General Characteristics**

Accountable for the design, upgrading, enhancement, maintenance, availability and effectiveness of technical functionality and content for one or more Web sites of the enterprise. Coordinates the publishing of Web site content, user interface, look/feel and level of specificity to suit a wide range of needs. Responsible for working closely with marketing and systems teams to coordinate content, developing on-going site structure and updates. Knowledge and experience in HTML, including style sheets, templates, complex tables, frames, image maps, CGI programming, applets, animation, multimedia design and delivery, and Web publishing procedures, is essential.

Primary focus is generally on gathering requirements that relate to the organization's business objectives relative to site audiences, and continuous content updates and site upgrades to enhance site hits/visits. Webmaster, in a junior role, would focus more extensively on programming content rather than the technical aspects of this position. Impact and complexity of this job increases if organization is utilizing Internet solutions (vs. only Intranet), especially those having significant business impact (e.g., e-business).

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 4 years of IT work experience. Experience in systems administration, Web graphic design, development and implementation experience using HTML, Perl and CGI languages.

**Complexity:**

Intermediate professional level role. Works on projects/systems/issues of medium to high complexity. Provides design, implementation, maintenance and administration support for Web systems and services. Works on one or more projects as a project team member, occasionally as a project leader. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: INTERNET PLANNING, ENGINEERING AND OPERATIONS****Job Title: Internet/Web Systems Administrator****Job#: 2660****General Characteristics**

Responsible for ensuring the control, integrity, and accessibility of the Internet/Intranet for the enterprise. Responsible for change management procedures regarding the installation and testing of all upgrades and enhancements for the Internet/Intranet infrastructure. Responsible for proper initial installation as well as subsequent installations of updates/patches; preparation of system documentation; proactive, regular checks of system components for errors and application of necessary corrective action; set-up and maintenance of Web servers. Knowledgeable in all levels of Internet/Web security and the associated requirements for their application. Designs, develops and administers firewalls as a means of preventing unauthorized access to enterprise networks. Provides technical support to internal users and external customers; troubleshoots problems and takes corrective action on a timely, effective basis.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of IT work experience with Web-related software and hardware products, and systems administration experience with multi-platform environments.

**Complexity:**

Intermediate professional level role. Works on small to large, moderately complex Web sites. Works on multiple Web sites as a project team member, occasionally as a project leader. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: INTERNET PLANNING, ENGINEERING AND OPERATIONS****Job Title: Web Customer Support Specialist****Job#: 2670****General Characteristics**

Responsible for providing support services to users of Internet and Extranet sites. Provides technical advice and guidance relative to problems involving user interface, browser, hardware and supporting software. Troubleshoots and restores routine technical service and equipment troubles by analyzing, identifying and diagnosing faults and symptoms using established processes and procedures. Maintains a knowledge database and call tracking database to enhance quality of problem resolutions.

Coordinates efforts with the Help Desk to ensure all calls outside the customer environment are effectively resolved. Works in a team setting, sharing information and assisting others with calls. Provides input to Web development team for site improvements based on customer feedback. This job is very similar to an experienced Help Desk professional, with the added responsibility of interfacing directly with external customers to the business. As a result, customer service and technical competencies are very critical, as this may be the only “live” interface a customer has with the business.

**Dimensions****Education:**

Bachelor’s Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years IT work experience in PC or client/server platform, network or systems administration in relevant computing environments.

**Complexity:**

Intermediate professional level role. Works on projects/systems/issues of medium to high complexity. Provides internal and external customer support for Web systems and services. Works on one or more projects as a project team member, occasionally as a project leader. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: OPERATIONS****Job Title: Director, Data Center Operations****Job#: 2800****General Characteristics**

Responsible for the overall enterprise-wide effectiveness and efficiency of data center technology systems and networks and in ensuring high levels of customer satisfaction are maintained. Leads the migration to new technologies, evaluates processing performance relating to machine utilization and reliability, and forecasts financial, physical, and human resource needs to meet established objectives. Oversees and coordinates network/data operations, business continuance and restoration plans that isolate problems and implement pre-planned alternative routes or systems to restore service.

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 10 years of IT and business industry work experience, with at least 3 years of leadership experience in managing multiple, large, cross-functional teams or projects, and influencing senior level management and key stakeholders. Experience in the areas such as network, database administration, computer operations and production support.

**Breadth:**

Senior level management in data center operations and management functions. Has overall responsibility for department decisions and management. Provides strategic direction, coaches and mentors more junior management staff. Accountable for IT functional/departmental results. Frequently reports to a Chief Information Officer or IT Chief Operating Officer.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: OPERATIONS****Job Title: Manager, Computer Operations****Job#: 2810****General Characteristics**

Responsible for the activities in the areas of production, data control, operations, and operations support. Develops and implements standards, procedures and processes for the operations group. Plans and manages the support of new technologies, data center performance and reliability. Defines and negotiates service level agreements. Oversees and coordinates the daily activities of the operations center. Provides input and recommendations regarding business continuance issues and improvements to the operations of systems and processes supported.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 more years of IT work experience including managing team(s) responsible for production and operations support.

**Breadth:**

Middle level management in data center operations. Works under general direction of senior level management. Typically manages and mentors supervisors, project leaders and/or technical staff. Works on multiple, complex projects as a project leader and a subject matter expert. Frequently reports to an IT Chief Operating Officer, Director, Data Center Operations or Operating Unit IT Executive.

### **JOB FAMILY DESCRIPTIONS**

#### **JOB FAMILY: OPERATIONS**

**Job Title: Production Support Analyst**

**Job#: 2860**

##### **General Characteristics**

Manages and controls the processing of programs and peripheral equipment on mainframe and/or distributed computer systems to ensure the highest levels of service and system availability are attained. Establishes production runs, ensuring that appropriate job control language, run documentation and data files are available. Assists in job set-up. Performs problem identification, escalation and resolution. Communicates status of operations to allow for immediate response to service disruptions.

##### **Dimensions**

###### **Education:**

Bachelor's Degree in Computer Science, Information Systems, or a related field. Or equivalent work experience.

###### **Experience:**

A minimum of 3 years of IT work experience in production and operations support.

###### **Complexity:**

Intermediate professional level role. Provides production support on multiple platforms. Works on multiple projects as a team member and may lead projects of moderate complexity. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: TELECOMMUNICATIONS****Job Title: Manager, Telecommunications Operations****Job#: 3000****General Characteristics**

Manages the operations, daily planning, engineering, design, and resource allocation for the enterprise's telecommunications functions. Ensures customer satisfaction through quality standards and measures by evaluating the performance of telecommunications networks and related interfaces. Responsible for strategic telecommunications planning and works with senior IT leadership to coordinate telecommunication plans with those of the business. Develops and implements standards, procedures, and processes for the telecommunications group. Plans and manages the support of new technologies, performance and reliability. Defines and negotiates service level agreements. Oversees and coordinates the daily activities of the operations center. Performs a coordination role with enterprise management, vendors and customers.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of IT work experience including managing team(s) responsible for infrastructure/network/telecommunications operations and support in multi-platform environments.

**Breadth:**

Middle level management in telecommunications operations. Works under general direction of senior level management. Typically manages and mentors supervisors, project leaders and/or technical staff. Works on multiple, complex projects as a project leader and a subject matter expert. Frequently reports to an IT Chief Operating Officer, Operating Unit IT Executive or Departmental IT Executive.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: TELECOMMUNICATIONS****Job Title: Telecommunications Engineer****Job#: 3010****General Characteristics**

Responsible for engineering and/or analytical tasks and activities associated with areas within the telecommunications function (e.g., network design, engineering, implementation, diagnostics or operations/user support). Monitors the operation of telecom network systems. Performs complex tasks relating to telecom network operations, installation, and/or maintenance for local, off-site and/or remote locations.

The scope of responsibility for this position includes, but is not limited to, the configuration, deployment, testing, maintenance, monitoring and trouble-shooting of telecommunications network components to provide a secure, high performance network. Duties also entail quality assurance and testing of transmission mediums and infrastructure components.

Serves as technical specialist/lead on a functional basis, for the resolution of complex network problems. Experience should include: moves, adds and changes, fault isolation and resolution, and end-user support. Requires broad knowledge of telecom systems, dial plans, switching architecture, telephony and wiring.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of IT work experience in telecommunications and multi-platform environments.

**Complexity:**

Intermediate professional level role. Provides technical support and maintenance for existing and new telecommunications services. Works on moderate to complex projects as a team member. May lead team and coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: TELECOMMUNICATIONS****Job Title: Telecommunications Technician****Job#: 3020****General Characteristics**

Under direct supervision, monitors, operates, installs and maintains telecommunications systems and equipment in addition to troubleshooting any type of hardware or software problems to ensure that systems perform in a manner which best meets business needs and objectives. Responsible for the installation, maintenance and repair of telecommunications equipment. Assists in the installation of telecom systems and equipment for new company facilities. Performs telecom network software installations and maintenance of network database for system maintenance and billing support.

Possesses knowledge of data scopes, patch panels, modems and various analog and digital signaling systems. Must demonstrate thorough knowledge of T-1 network architecture and operating procedures. Knowledge of line control techniques and communication access methodology is needed. Must be able to read engineering drawings and terminate cables and grounding systems.

**Dimensions**

Education:

Associate's or Bachelor's Degree, or technical institute degree/certificate in Computer Science, Information Systems or other related field. Or equivalent work experience.

**Experience:**

0 to 1 year of IT work experience with basic understanding of telecommunications and multi-platform environments.

**Complexity:**

Learner/entry level role. Provides technical support and maintenance for existing telecommunications services. Works on low to moderately complex projects as a team member. Functions, relatively independently, under direction of senior professionals, supervisors or managers. Generally follows documented procedures and checklists.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: ELECTRONIC COMMERCE****Job Title: Director, Electronic Commerce****Job#: 3200****General Characteristics**

Responsible for creation, implementation and management of the enterprise's systems in support of business e-commerce. Collaborates with business leadership in the development of an e-commerce strategy and in the prioritization of development work. Must understand business processes. Ensures integration of Internet/Extranet systems architecture with existing enterprise architecture. Develops and implements e-commerce service concepts including: pricing, packaging, product offerings and lifecycle management. Develops site transaction and partnership strategy. Works with appropriate senior management to analyze customer feedback, develop promotional plans, and target marketing for product and service concepts.

Possesses overall project management responsibility for all e-commerce development work. Responsible for the integration of the Web site with Product Development, Customer Service and Sales organizations. Manages content creation, input from other marketing groups and editorial calendar. Identifies and manages technology development partners and outside vendors. Maintains currency of new technology and evaluates opportunities for improvement. May manage a team of product managers and content editors.

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 10 years of IT (including Web/Internet, database applications and data warehousing) and business/industry work experience, with at least 3 years of leadership experience in managing multiple, large, cross-functional teams or project, and influencing senior level management and key stakeholders.

**Breadth:**

Senior level management. Oversees strategic planning and development of e-commerce solutions in partnership with technical and business leadership. Provides technical and e-business leadership for the enterprise. Accountable for enterprise-wide results. Frequently reports to a Chief Information Officer, Chief Technology Officer or E-Business Executive.

### JOB FAMILY DESCRIPTIONS

#### JOB FAMILY: ELECTRONIC COMMERCE

**Job Title: Manager, Electronic Commerce**

**Job#: 3210**

##### **General Characteristics**

Partners with business units to develop creative solutions using e-commerce technology that will enhance the enterprise's competitive advantage. Directs the implementation of e-Commerce services and businesses for the enterprise or specific business units. Responsible for the daily management of e-Commerce activities and staff. Possesses professional experience and knowledge in a variety of net-centric computing architectures and technologies. Possesses an operational knowledge of key business processes and understands the technology either utilized or needed for their operation. Strong Project Management expertise is essential.

##### **Dimensions**

##### **Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

##### **Experience:**

A minimum of 7 years of IT work experience including managing team(s) responsible for Web/Internet, database applications and data warehousing functions.

##### **Breadth:**

Middle level management in the e-commerce function. Works under general direction of senior level management. Typically manages and mentors supervisors, project leaders and/or technical staff. Works on multiple, complex projects as a project leader and a subject matter expert. Frequently reports to an E-Business Executive or Director, Electronic Commerce.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: ELECTRONIC COMMERCE****Job Title: Electronic Commerce Analyst****Job#: 3220****General Characteristics**

Responsible for the analysis, development, maintenance and support of e-commerce software programs to ensure the needs of the business community are appropriately addressed. Works closely with vendors and trading partners. Duties include the creation and trading of partner profiles, mapping of transactions, establishment of communication links with trading partners and the testing of secure transaction maps and communication links to ensure security, proper identification and capture of required data. Identifies and documents programming requirements for all new transactions. Assists in the development and documentation of policies and procedures for the e-Commerce function.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of IT work experience in software development, installation and maintenance, Web/Internet, database applications and/or data warehousing.

**Complexity:**

Intermediate professional level role. Provides programs development, maintenance and support on multiple platforms for the e-commerce function. Works on multiple projects as a team member and may lead projects of moderate complexity. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: ELECTRONIC COMMERCE****Job Title: EDI Specialist****Job#: 3230****General Characteristics**

Provides technical expertise and support for Electronic Data Interchange (EDI), and other Business-to-Business communications. Analyzes and develops the EDI interface. Participates in systems design and quality assurance activities. Supports the user community and creates and maintains partner relationships with customers and vendors. Responsible for developing EDI mapping specifications and documentation. Duties include testing, implementing and maintaining EDI transactions, developing and maintaining trading partner definitions including relevant translation objects utilizing EDI translation software tools.

Handles communications with trading partners for EDI transaction set-up and ongoing maintenance. Coordinates between trading partners and networks to ensure mapping compliance. Tests and resolves incoming EDI file problems. Develops new business opportunities utilizing EDI.

Resolves technical mapping variations or gaps and first-level troubleshooting issues in production environment. Develops guidelines, checklists, procedures and training documentation. Often involved with a variety of client/server platforms.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years IT or related work experience in e-commerce, network, telecommunications engineering and support in multi-platform environments.

**Complexity:**

Intermediate professional level role. Provides EDI programs development, maintenance and support on multiple platforms for the e-commerce function. Works on multiple projects as a team member and may lead projects of moderate complexity. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS INTELLIGENCE SYSTEMS MANAGEMENT****Job Title: Director, Data Warehouse****Job#: 3400****General Characteristics**

Responsible for the overall architecture, design, development, and maintenance of data warehousing and data mart systems and services for the entire enterprise's business function. Works closely with customers from a strategic perspective to identify and maximize opportunities to utilize data marts and/or data warehouse systems to improve business processes, promote the strategic use of information technology, and enable the work force to use technologies as a competitive tool. Ensures the development of enterprise-wide standards for the Data Warehouse to ensure compatibility and integration of multi-vendor platforms. Responsible for organizational balance and system coherency between front-end desktop/client environment and Data Warehouse back-end processing functions. Provides corporate leadership, vision, and direction for data warehouse systems, in support of the enterprise's business objectives and requirements.

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 10 years of IT and business/industry work experience, with at least 3 years of leadership experience in managing multiple, large, cross-function teams and projects, and influencing senior level management and key stakeholders. Experience in strategic planning, development, implementation and maintenance of large-scale integrated relational database systems.

**Breadth:**

Senior level management. Oversees strategic planning and development of data warehouse solutions in partnership with technical and business leadership. Accountable for enterprise-wide results. Frequently reports to a Chief Information Officer or Chief Technology Officer.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS INTELLIGENCE SYSTEMS MANAGEMENT****Job Title: Manager, Data Warehouse****Job#: 3410****General Characteristics**

Works with the business and senior IT leadership to identify and establish information requirements, develop and implement data warehouse strategies that utilize data marts and/or data warehouse systems to enhance business processes and manage business intelligence. Leads the activities of data warehouse project teams in the design, development and implementation of data warehouses; and the configuration and auditing of data warehouses to ensure quality control of data.

Responsible for overseeing the development, operations and maintenance of data warehouse environment, including organizational balance and system coherency between front-end desktop/client environment and data warehouse back-end processing functions. Provides guidance regarding the use of data warehouse system, capability of systems to deliver information, and subject matter expertise regarding current systems and emerging technology. Needed knowledge includes process and data modeling, data architectural development methodology, project management and extensive knowledge of data warehouses and data marts.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of IT work experience including managing team(s) responsible for systems/applications development, database management systems and data warehouse development and management.

**Breadth:**

Middle level management in the data warehouse function. Works under general direction of senior level management. Typically manages and mentors supervisors, project leaders and/or technical staff. Works on multiple, complex projects as a project leader and a subject matter expert. Frequently reports to a Director, Data Warehouse or Director, Systems and Programming.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS INTELLIGENCE SYSTEMS MANAGEMENT****Job Title: Business Intelligence Architect****Job#: 3420****General Characteristics**

Responsible for leading the design and support of enterprise-wide business intelligence applications and architecture. Works with enterprise-wide business and IT senior management to understand and prioritize data and information requirements. Solves complex technical problems. Optimizes the performance of enterprise business intelligence tools by defining data to filter and index that add value to the user. Creates testing methodology and criteria. Designs and coordinates a curriculum for coaching and training customers in the use of business intelligence tools to enhance business decision-making capability. Develops standards, policies and procedures for the form, structure and attributes of the business intelligence tools and systems. Develops data/information quality metrics. Researches new technology and develops business cases to support enterprise-wide business intelligence solutions.

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of experience with large and complex database management systems, business intelligence tools and systems.

**Complexity:**

Expert/lead technical role. Provides technical expertise and direction for the development of complex enterprise-wide business intelligence and decision support systems solutions. Works on multiple projects as a project leader or sometimes as a business subject matter expert. Works on highly complex projects that require in-depth knowledge across multiple technical areas and business segments. Coaches and mentors more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS INTELLIGENCE SYSTEMS MANAGEMENT****Job Title: Data Warehouse Analyst****Job#: 3430****General Characteristics**

Responsible for gathering and assessing business information needs and preparing system requirements. Performs analyses, development and evaluation of data mining in a data warehouse environment which includes data design, database architecture, metadata and repository creation. Uses data mining and data analysis tools. Reviews and validates data loaded into the data warehouse for accuracy. Interacts with user community to produce reporting requirements. Provides technical consulting to users of the various data warehouses and advises users on conflicts and inappropriate data usage.

Responsible for prototyping solutions, preparing test scripts, and conducting tests and for data replication, extraction, loading, cleansing, and data modeling for data warehouses. Maintains knowledge of software tools, languages, scripts, and shells that effectively support the data warehouse environment in different operating system environments. Possesses working knowledge of Relational Database Management Systems (RDBMS) and data warehouse front-end tools. Must have an extensive knowledge of data warehouse and data mart concepts.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of IT work experience in business intelligence tools and systems.

**Complexity:**

Intermediate professional level role. Provides data warehouse architectural design, development and support in multi-platform environments. Works on multiple projects as a team member and may lead projects of moderate complexity. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS INTELLIGENCE SYSTEMS MANAGEMENT****Job Title: Data Warehouse Administrator****Job#: 3440****General Characteristics**

Provides data warehouse support functions including database maintenance, development and enhancement. Performs database administration functions such as loading data into database from external sources, supports users in constructing queries and generating output files. Responsible for on-going design and performance enhancement, which include reviewing queries for performance issues, estimating, monitoring and tuning the warehouse as it operates. Develops and administers processes to ensure interoperability and security of data warehouse system. Must possess a strong understanding of source data, data modeling, and data repository requirements.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of IT work experience in business intelligence tools and systems.

**Complexity:**

Intermediate professional level role. Provides daily administration, maintenance and support of data warehouse applications in multi-platform environments. Works on multiple projects as a team member and may lead projects of moderate complexity. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS INTELLIGENCE SYSTEMS MANAGEMENT****Job Title: Manager, Decision Support****Job#: 3600****General Characteristics**

Acts as liaison between business and IT leadership regarding the identification of business critical information and knowledge (e.g., customer and market data), and its usage and availability. Manages the Decision Support staff to ensure that the Decision Support Systems (DSS) and Executive Information Systems (EIS) are built to meet the information needs of the business leaders and various business units. Has full understanding of corporate strategies and must manage the diversity of needs and prioritize those needs based on the overall business strategy of the organization.

Works closely with key business leaders to define critical information needs, providing guidance regarding availability of data, capability of systems to deliver information needs, and subject matter expertise regarding current systems and emerging technology. Leads the research, evaluation and selection of new technologies. Leads cost and feasibility studies. Ensures project management process is in place, provides resource management and ensures quality and timely solutions. Needed knowledge includes process and data modeling, data architectural development methodology, IT planning methodology, consulting and facilitation, project management and extensive knowledge of the enterprise's data and decision-making processes.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, Business Administration, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of IT work experience including managing team(s) responsible for database, data warehouse, decision support systems and executive information systems development, support and administration.

**Breadth:**

Middle level management in the data warehouse function. Works under general direction of senior level management. Typically manages and mentors supervisors, project leaders and/or technical staff. Works on multiple, complex projects as a project leader and a subject matter expert. Frequently reports to a Director, Data Warehouse or Director, Systems and Programming.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS INTELLIGENCE SYSTEMS MANAGEMENT****Job Title: Decision Support Specialist****Job#: 3610****General Characteristics**

Works closely with customers and design teams in prioritizing data and information requirements. Determines how Decision Support Systems (DSS) and Executive Information Systems (EIS) will provide the information required to make effective business decisions; translates requirements into applications that employ appropriate decision support and reporting tools. Involved in the design, development and maintenance of DSS. Performs modeling of data sources and flows, works with data management staff to define an operational framework that will define, develop and implement DSS, EIS, policies and security frameworks to ensure precise and secure delivery of knowledge and information. Monitors system performance, implements changes to optimize performance. Involved in the selection of new products. Needed skills and knowledge includes process and data modeling, DSS architecture and tools, development life cycle methodologies, IT planning methodology, extensive knowledge of the enterprise's data and decision-making processes.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of IT work experience in business intelligence tools and systems.

**Complexity:**

Intermediate professional level role. Provides support for user community and development team in design, development and maintenance of DSS and/or EIS applications. Works on multiple function tasks that tend to be of medium technological complexity. Identifies and recommends technology solutions. Works one or more projects as a team member and may lead projects of moderate complexity. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS INTELLIGENCE SYSTEMS MANAGEMENT****Job Title: Decision Support Administrator****Job#: 3620****General Characteristics**

Supports the user community in the use of business intelligence tools to query files and databases for report outputs. Assists customers in use of OLAP tools, extracts and collects data for performing queries and writing reports. Reviews queries for performance issues, making changes as needed. Participates in the design and development of the system, as well as creation of user documentation. Monitors customer usage, upgrades enterprise-wide OLAP query and reporting tools, monitors batch queries and ensures interoperability and security of various front-end components. Maintains meta data coordination, and supports production system. Needed knowledge includes process and data modeling and data architectural development methodologies.

**Dimensions****Education:**

Associate's or Bachelor's Degree or technical institute degree/certificate in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

0 to 1 year IT work experience in business intelligence tools and systems.

**Complexity:**

Learner/entry level role. Provides support for user community. Works on multiple function tasks that tend to be of low technological complexity. Works on one or more projects as a project team member. Functions, relatively independent, under direction of senior professionals, supervisors, or managers. Generally follows documented procedures and checklists.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS INTELLIGENCE SYSTEMS MANAGEMENT****Job Title: Manager, CRM Technology****Job#: 3800****General Characteristics**

Responsible for leading a team in analyzing and determining business requirements and managing the planning and execution of Customer Relationship Management (CRM) technology and associated programs to achieve business objectives of enhancing customer satisfaction, optimizing profitability and developing long-term customer loyalty. Acts as a liaison between the IT and business communities in developing and implementing CRM solutions, manages the business impact of all CRM projects. Oversees the development and improvement of the technology framework that supports the integration of enterprise customer response process through various customer services channels (e.g., mail, email, Web, call center). Partners with Sales, Marketing and the business community to develop CRM strategies and support the development and execution of customer campaigns and promotions by mining the enterprise CRM database. Works closely with data management, infrastructure and development groups to ensure required data and systems are in place to meet the enterprise's CRM needs. Leads the research, evaluation and selection of CRM technologies. Possesses a thorough understanding of data architectural development methodology, process and data modeling, Web and call center technologies for CRM solutions. Has working knowledge of database marketing methodologies and processes, including but are not limited to channel and segment marketing, direct marketing and online marketing. Strong project management skills in planning and monitoring projects in a cross-functional environment.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, Business Administration or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of IT work experience including managing team(s) responsible for data warehousing, decision support systems or marketing support information systems.

**Breadth:**

Middle level management. Works under general direction of senior level management. Typically manages and mentors supervisors, project leads and/or technical staff. Responsible for leading a team of analysts and developers performing work in designing, developing and maintaining CRM systems and applications. Frequently reports to a Chief Technology Officer, Director, Data Warehouse or Director, Systems and Programming.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS INTELLIGENCE SYSTEMS MANAGEMENT****Job Title: Knowledge Engineer****Job#: 4000****General Characteristics**

Responsible for developing an infrastructure and process to capture knowledge gained by the organization through successful system interventions and enabling its shared use. Oversees the identification of critical knowledge, its usage, availability and the needs of various business groups. Involved in modeling information sources, flows and critical paths, as well as understanding how information is turned into knowledge and the relationship of knowledge and how it supports and enables key business processes. Facilitates the development of supporting knowledge architecture and standards. Works with operations staff to define an operational framework that defines, develops and implements delivery systems, systems management, policies and security frameworks to ensure delivery of knowledge and information to appropriate groups.

Possesses expertise in process and data modeling, architectural development methodologies, IT planning methodologies and extensive knowledge of the enterprise's business and decision-making processes. Must possess strong leadership skills to gain credibility with various business leaders and stakeholders. Makes complex IT and business decisions. Works with other IT groups to ensure solid cross-functional decisions are made as a team.

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, Business Administration, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of IT and business/industry work experience. Experience with document management, groupware, relational database systems, data warehouse and data mining, Web and systems analysis/development.

**Complexity:**

Expert/lead technical role. Develops infrastructure and process for identifying and sharing enterprise's core technical and business knowledge. Works on multiple projects as a project leader or as the subject matter expert. Works on projects/issues of high complexity that require demonstrated knowledge across multiple technical areas and business segments. Coaches and mentors more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: ENTERPRISE RESOURCE PLANNING (ERP)****Job Title: ERP Team Lead****Job#: 4200****General Characteristics**

Accountable for providing overall direction and integration for a specific ERP module, functional and/or business area. Understands the business strategy of a particular function/area and works with the team to define business requirements. Communicates and coordinates with other Team Leads, business leadership, and Project Manager to ensure appropriate integration of processes and modules across the enterprise. Oversees, defines and monitors critical path activities and resolves issues or escalates issues to the Project Manager as needed. Drives the design and implementation of new business processes with organizational structure and required ERP configuration.

Must possess an in-depth understanding of the business function/process supported, and also be viewed as a credible representative of that business function/process. Successful implementation is dependent on the ability of the incumbent to influence business leadership and management decisions and drive ownership and acceptance of changes to the business.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, Business Administration, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of IT and business work experience including managing team(s) responsible for systems implementation and/or infrastructure support. Often is recruited internally from high-level management positions in the organization.

**Breadth:**

Middle level management. Works under general direction of senior level management. Typically manages and mentors supervisors, project leads and/or technical staff. Degree of integration driven by ERP requires a consensus decision making process across Team Leads. Once key decisions are made, Team Lead then has autonomy for the technical decisions to support the business, but business process decisions are made through constant education and negotiation with business leadership and management. Works on complex business issues, which have a significant impact to the enterprise and across enterprise processes and functions due to the integration of ERP. Frequently reports to a Chief Technology Officer, Competency Center Leader or Departmental IT Executive.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: ENTERPRISE RESOURCE PLANNING (ERP)****Job Title: ERP Team Member****Job#: 4210****General Characteristics**

Responsible for documenting the “to-be” processes, defining performance metrics and identifying and resolving process gaps. Has a strong understanding and experience in the ERP methodology used by the organization. Responsible for mapping the business processes to ERP modules (often in conjunction with consultants) and participates in user acceptance testing. Often is involved in the creation of documentation and training materials, and may deliver training during implementation. May also act in a system support role immediately after implementation. Incumbents in this position come from the business, with an expert level of understanding of all of the business processes of the function they represent. They also serve as a communications liaison to the business during the implementation.

**Dimensions****Education:**

Bachelor’s Degree in function represented in the business. Or equivalent work experience.

**Experience:**

A minimum of 3 years of business and/or ERP implementation experience.

**Complexity:**

Intermediate professional level role. Works on multiple projects as a project team member, occasionally as a technical leader. Works on small to large, complex projects that require increased skill in multiple technical environments and knowledge of a specific business area. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: ENTERPRISE RESOURCE PLANNING (ERP)****Job Title: ERP Configurer****Job#: 4220****General Characteristics**

Performs functional analysis, requirements, definition and ERP module configuration and testing. Responsible for conducting prototypes, developing functional specifications, data mapping, function mapping, setting of configuration tables and setting of transaction/control tables. Has a thorough understanding of the business processes and flows to enable the analysis of business requirements and the development of solutions for the business functions. Responsible for the identification of and resolution of gaps in the business processes. Involved in security/authorization set-up, user documentation, data interface design, data migration and reconciliation. May be involved in the installation and tuning of modification, as well as archiving data. Generally this position has light programming skills in the appropriate language to develop necessary “work arounds.”

**Dimensions****Education:**

Bachelor’s Degree in Computer Science, Information Systems, Business Administration, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of IT work experience in systems/applications development or support functions.

**Complexity:**

Intermediate professional level role. Provides support for the user community and development team in the design, development, configuration and testing of ERP modules. Works on multiple functional tasks that tend to be of medium technological complexity. Identifies and recommends functional and technological solutions. Works on one or more projects as a team member. Acts as a subject matter expert for one ERP functional area. May coach more junior technical staff.

## Exhibit J

### JOB FAMILY DESCRIPTIONS

#### JOB FAMILY: ENTERPRISE RESOURCE PLANNING (ERP)

**Job Title:** ERP Programmer/Analyst

**Job#:** 4230

#### **Scope Variant**

Maps to level B

#### **General Characteristics**

Applies system solutions to business problems through the design and programming of automated systems. Configures, analyzes, designs, develops, and maintains ERP program codes and applications to support business processes and functions. Works on elements of large, complex installations. Performs all aspects of programming assignments and assists with systems design. Fully knowledgeable in ERP programming languages. Applies knowledge and experience with technology and application development methodologies to perform basic systems analysis techniques, testing, debugging, file design and storage.

#### **Dimensions**

##### **Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

##### **Experience:**

A minimum of 3 years of IT work experience in programming and/or ERP systems analysis. Requires advanced programming techniques and software design. May require knowledge of ERP applications or object-oriented analysis and design.

##### **Complexity:**

Intermediate professional level role. Works on multiple projects as a project team member, occasionally as a technical leader. Works on small to large, complex projects that require increased skill in multiple technical environments and knowledge of a specific business area. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: ENTERPRISE RESOURCE PLANNING (ERP)****Job Title: ERP Systems Support Specialist****Job#: 4240****General Characteristics**

Serves as single point-of-contact for end-users after Power Users have assisted end-users. Performs problem identification and on-the-spot training to prevent problem reoccurrence and knowledge transfer. Escalates Tier 2 problems to appropriate support (e.g., technical experts or process experts). Maintains history reports, identifies and addresses re-occurring problems, and assists in the development and execution of ERP and business process best practices across the organization. Performs basic fixes and data maintenance. May develop on-line help and update systems support help scripts. This position is very similar in responsibilities and tasks to a help desk position, but the impact to the organization due to errors is more significant. This position requires more advanced training than a similar help desk position.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, Business Administration, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of business and/or ERP experience.

**Complexity:**

Intermediate professional level role. Works on multiple projects as a project team member, occasionally as a technical leader. Works on small to large, complex projects that require increased skill in multiple technical environments and knowledge of a specific business area. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: ENTERPRISE RESOURCE PLANNING (ERP)****Job Title: ERP Systems Administrator****Job#: 4250****General Characteristics**

Responsible for ensuring the performance and reliability of ERP systems. Performs troubleshooting for hardware, software and system problems that involve ERP modules. Participates in projects to implement or enhance ERP systems and applications. Works with database administrator and ERP development team in defining user requirements, coordinating system-wide updates and installing upgrades and patches for ERP systems. Provides recommendations for enhancements/changes that may involve custom design, optional and third party products to improve the efficiency and effectiveness of ERP systems. Maintains ERP systems security through user profile management, creates and updates access permissions and maintains user accounts. Monitors and maintains performance metrics for system features, recommends and takes corrective/preventive actions. Participates in the design, development and implementation of test and production objects. Performs configuration, change management and testing activities as required. Consults users on technology changes that will impact work processes.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of business and/or ERP implementation experience. Experience with systems and database administration.

**Complexity:**

Intermediate professional level role. Works on multiple projects as a project team member, occasionally as a technical leader. Responsible for maintaining ERP systems and applications, supporting and training users for ERP system(s) and applications usage. Works on small to large, complex projects that require increased skill in multiple technical environments and knowledge of a specific business area. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: ENTERPRISE RESOURCE PLANNING (ERP)****Job Title: Basis/ALE Technical Consultant****Job#: 4600****General Characteristics**

Provides the highest level of technical expertise and consulting on SAP Basis or its successor, SAP Web Application Server systems to process teams and IT staff. Establishes the infrastructure standards and requirements. Evaluates, directs and supports SAP Basis and/or Web Application Server system enhancements and performs quality assurance functions. Researches and implements solutions for Basis and/or Web Application Server functionality in the areas of performance monitoring and tuning and systems configuration, design and implementation. Provides highest degree of technical engineering and support to the SAP team. Must have extensive experience in operating systems and programming languages, such as ABAP, Java and J2EE.

**Dimension****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 5 years of IT work experience building enterprise applications, including a minimum of 2 years of experience with SAP systems.

**Complexity:**

Advanced professional level role. Works on multiple projects as a project leader or frequently as the subject matter expert. Works on projects/issues of medium to high complexity that require demonstrated knowledge across multiple technical areas and business segments. Coaches and mentors more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: SOURCING AND VENDOR RELATIONSHIP MANAGEMENT****Job Title: Chief Sourcing Officer****Job#: 4800****General Characteristics**

Responsible for the development and implementation of an overall IT sourcing strategy in a multi-sourced IT environment. Acts as an integral part of the CIO's leadership team, works closely with other IT and business leaders to develop and execute the IT sourcing strategies and programs. Leads the IT Sourcing Office in evaluating and determining the most cost-effective and efficient means of sourcing, acquiring and delivering IT products and services. Responsible for making strategic decisions on what should be in-sourced and what should be outsourced based on the IT and business strategic direction. This role focuses on the sourcing at an enterprise level and is responsible for creating the governance mechanism that is necessary to continuously coordinate and integrate the teams of vendor relationship management, contract management and administration, IT project and asset management.

**Dimensions****Education:**

Bachelor's Degree or Master's Degree in Computer Science, Information Systems, Business Administration, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 10 years of experience including managing large, multiple, cross-functional team(s) and project(s) and influencing senior management and key stakeholders. Experience with vendor relationship management, contract negotiation, contract administration, project or asset management in a technology environment.

**Breadth:**

Senior level management. Oversees strategic planning and development of sourcing strategies and programs in partnership with technical and business leadership. Accountable for enterprise-wide results. Frequently reports to a Chief Information Officer, Chief Technology Officer or IT Chief Operating Officer.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: SOURCING AND VENDOR RELATIONSHIP MANAGEMENT****Job Title: Manager, IT Procurement****Job#: 4810****General Characteristics**

Recommends and establishes the IT procurement strategy, processes, and procedures that are consistent with corporate policy, IT project requirements and sound commercial, legal and ethical practices. Responsible for the systematic execution of processes and procedures for the timely and cost effective purchasing of IT products and services. Manages the activities of the IT procurement function, including the collection and execution of purchase orders, negotiation of bids from vendors, placement and tracking of purchase orders and coordination and reconciliation of invoices for processing. Manages the full cycle of all IT purchases, agreements and contracts from initiation to completion. Manages supplier relationships and service level administration for vendors. Acts as a liaison between IT and vendors in major dispute resolution concerning supplier performance. Evaluates supplier base for cost savings opportunities. Identifies and engages services of new suppliers in support of IT requirements.

**Dimensions****Education:**

Bachelor's Degree in Business Administration, Finance, Accounting, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of business experience including managing team(s) responsible for assetmanagement, procurement, finance or other related functions.

**Breadth:**

Middle level management. Works under general direction of senior level management. Typically manages and mentors supervisors, project leads and/or technical staff. Works on multiple, complex projects as a project leader and a subject matter expert. Frequently reports to an IT Chief Operating Officer, Chief Information Officer, Chief Financial Officer or Chief Sourcing Officer.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: SOURCING AND VENDOR RELATIONSHIP MANAGEMENT****Job Title: IT Procurement Specialist****Job#: 4820****General Characteristics**

Participates in the selection and implementation of IT supplier sourcing strategies to ensure high quality, on time delivery and cost competitiveness. Responsible for the collection and execution of purchase orders. Solicits, receives and analyzes proposals, quotations and tender submissions and recommends selection of suppliers in accordance with corporate policies and legal compliance. Tracks purchase orders and reconciles invoices in preparation for payment processing. Acts as a point of contact for IT in regards to vendor performance, including on-time delivery, quality of products and services acquired and problem resolution. Coordinates with Asset Management to ensure effective inventory management.

**Dimensions****Education:**

Bachelor's Degree in Business Administration, Finance, Accounting, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of business experience in asset management, procurement, finance or other related functions.

**Complexity:**

Intermediate professional level role. Works on multiple projects as a project team member, occasionally as a technical leader. Works on small to large, complex projects that require increased skill in multiple technical environments and knowledge of a specific business area. May coach more junior staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: SOURCING AND VENDOR RELATIONSHIP MANAGEMENT****Job Title: Manager, Vendor Relationships****Job#: 5000****General Characteristics**

Develops and implements the strategic sourcing and vendor relationship strategies. Manages the selection, acquisition and monitoring of contractual agreements for hardware, software and IT services for the enterprise. Works closely with the business and IT to understand their needs and serves as the IT point of contact for all purchases, deliveries and problems with products and services. Articulates and negotiates service level agreements. Works with Asset Management to ensure appropriate use of corporate funds. Develops, or assists in the development of Request for Information (RFIs), Request for Proposal (RFPs) and business cases.

Qualifies vendors and maintains an approved vendor database and tracking system. Establishes standards and procedures for evaluating products and services. Serves as the primary interface between the service provider and the business. Maintains contact with vendors to manage the status and quality of orders and the progress toward contractual commitments. Provides status updates on purchases, escalates delivery problems as necessary to affect minimal impact to the operation. Follows up with IT management to ensure satisfaction with delivered products and services and addresses any problems or concerns.

Participates in the budget process, such as annual budget planning, providing cash flow for other departments, quarterly reconciliation and ad hoc expense reports. Continually seeks optimal value in service from vendors, reviewing and monitoring performance and return-on-investment metrics and initiating contract modifications. Pursues new vendor relationships as needed. Must have a basic under-standing of all product and service needs, and must maintain knowledge of changing technologies.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, Business Administration, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of experience including managing team(s) responsible for vendor relationship management, contract negotiation, contract administration, project or asset management in a technology environment.

**Breadth:**

Middle level management. Works under general direction of senior level management. Typically manages and mentors supervisors, project leads and/or technical staff. Develops strategic outsourcing strategy and plans, provides management direction to the team(s). Supports multiple contracts or complex enterprise agreements. Works on projects that range in size, complexity and contract duration. Frequently reports to a Chief Technology Officer, IT Chief Operating Officer, Chief Information Officer, Chief Financial Officer or Chief Sourcing Officer.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: SOURCING AND VENDOR RELATIONSHIP MANAGEMENT****Job Title: Manager, Outsourcing Contracts****Job#: 5010****General Characteristics**

Responsible for all activities relating to the outsourcing contract management function. Leads contract efforts from contract signing, through vendor transition and current operational state. Establishes metrics, process and procedures and oversight management model required to ensure optimum vendor delivery, service, quality and pricing. Monitors vendor contracts to ensure terms and conditions are met; defines and manages vendor penalties/incentives if performance does not meet established criteria/exceeds established criteria.

Interprets the contract for the enterprise. Sets vendor directions and priorities. Creates, negotiates and incorporates contract amendments. Renegotiates contract, if required, to accommodate scope changes or changes in business requirements. Reviews vendor proposals and negotiates pricing/terms. Reviews vendor invoices for accuracy, and owns enterprise budget responsibility for the outsourcing expense. Serves as first point of negotiation for vendor disputes. Complexity of position can vary significantly depending on deal size/scope, single vs. multiple contract responsibility, and whether responsibility covers IT outsourcing contracts exclusively or all enterprise outsourcing contracts.

**Dimensions****Education:**

Bachelor's Degree in Business Administration, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of finance or contract management work experience including managing team(s), specifically within the IT area.

**Breadth:**

Middle level management. Works under general direction of senior level management. Typically manages and mentors supervisors, project leads and/or technical staff. Supports multiple contracts or complex enterprise agreements. Works on projects that range in size, complexity and contract duration. Frequently reports to a Chief Technology Officer, IT Chief Operating Officer, Chief Information Officer, Chief Financial Officer or Chief Sourcing Officer.

### JOB FAMILY DESCRIPTIONS

#### JOB FAMILY: SOURCING AND VENDOR RELATIONSHIP MANAGEMENT

**Job Title: Finance/Administration Specialist**

**Job#: 5040**

##### **General Characteristics**

Responsible for the financial administration practices and procedures associated with the management of vendor contracts. Reviews vendor charges, identifies disparities and resolves basic issues with the service provider. Monitors contract budget performance, identifying variances and recommending corrective actions. Allocates costs across the enterprise and performs regular audits to ensure contract compliance. Performs cost benefit analyses and supports Vendor Relationship Management team in developing the business cases necessary to gain approval for vendor-supplied services.

##### **Dimensions**

##### **Education:**

Associate's or Bachelor's Degree in Business Administration, Finance or other related field. Or equivalent work experience.

##### **Experience:**

0 to 2 years of financial management experience, preferably within the IT area.

##### **Complexity:**

Learner/entry level role. Provides financial management of one or more outsourcing projects. Represents either a business unit or enterprise initiative. Works on projects that range in size, complexity and contract duration. Functions, somewhat independently, under general direction of senior level professionals, supervisors or managers. Generally follows documented procedures and checklists.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: SOURCING AND VENDOR RELATIONSHIP MANAGEMENT****Job Title: Technical Advisor****Job#: 5200****General Characteristics**

In an outsourcing environment, works with service providers to ensure their in-scope technical solutions are consistent with enterprise's business strategy and architecture. Works closely with business unit performance managers and quality assurance staff to review service provider problems, to analyze and validate the accuracy of information and the feasibility of solutions. May troubleshoot performance issues and resolve problems with service providers. Tracks industry trends and maintains knowledge of new technologies in the area of expertise to better evaluate business unit service requests and service provider proposals. Keeps current on the participating business strategies and advises when solutions may or may not be leveraged across the enterprise. Understands the value of technology in the enterprise's business processes, works with service providers to identify opportunities for innovation, cost reduction and improved efficiencies and reviews service provider solutions. In addition, this role provides input into the in-scope technical architecture for outsourcing projects.

**Dimensions****Education:**

Bachelor's or Master's Degree in Business Administration, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of IT experience within one or more specialty areas. Has a deep level of understanding surrounding information systems, networking theory and architecture standards in areas of expertise.

**Complexity:**

Expert/lead technical role. Works on one or more projects as the subject matter expert or technical leader/consultant. When involved with a project team, acts in a consultative manner and typically does not provide administrative or management type of support. Works on complex tasks, projects or supports issues that involve a high degree of risk, impacts business unit performance and makes use of the individual's high level of knowledge within one or more areas of specialty. Coaches and mentors more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS MANAGEMENT/ADMINISTRATION****Job Title: Asset Manager****Job#: 5400****General Characteristics**

Manages the administration of IT inventory, asset management, and technical service contracts. Maintains and manages software license information and updates. Works with Manager, IT Procurement in the development of enterprise-wide IT purchasing standards and procedures. Creates and manages enterprise-wide asset management systems and serves as liaison to the Finance and Legal departments as it relates to the functions of this position. Ensures corporate and legal guidelines are followed for managing IT hardware and software assets.

Responsible for the evaluation, recommendation, and implementation of asset management systems for all IT technical assets. Provides support to the Finance department by providing asset information and managing the physical inventory control. Defines requirements for asset acquisition and procedures to include management and disposal strategies for the enterprise. ### JOB FAMILY DESCRIPTIONS

#### JOB FAMILY: BUSINESS MANAGEMENT/ADMINISTRATION

**Job Title: Asset Management Administrator**

**Job#: 5410**

##### **General Characteristics**

Administers IT purchase and inventory system and management system. Updates and administers asset databases, tracking life cycle of all assets. Receives and manages inventory, ensures security of assets while in inventory. Maintains and manages supplier records, service level agreements, software license information and updates, and assists in developing enterprise-wide IT purchasing standards and procedures. Receives new equipment/software requests and monitors procurement and deployment activities. Verifies financial data (e.g., leased, depreciated or expensed), and monitors and reconciles changes in inventory and performs spot checks to ensure process and system quality.

##### **Dimensions**

##### **Education:**

Associate's or Bachelor's Degree in Business Administration, Finance, Accounting, or other related field. Or equivalent work experience.

##### **Experience:**

0 to 1 year of business experience in asset management, procurement, finance or related experience.

##### **Complexity:**

Learner/entry level role. Works as a team member on one or more asset management projects. Performs tasks of low to medium complexity supporting the organization's asset management program. Functions, somewhat independently, under general direction of senior level professionals, supervisors or managers. Generally follows documented procedures and checklists.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS MANAGEMENT/ADMINISTRATION****Job Title: Director, HR/IT****Job #: 5500****General Characteristics**

Acts as the strategic liaison between HR and IT. Provides HR leadership support and counsel to the IT organization in the areas of workforce planning, recruiting, training and career development, organization design, performance management, compensation, recognition and change management. Works with CIO and IT leadership team to develop a people strategy that supports the goals of the IT organization. Develop action plans and strategies to address particular IT workforce needs. Promotes innovation and continuous improvement in the IT organization.

Works with the IT leadership team to drive broad cultural change and position the organization for long-term success by helping to build a high performing IT workforce. Analyzes and presents information to the IT leadership team that enables good decision making and encourages the focus around key people issues. Ensures IT human capital management practices and programs align with and are in compliance with corporate HR policies and standards.

This position may have a joint reporting function into human resources and senior IT leadership (the CIO). This is a multifaceted position requiring a broad combination of skills spanning human resources, general management capabilities, and a solid understanding of IT functions, roles and responsibilities.

**Dimensions****Education:**

Bachelor's or Master's Degree in Business Administration, Human Resources, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 10 years of related experience in HR and IT including 3 years of leadership experience in managing medium to large teams and influencing senior level management and key stakeholders. Must have a broad knowledge of the IT function and in-depth knowledge of HR function.

**Breadth:**

Senior level management. Typically manages and mentors mid-level managers. Works on multiple, complex projects in a leadership capacity by providing direction and support. Frequently reports to a corporate human resource executive, Chief Information Officer or IT Chief Operating Officer.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS MANAGEMENT/ADMINISTRATION****Job Title: Manager, HR/IT Staffing****Job#: 5600****General Characteristics**

Develops and implements sourcing strategies and programs to recruit and select both permanent and contracted staff for the IT organization. Viewed as the in-house consultant on recruiting and retention practices, and strategy. Manages a variety of recruiting efforts, which may include college and Internet recruitment, and use of recruitment firms. Ensures legal and corporate hiring policies are adhered to. Leads succession planning process; performs forecasting needs based on changes within the organization (e.g., retirement statistics, planned moves, reorganizations); creates and maintains a recruiting plan accordingly.

Manages the recruitment process, screening process, conducts interviews for permanent and contract staff (including basic technical interviews), makes recommendations for hire and manages the extension of offers. Has a strong understanding of the competitive marketplace (e.g., key competitors for employees, compensation pressure points, "hot" skills, and competitors' differentiators). Proactive in representing IT issues and needs to HR leadership and is active in the HR and IT community to build awareness of the organization. Manages the relationship with contract staff vendors, negotiates contracts and pricing and maintains records of use of contracted services. May make hiring decisions for selected positions. Viewed as critical and respected resource to IT, and an advocate of IT needs to HR.

**Dimensions****Education:**

Bachelor's Degree in Business Administration, Human Resources, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of related experience in HR and IT including managing team(s) and project(s).

**Breadth:**

Middle level management. Works under general direction of senior level management. Typically manages and mentors supervisors, project leads and/or technical staff. Works on multiple, complex projects as a project leader and a subject matter expert. Frequently reports to a corporate human resource executive, IT Chief Operating Officer or Chief Sourcing Officer.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS MANAGEMENT/ADMINISTRATION****Job Title: Technical Recruiter****Job#: 5610****General Characteristics**

Responsible for sourcing and recruiting IT professionals for the enterprise. Works with management to define candidate qualifications. Interprets the organization's recruiting strategy, identifies sources, develops and executes recruiting plans to meet the organization's technical staff needs. Utilizes multiple channels to recruit candidates, which may include, but is not limited to, colleges, job fairs, Internet, employee referrals, recruitment firms. Identifies, screens and interviews qualified candidates. Conducts background checks and obtains references in accordance with established procedures. Must possess working knowledge of information technology used in the enterprise and understanding of skills required for each technical position. Must have ability to establish strong relationships with various recruitment sources to secure a candidate pool as needed.

**Dimensions****Education:**

Bachelor's Degree in Business Administration, Human Resources, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of related experience in recruiting and IT.

**Complexity:**

Intermediate professional level role. Works on multiple recruiting projects as a project team member, occasionally as a project leader. Works on small to large, complex assignments that require increased skill in multiple technical environments and knowledge of a specific business area. May coach more junior recruiters.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS MANAGEMENT/ADMINISTRATION****Job Title: HR/IT Generalist****Job#: 5620****General Characteristics**

Responsible for providing the IT organization with exclusive, full range HR functional support. This involves functions such as recruiting (including college recruiting), maintaining employee personnel records, performance management consulting on organizational/personnel issues, managing compensation and benefits, addressing issues related to employee and labor relations—including AAP and EEO matters, often assessing training needs and designing and presenting training programs. May be involved in grievance and arbitration investigation and preparation, labor contract administration and contract negotiations.

Typically involves interaction with department heads, supervisors, and employees on HR related issues, including personnel policies and procedures, investigations and recommendations on employee disciplinary actions, job analysis and organizational review. Demonstrates knowledge of the IT industry and the business, as IT is their sole customer.

Assists in developing and administering enterprise-wide HR policies (e.g., drug and alcohol policies, absence control programs, work rules). Also involved in developing and maintaining employee communications programs through the design of newsletters and information campaigns for the purpose of informing the organization of HR policies/issues.

**Dimensions****Education:**

Bachelor's Degree in Business Administration, Human Resources, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of related experience in HR and IT.

**Complexity:**

Intermediate professional level role. Works independently, or on multiple projects as a project team member, occasionally as a project leader. Works on small to large, complex projects that require increased skill in multiple technical environments and knowledge of a specific business area. May coach more junior HR staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS MANAGEMENT/ADMINISTRATION****Job Title: Documentation Specialist/Technical Writer****Job#: 5800****General Characteristics**

Responsible for creation and maintenance of IT documentation. Translates technical and/or complicated information into clear, concise documents appropriate for various target audiences. Works with Development, Quality Assurance and Technical Support to produce a wide variety of technical publications including instructional materials, technical manuals, product documentation and the like for use by both the IT and business community. Interviews subject matter experts and technical staff to collect information, prepare written text, and coordinate layout and material organization. Researches information such as drawings, design reports, equipment and test specifications to fill any gaps.

Reviews, critiques, and edits documentation including design documents, programmer notes and system overviews. Requires knowledge of company product lines and document structure. Depending on the industry/work environment, such documents may include various media, including written and video. Responsibilities include maintenance of internal documentation library, providing and/or coordinating special documentation services as required, and oversight of special projects. Must have strong organizational and project management skills and excellent writing and editing skills.

**Dimensions****Education:**

Bachelor's Degree in Journalism, Technical Writing, Business Administration, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of business or technical writing experience and working knowledge of multiple software and graphics packages.

**Complexity:**

Intermediate professional level role. Works on several moderately complex, to complex document management projects as a project team member. May coach more junior staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS MANAGEMENT/ADMINISTRATION****Job Title: Manager, IT Finance****Job#: 6000****General Characteristics**

Provides financial management for the IT organization. Leads the analysis, development and implementation of financial services for IT planning and control. Analyzes and prepares IT budget and develops proposals with supporting documentation and justification. Leads analysis on IT financial conditions, business compliance matters and effectiveness of strategies and programs to business objectives, develops recommendations for senior IT leadership team for a variety of business issues. Provides financial statements for IT leadership team such as monthly budgets and summary reports. Audits and approves invoices for contract payment. Develops financial metrics and conducts audits to ensure compliance. Drives common accounting practices, reconcilements and consistent reporting. Ensures the compliance with all federal and state legislations as well as internal policies and procedures. May be in charge of developing an appropriate pricing model and chargeback scheme for IT services.

**Dimensions****Education:**

Bachelor's Degree in Finance, Economics, Accounting, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 6 years of financial management experience including managing team(s) responsible for financial analysis, planning, cost analysis, market capitalization, P&E ratios and financial statements.

**Breadth:**

Middle level management. Works under general direction of senior level management. Typically manages and mentors supervisors, project leads and/or professional staff. Responsible for supporting complex IT financial activities on an IT enterprise-wide basis and/or business unit level. Frequently reports to a corporate Chief Financial Officer, Chief Information Officer, IT Chief Operating Officer or Operating Unit IT Executive.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS MANAGEMENT/ADMINISTRATION****Job Title: Director, IT Risk and Compliance****Job#: 6100****General Characteristics**

Leads, develops and maintains the IT risk and compliance management strategy. Develops and maintains policy, standards, processes and procedures to assess, monitor, report, escalate and remediate IT risk and compliance related issues. Works collaboratively with corporate compliance, internal auditing and corporate risk management and various technical teams in the design and implementation of audit, risk assessment and regulatory compliance practices for IT. Leads cross-functional teams in performing reviews and tests of IT internal controls to ensure that existing IT systems are operating as designed and that they contain adequate controls. Facilitates risk assessments and identifies risk themes. Proactively promotes enhancement of technology-related internal controls awareness and training across IT and business units.

Monitors and analyzes technology risk trends, recommends appropriate IT policies, procedures and practices to strengthen internal operations. Directs IT functional teams in the development, implementation, monitoring and reporting of control processes, documentation and compliance routines. Advises IT and business executives on the status of technology risk and compliance issues based on assessment results and information from various monitoring and control systems. Educates IT and business executives on appropriate mitigation strategies and approaches. Provides oversight regarding audit, regulatory and risk management activities across IT functional areas, such as the development and maintenance of regulatory documentation (e.g., Sarbanes-Oxley Act compliance). Coordinates the IT component of both internal and external audits, federal and state examinations. Possesses detailed knowledge of industry regulatory environment and risk management practices, and thorough understanding of local and federal regulations such as Sarbanes-Oxley, Basel II, and HIPAA.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, Business Administration, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 10 years of IT and business work experience including managing team(s) responsible for risk management, compliance and audit, information security management.

**Breadth:**

Senior level management in risk and compliance management. Has overall responsibility for department decisions and management. Provides strategic direction, coaches and mentors more junior management staff and/or senior level professionals. Has accountability for IT functional/departmental results. Frequently reports to a corporate risk management executive, Chief Financial Officer or Chief Information Officer.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS MANAGEMENT/ADMINISTRATION****Job Title: Manager, IT Audit****Job#: 6200****General Characteristics**

Leads and manages internal audit function for information systems audits and compliance-related work (e.g., Sarbanes-Oxley Act compliance) using generally applicable and accepted standards and framework for IT audit (e.g., COBIT). Develops and implements an IT audit strategy and plan to review technical systems controls, identify control weakness and communicate significant control and compliance risk to senior management. Provides recommendations to correct or mitigate IT systems control and compliance weaknesses. Works with corporate and IT risk management team in developing and implementing internal control policies in a wide variety of IT processes. Promotes compliance with regulatory requirements and IT best practices, especially with respect to project management, systems development and information security. Provides control-related consultancy to management teams and ensures the existing/new applications and/or technology infrastructure elements comply with enterprise security, control and audit standards in addition to passing local and federal regulatory examinations.

Supervises and conducts audit activities. Prepares audit reports, advises IT leadership and business line management about the status of technology-related internal control and compliance issues, makes recommendations for risk mitigation, process, control or cost improvement approaches. Plans, manages, directs and reviews the work of technical auditors and consultants.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, Business Administration, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of IT and/or auditing work experience including managing team(s) responsible for audit, finance or accounting functions. Typically possesses an IT auditing professional designation (e.g., Certified Information System Auditor (CISA)) or accounting professional designation (e.g., CPA).

**Breadth:**

Middle level management. Works under general direction of senior level management. Typically manages and mentors supervisors, project leads and/or technical staff. Works on multiple, complex projects as a project leader and a subject matter expert. Frequently reports to a corporate Chief Financial Officer, Chief Information Officer or IT Chief Operating Officer.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS MANAGEMENT/ADMINISTRATION****Job Title: IT Auditor****Job#: 6210****General Characteristics**

Responsible for planning and performing audits of information systems and related processes in a multi-platform environment. This may include reviewing organizational IT policies, standards and procedures and providing advice on their adequacy, accuracy and compliance with government guidelines and regulatory requirements (e.g., Sarbanes-Oxley Act); assisting management in the identification and assessment of technology related risks, and reporting on the adequacy of risk-based controls; evaluating technology and business related controls for integrated IT and business auditing efforts. Participates in new system development and implementation reviews by reviewing project documentation, conducting interviews, assessing work completed.

Ensures that development efforts are in compliance with organizational policies, standards and procedures, and controls are adequately incorporated into the systems; identifies areas of opportunity for process, control or cost improvement. Works with outside auditors to help reconcile discrepancies or support the external auditing functions and local, federal examinations. May be responsible for developing and implementing tools to support automated audit effort. May perform due diligence and special review(s) work as required by management. Has working knowledge of generally applicable and accepted auditing standards and framework (e.g., COBIT) and best practices for IT services management (e.g., ITIL), government guidelines and laws (e.g., Sarbanes-Oxley Act).

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, Business Administration, or other related field. Typically requires an IT auditing professional designation (e.g., Certified Information System Auditor (CISA)) or accounting professional designation (e.g., CPA).

**Experience:**

A minimum of 5 years of IT work experience, including 2 to 3 years IT auditing or equivalent experience.

**Complexity:**

Advanced professional level role. Works on multiple auditing projects as a project leader or frequently as the subject matter expert. Works on projects/issues of medium to high complexity that require demonstrated knowledge across multiple technical areas and business segments. Coaches and mentors more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS MANAGEMENT/ADMINISTRATION****Job Title: Business Management Specialist****Job#: 6400****General Characteristics**

Assists with the daily operations and provides general administrative support to the assigned IT organization. Responsibilities may include participating and assisting in the preparation of annual business plan for the assigned IT functional area, coordinating the contract management efforts, such as the development of requests for proposals (RFP) and supporting the development and final execution of contracts. Maintains annual expense budgets utilizing proper accounting/budgeting controls, enters financial data into tracking system and provides regular and ad-hoc financial status reports. Implements cost allocation program, and responds to basic questions and concerns from the business areas. Reviews contract invoices, identifies disparities and resolves basic issues with the vendors. May serve as the liaison between IT technical teams, resource manager and human resources organization to develop and implement appropriate IT talent management activities. May participate in the development, implementation and maintenance of IT communication strategies and plans.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, Business Administration or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of relevant IT and business work experience.

**Complexity:**

Intermediate professional level role. Performs assigned tasks of moderate to high complexity using established procedures, standards and guidelines. Works independently or on multiple projects as a project team member, occasionally as a project leader. Works on small to large, complex projects that require increased skill in multiple technical environments and knowledge of a specific business area. May coach more junior staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: TRAINING****Job Title: Manager, Technical Training****Job#: 6600****General Characteristics**

Manages the IT training life cycle, including needs analysis, training strategy and development and delivery of training programs and tools for IT professionals and end-users. Additionally, implements and manages a skills management and competency development process for the IT professional staff and end-user community. Coordinates or provides services to identify business and subsequent training drivers for the organization and identifies technology drivers for the analysis of roles and their associated skills and competencies. Leads analysis of current skills to identify skill gaps and works with IT to prioritize skills training and development imperatives. Ensures a technical learning environment exists in the organization. Responsible for ensuring capability of technology is maximized through effective training, resulting in transfer of knowledge and skills that support organizational needs.

Oversees the development of curriculums and specific courseware to address skill gaps for IT professionals and end-users, and oversees the selection and usage of various training delivery systems and certification/testing methods to assess the effectiveness and efficiency of programs. Measures training return on investment (ROI) and helps to pilot test new training techniques, strategies, tools and processes to increase training effectiveness.

**Dimensions****Education:**

Bachelor's Degree in Instructional Technology, Computer Science, Information Systems, Education, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of Training (including curriculum development for IT and instructional technology) experience, 2 or more years of training management experience.

**Breadth:**

Middle level management. Works under general direction of senior level management. Typically manages and mentors supervisors, project leads and/or technical staff. Works on multiple, complex projects as a project leader and a subject matter expert. Frequently reports to a corporate training officer, IT Chief Operating Officer or Chief Information Officer.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: TRAINING****Job Title: Technical Trainer****Job#: 6610****General Characteristics**

Responsible for the creation, and delivery of training and development programs to all levels of end-users and IT professionals. Involved in training needs assessment process and vendor selection. Works closely with both IT and the business to understand system and training needs for applications and packages supported. Develops documentation for custom applications and packaged applications, using a variety of mediums as needed. Designs training programs, classes, workshops, and Computer Based Training (CBT) and on-line help. Delivers training to a variety of audiences, understanding and applying adult learning principles. More junior position works on and delivers training programs for standard packages and productivity tools (e.g., Word, Excel, e-mail). More senior position delivers technical training to IT professionals, and requires in-depth knowledge and experience in the systems/applications/programming languages supported (e.g., Oracle, NT, C++).

**Dimensions****Education:**

Bachelor's Degree in Instructional Technology, Computer Science, Information Systems, Education, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of Training (including IT course development and delivery) experience.

**Complexity:**

Intermediate professional level role. Works independently or on multiple IT training projects as a project team member, occasionally as a project leader. Works on small to large, complex IT training projects that require increased skill in multiple technical environments and knowledge of a specific business area. May coach more junior staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: SECURITY MANAGEMENT****Job Title: Security Manager****Job#: 6800****General Characteristics**

Manages the development and delivery of IT security standards, best practices, architecture and systems to ensure information system security across the enterprise. Implements processes and methods for auditing and addressing non-compliance to information security standards; facilitates migration of non-compliant environments to compliant environments. Conducts studies within and outside the organization to ensure compliance with standards and currency with industry security norms. Manages and participates in the planning and implementation of security administration for all IT projects. Responsible for evaluation and selection of security applications and systems. Makes recommendations and assists in the implementation of changes to work methods and procedures to make them more effective or to strengthen security measures. In organizations where customers or vendors access databases/applications, security takes on a higher level of criticality for the protection of corporate intellectual capital.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of IT work experience with a broad range of exposure to all aspects of business planning, systems analysis and applications development. Experience with managing team(s) and project(s) for information security management.

**Breadth:**

Middle level management. Works under general direction of senior level management. Typically manages and mentors supervisors, project leads and/or technical staff. Works on multiple, complex projects as a project leader and subject matter expert. Frequently reports to a Corporate Security Officer, Chief Information Security Officer, Chief Technology Officer or IT Chief Operating Officer.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: SECURITY MANAGEMENT****Job Title: Security Analyst****Job#: 6810****General Characteristics**

Develops and manages security for more than one IT functional area (e.g., data, systems, network and/or Web) across the enterprise. Assists in the development and implementation of security policies and procedures (e.g., user log-on and authentication rules, security breach escalation procedures, security auditing procedures and use of firewalls and encryption routines). Prepares status reports on security matters to develop security risk analysis scenarios and response procedures. Responsible for the tracking and monitoring of software viruses. Enforces security policies and procedures by administering and monitoring security profiles, reviews security violation reports and investigates possible security exceptions, updates, and maintains and documents security controls.

Involved in the evaluation of products and/or procedures to enhance productivity and effectiveness. Provides direct support to the business and IT staff for security related issues. Educates IT and the business about security policies and consults on security issues regarding user built/managed systems. Represents the security needs of the organization by providing expertise and assistance in all IT projects with regard to security issues. Must have extensive knowledge in networking, databases, systems and/or Web operations. More junior level position primarily focuses on security administration; a more senior level position is involved in developing enterprise security strategies, management of security projects and the most complicated security issues.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 4 years of combined IT and security work experience with a broad range of exposure to systems analysis, applications development, database design and administration; one to two years of experience with information security. Requires knowledge of security issues, techniques and implications across all existing computer platforms.

**Complexity:**

Intermediate professional level role. Works independently or on multiple IT security projects as a project team member, occasionally as a project leader. Works on small to large, complex security issues or projects that require increased skill in multiple IT functional areas. May coach more junior staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: SECURITY MANAGEMENT****Job Title: Data Security Specialist****Job#: 6820****General Characteristics**

Responsible for the planning, design, enforcement and audit of security policies and procedures which safeguard the integrity of and access to enterprise systems, files and data elements. Responsible for acting on security violations. Maintains knowledge of changing technologies, and provides recommendations for adaptation of new technologies or policies. Recognizes and identifies potential areas where existing data security policies and procedures require change, or where new ones need to be developed, especially regarding future business expansion. Provides management with risk assessments and security briefings to advise them of critical issues that may affect customer, or corporate security objectives. Evaluates and recommends security products, services and/or procedures to enhance productivity and effectiveness. Oversees security awareness programs and provides education on security policies and practices.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 4 years of IT work experience with a broad range of exposure to systems analysis, applications development, database design and administration; one to two years of experience with information security. Requires knowledge of security issues, techniques and implications across all existing computer platforms.

**Complexity:**

Intermediate professional level role. Works on multiple projects as a team member and leads the data-related security components. Develops security solutions for medium to highly complex assignments. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: SECURITY MANAGEMENT****Job Title: Network Security Specialist****Job#: 6830****General Characteristics**

Involved in the full life cycle of network security management. Assists in the development and implementation of security policies, procedures and measures in a networking environment. Responsible for firewall configuration, maintenance, monitoring and other various network security measures. Performs security assessments and reviews networking initiatives for security compliance. Prepares status reports on security matters to develop security risk analysis scenarios and response procedures. Involved in the continual improvement of the network infrastructure and implementation of new security-based technologies. Evaluates and recommends security products for various platforms in the networking environment. Educates users about network security policies and consults on security issues. Must have broad technical knowledge of client/server, network topology and network/infrastructure security.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of combined IT and security work experience with a broad exposure to infrastructure/network and multi-platform environments. Requires knowledge of security issues, techniques and implications across all existing computer platforms.

**Complexity:**

Intermediate professional level role. Develops security solutions for medium to high complex assignments. Works on multiple projects as a team member and lead network-related security components. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: SECURITY MANAGEMENT****Job Title: Systems Security Specialist****Job#: 6840****General Characteristics**

Develops, evaluates and manages systems security across the enterprise. Areas of concentration include account management, password auditing, network based and Web application based vulnerability scanning, virus management and intrusion detection. Requires technical expertise in systems administration and security tools, combined with the knowledge of security practices and procedures. Assists in the development and implementation of security policies and procedures (e.g., user log-on and authentication rules, security breach escalation procedures, security auditing procedures and use of firewalls and encryption routines). Prepares status reports on security matters to develop security risk analysis scenarios and response procedures.

Enforces security policies and procedures by administering and monitoring security profiles, reviews security violation reports and investigates possible security exceptions, updates, and maintains and documents security controls. Involved in the evaluation of products and/or procedures to enhance productivity and effectiveness. Provides direct support to the business and IT staff for systems security related issues. Educates users on systems security standards and procedures. Must have broad technical knowledge of network operating systems (e.g., UNIX, NT).

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 2 years of combined IT and security work experience with a broad exposure to infrastructure/network and multi-platform environments. Requires knowledge of security issues, techniques and implications across all existing computer platforms.

**Complexity:**

Intermediate professional level role. Develops security solutions for medium to high complex assignments. Works on multiple projects as a team member and lead systems-related security components. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: SECURITY MANAGEMENT****Job Title: Web Security Specialist****Job#: 6850****General Characteristics**

Assists in the development and management of Web security policy and procedures for the enterprise. Evaluates information security solutions on Inter/Intranet/Extranet environments. Responsible for monitoring, assessing and reviewing rule base and configurations of firewalls and intrusion detection systems. Performs security assessment reviews of the e-commerce applications for compliance to security policies, standards and practices. Reviews software products and recommends security solutions for various platforms and initiatives. Educates users on the Web security standards and practices. Reviews and prepares status reports on security matters to develop security risk analysis scenarios and response procedures.

Ensures compliance to security policies and procedures by administering and monitoring security profiles; reviews security violation reports and investigates possible security exceptions; updates, maintains and documents security controls. Must have knowledge of client/server and Web technologies and a strong understanding of e-commerce operations.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of combined IT and security experience with a broad range of exposure to infrastructure/Web and multi-platform environments. Requires knowledge of security issues, techniques and implications across all existing computer platforms.

**Complexity:**

Intermediate professional level role. Develops security solutions for medium to high complex assignments. Works on multiple projects as a team member and leads Web-related security components. May coach more junior technical staff.

### **JOB FAMILY DESCRIPTIONS**

#### **JOB FAMILY: BUSINESS CONTINUANCE MANAGEMENT**

**Job Title: Manager, Business Continuance**

**Job#: 7000**

##### **General Characteristics**

Responsible for the implementation and integration of risk management procedures across the enterprise, based on a thorough understanding of key IT services that must be maintained to reduce financial loss and critical customer service capability. Ensures monitoring and testing of business continuance procedures, ensures response to system failures, and is proactive in building processes to minimize/eliminate downtime. Develops service level risk management agreements with the business and with vendors.

##### **Dimensions**

###### **Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

###### **Experience:**

A minimum of 7 years of IT and business work experience including managing large-scaled IT infrastructure and support functions, risk management, process re-engineering or improvement. Experience with managing team(s) and project(s).

###### **Breadth:**

Middle level management. Works under general direction of senior level management. Typically manages and mentors supervisors, project leads and/or technical staff. Works on multiple, complex projects as a project leader and a subject matter expert. Frequently reports to a corporate risk management officer, Chief Information Officer, Chief Information Security Officer, Chief Technology Officer or IT Chief Operating Officer.

## **Exhibit J**

### **JOB FAMILY DESCRIPTIONS**

#### **JOB FAMILY: BUSINESS CONTINUANCE MANAGEMENT**

**Job Title: Business Continuity Specialist**

**Job#: 7010**

##### **General Characteristics**

Develops risk management procedures, business continuity scenarios, and contingency plans for central and distributed systems and networks to maintain operations during downtime and/or major disasters. Identifies and makes recommendations regarding critical points of failure. Develops and implements policies and procedures for business continuity and test plans with various operational and support groups in IT. Involved in the evaluation and selection of vendors to ensure service level agreement meet business continuity planning requirements.

##### **Dimensions**

###### **Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

###### **Experience:**

A minimum of 3 years of IT work experience in information systems support, administration and risk management.

###### **Complexity:**

Intermediate professional level role. Performs contingency planning and analysis for medium to highly complex assignments. Works on multiple projects as a team member and leads business continuity planning components. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: PRODUCT DEVELOPMENT****Job Title: Manager, Product Development****Job#: 7200****General Characteristics**

Manages research and development activities relating to the design and development of software or hardware products and qualification or re-qualification of new and existing products. Works with a cross-functional team to ensure fulfillment of product requirements, evaluates product performance and transition products from development to commercialization. Assists in determining product delivery and deployment dates for new product releases, feature and maintenance releases and regular corrective service or service pack releases.

Acts as a technical consultant to the product organization and leads research, and prototyping of innovative technologies and products. Ensures the technology and architectural roadmap of engineering is properly aligned with and supports the product/business road map. Acts as a customer liaison on technical issues related to product integration, custom development and requirements. May lead major releases and ensure feature enhancements respond to customer requests. Responsible for product delivery managing schedules and tasks related to all aspects of product development.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, Engineering, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of high-tech industry, product engineering and/or IT work experience. Experience with managing team(s) responsible for software, hardware design, engineering and development functions.

**Breadth:**

Middle level management. Works under general direction of senior level management. Typically manages and mentors supervisors, project leads and/or technical staff. Works on multiple, complex projects as a project leader and a subject matter expert. Frequently reports to a corporate senior level software development executive, research and development executive or Chief Technology Officer.

**JOB FAMILY DESCRIPTIONS****JOB FAMILY: PRODUCT DEVELOPMENT****Job Title: Product Architect****Job#: 7210****General Characteristics**

Chairs the product architecture team and provides technical leadership in the planning, design and architect phases of software or hardware product development. Identifies, evaluates, and recommends solutions using advanced architectures and technologies to facilitate rapid development and implementation. Understands key competitors' products and differentiating features. Works with a cross-functional team to translate customer requirements into detailed architectural approaches and product specifications, creates realistic development plans and schedules, evaluates and prioritizes requests for product changes and enhancements.

Understands business needs as well as customer and market requirements. Applies creativity, in-depth technical and theoretical knowledge, and experience in solving highly complex architectural design problems. Recommends new technology directions or options to maintain products' competitive advantages. Communicates technology design and any related issues to technical and non-technical audiences including customers and technical partners. Prepares and documents product architecture plans. May design technical testing methods to meet target product scalability and performance objectives. Participates in the standards committees and other industry gatherings to track industry trends and maintains knowledge of new technologies to better serve the enterprise's architecture needs.

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, Engineering or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of high-tech industry, product engineering and/or IT work experience.

**Complexity:**

Expert/lead technical role. Provides technical expertise and direction for the development of complex hardware and software projects. Works on multiple projects as a project leader or as the subject matter expert. Works on projects/issues of high complexity that require in-depth knowledge across multiple technical areas and business segments. Coaches and mentors more junior technical staff.

## JOB FAMILY DESCRIPTIONS

### JOB FAMILY: PRODUCT DEVELOPMENT

**Job Title: Product Engineer**

**Job#: 7220**

**General Characteristics**

Responsible for all aspects of software or hardware product delivery and performance. Works with design engineering and test team to drive products from design completion to volume production release. Performs various engineering tests to verify and validate product designs, such as defining and specifying new product Design Verification Test (DVT) requirements and participation in the DVT process. Supports product evaluation and qualification on leading edge technology components. Ensures that production schedules are followed and product(s) meet specifications and quality requirements. Interacts with product engineering, quality, manufacturing and marketing teams to analyze and provide technical support to help resolve customers' product related problems/issues.

**Dimensions**

**Education:**

Bachelor's Degree in Computer Science, Information Systems, Engineering or other related field. Or equivalent work experience.

**Experience:**

A minimum of 4 years of high-tech industry, product engineering and/or IT work experience.

**Complexity:**

Intermediate professional level role. Performs product design and engineering work for medium to highly complex assignments. Works on multiple projects as a team member, sometimes as a technical leader. May coach more junior technical staff.

**JOB FAMILY DESCRIPTIONS****JOB FAMILY: PRODUCT DEVELOPMENT****Job Title: Product Developer****Job#: 7230****General Characteristics**

Responsible for designing and developing software or hardware product. Understands business and customer requirements that drive the analysis and design of technical solutions. Participates in all phases of product development lifecycle, including the analysis, design, test and integration of products. Develops design specifications and parameters that are in compliance with products' architectural blueprints. Researches, evaluates and incorporates new technology and tools to enhance the product development process. Resolves customer complaints with products and responds to suggestions for improvement and enhancements. May assist in development of product user manuals.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, Engineering or other related field. Or equivalent work experience.

**Experience:**

A minimum of 4 years of high-tech industry, product engineering and/or IT work experience.

**Complexity:**

Intermediate professional level role. Performs product design and development work for medium to highly complex assignments. Works on multiple projects as a team member, sometimes as a technical leader. May coach more junior technical staff.

**JOB FAMILY DESCRIPTIONS****JOB FAMILY: SYSTEMS PROGRAMMING AND ADMINISTRATION****Job Title: Manager, Systems Software****Job#: 7400****General Characteristics**

Responsible for managing the programming, administration and support activities for the enterprise's operating systems that may reside on multiple platforms. Has a high level understanding of operating systems and foundation architecture. Accountable for operating systems software selection and development and continued maintenance of such systems to improve efficiencies. Develops departmental standards and procedures including systems programming standards and program documentation requirements. Defines and monitors multiple projects, provides technical and administrative supervision. Must interface with members of the IT and user community to coordinate activities relating to the implementation of new software. Provides technical consultation and support to users and other IT staff.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of IT work experience including managing team(s) responsible for systems engineering, development, administration and support.

**Breadth:**

Middle level management. Works under general direction of senior level management. Typically manages and mentors supervisors, project leads and/or technical staff. Works on multiple, complex projects as a project leader and a subject matter expert. Frequently reports to a Chief Information Officer, IT Chief Operating Officer, Chief Technology Officer, Operating Unit IT Executive or Departmental IT Executive.

## JOB FAMILY DESCRIPTIONS

### JOB FAMILY: SYSTEMS PROGRAMMING AND ADMINISTRATION

**Job Title: Systems Architect**

**Job#: 7410**

#### **General Characteristics**

Responsible for providing senior level expertise on decisions and priorities regarding the enterprise's overall systems architecture. Facilitates the establishment and implementation of standards and guidelines that guide the design of technology solutions including architecting and implementing solutions requiring integration of multiple platforms, operating systems and applications across the enterprise. Reviews, advises and designs standard software and hardware builds, system options, risks, costs vs. benefits and impact on the enterprise business process and goals.

Develops and documents the framework for integration and implementation for changes to technical standards. Assists in the development of and manages an architecture governance process. Provides technical guidance to project team areas as appropriate. Tracks industry trends and maintains knowledge of new technologies to better serve the enterprise's architecture needs.

#### **Dimensions**

##### **Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

##### **Experience:**

A minimum of 7 years of IT work experience in infrastructure/systems environments performing systems planning, architecture design, engineering (hardware and software) and optimization.

##### **Complexity:**

Expert/lead technical role. Defines systems architecture and design for the enterprise. Works on multiple projects as a project leader or as the subject matter expert. Works on projects/issues of high complexity that require in-depth knowledge across multiple technical areas and business segments. Coaches and mentors more junior technical staff.

**JOB FAMILY DESCRIPTIONS****JOB FAMILY: SYSTEMS PROGRAMMING AND ADMINISTRATION****Job Title: Systems Software Programmer****Job#: 7420****General Characteristics**

Responsible for the analysis, development, modification, installation, testing and maintenance of operating systems software. Possesses a strong understanding of systems programming, graphical user interfaces and control languages. Evaluates vendor supplied software packages and makes recommendations to IT management. Modifies and/or debugs vendor-supplied utilities and packages. Modifies, installs and prepares technical documentation for system software applications. Diagnoses, isolates and de-bugs software problems and performs problem resolution. Monitors systems capacity and performance, plans and executes disaster recovery procedures and provides Tier 2 technical support.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 4 years of IT work experience in systems administration and programming.

**Complexity:**

Intermediate professional level role. Works on multiple products, activities and projects as a project team member, occasionally as a project leader. Works on moderately complex tasks, projects, activities or support issues that require increased skill in multiple technical environments and has expertise in one product/system. May coach more junior technical staff.

**JOB FAMILY DESCRIPTIONS****JOB FAMILY: SYSTEMS PROGRAMMING AND ADMINISTRATION****Job Title: Groupware Specialist****Job#: 7430****General Characteristics**

Responsibilities include defining the business requirements for the organization's next generation of collaborative work tools, which involves working with end-users to develop specifications for the development and implementation of groupware applications (e.g., Lotus Notes, Microsoft Exchange). Based on the business requirements, responsible for the implementation, maintenance and support of groupware systems. Evaluates and recommends associated hardware/software solutions based on business requirements and user needs.

Responsibilities include providing technical leadership in the design, development and promotion of selected groupware strategies. Actively involved in engineering and deploying various groupware applications such as team collaborative computing, Internet and wireless access, document sharing and next generation messaging clients.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 2 years of IT work experience in programming and systems analysis. Experience with groupware/messaging technologies, tools and relevant platforms.

**Complexity:**

Intermediate professional level role. Works on multiple products, activities and projects as a project team member, occasionally as a project leader. Works on moderately complex tasks, projects, activities or support issues that require increased skill in multiple technical environments and has expertise in one product/system. May coach more junior technical staff.

**JOB FAMILY DESCRIPTIONS****JOB FAMILY: SYSTEMS PROGRAMMING AND ADMINISTRATION****Job Title: Systems Administrator****Job#: 7440****General Characteristics**

Deploys the release of new technologies as well as designs, installs, configures, maintains and performs system integration testing of PC/server operating systems, related utilities and hardware. Responsible for trouble shooting server problems as reported by users. Researches, evaluates and recommends software and hardware products. Supports Web access and electronic messaging services and maintains a secure systems environment. Provides new hardware specifications to users based on application needs and anticipated growth, installs new servers and maintains the server infrastructure.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of IT work experience. Requires a high level of expertise in multiple system environments.

**Complexity:**

Intermediate professional level role. Defines procedures for monitoring and evaluates, diagnoses and establishes work plan to resolve system issues. Performs troubleshooting for complex hardware, software and network problems. Works on multiple projects as a project team member, occasionally as a project leader. May coach more junior technical staff.

**JOB FAMILY DESCRIPTIONS****JOB FAMILY: SYSTEMS PROGRAMMING AND ADMINISTRATION****Job Title: UNIX Systems Administrator****Job#: 7450****General Characteristics**

Installs, configures, maintains and performs system integration testing of UNIX based operating systems, related utilities and hardware. Responsible for troubleshooting UNIX-based hardware and software problems. Monitors systems activities and fine tunes system parameters and configuration to optimize performance and ensure security of systems. Performs capacity analysis, monitors and controls usage of disk space. Develops procedures for routine administration including backup/restore, shutdown, and startup. Provides recommendations for improving the server environment, such as capacity thresholds, security gaps, patch levels and hardware recalls.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of IT work experience. Requires a high level of expertise in multiple system environments with emphasis in UNIX-based systems.

**Complexity:**

Intermediate professional level role. Defines procedures for monitoring and evaluates, diagnoses and establishes work plan to resolve system issues. Performs troubleshooting for complex hardware, software and network problems. Works on multiple projects as a project team member, occasionally as a project leader. May coach more junior technical staff.

**JOB FAMILY DESCRIPTIONS****JOB FAMILY: SYSTEMS PROGRAMMING AND ADMINISTRATION****Job Title: Storage Management Specialist****Job#: 7460****General Characteristics**

Provides efficient and reliable storage allocation and defines backup, recovery, archival procedures. Develops and implements business continuity practices for storage management. Installs, configures, tests and implements storage management software and hardware. Monitors use and availability of storage resources. Maintains and modifies backup and recovery procedures to meet high availability and mission critical business needs. Troubleshoots storage related issues and takes appropriate actions. Generates reports and analysis on storage usage. Maintains storage configurations to provide capacity planning and performance monitoring/tuning of systems. Benchmarks, evaluates and makes recommendations for the selection of storage management software and hardware products. Possesses skills and knowledge related to network, operating systems, Storage Area Network (SAN), Network Attached Storage (NAS) and tape backup solutions.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of IT work experience. Requires a high level of expertise in multiple system environments. Experience with networking, storage and systems administration.

**Complexity:**

Intermediate professional level role. Defines procedures for monitoring and evaluates, diagnoses and establishes work plan to resolve storage management issues. Works on multiple products, activities and projects as a project team member, occasionally as a project leader. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS ANALYSIS AND PLANNING****Job Title: Director, Enterprise Architecture****Job#: 7500****General Characteristics**

Leads the creation and/or evolution of the enterprise architecture function/program including coordination of an appropriately balanced pursuit of enterprise business, information, technical and solution architectures. Leads the identification and analysis of enterprise business drivers to develop enterprise architecture requirements. Analyzes technology industry and market trends and determines potential impact upon the enterprise. Leads the development of enterprise architecture governance structure based on business and IT strategies. Oversees enterprise architecture implementation and ongoing refinement activities. Directs the development and execution of a communication (including education) plan for enterprise architecture standards. Acts as a sounding board or consultant to IT and business leaders in the development of IT solutions for business needs.

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 10 years of IT and business/industry work experience including architecture design and deployment, systems lifecycle management and infrastructure planning and operations, with 3 years of leadership experience in managing multiple, large, cross-functional teams or projects, and influencing senior level management and key stakeholders.

**Breadth:**

Senior level management. Participates in the technical aspects of strategic decisions regarding IT for the enterprise. Implements and manages those initiatives with complete autonomy. Makes decisions for the organization based on the highest degree of technical complexity and through understanding the far-reaching implications across the IT organization. Frequently reports to a Chief Information Officer or Chief Technology Officer of an enterprise.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS ANALYSIS AND PLANNING****Job Title: Manager, IT Business Planning****Job#: 7600****General Characteristics**

Assists the IT organization in defining and implementing its business plan and goals to support the strategy and goals of the organization. Responsible for working with IT and business leaders to create the business plan for IT. Assists in the cascading of plans to the various IT divisions/departments. Scans the external IT environment to provide a common set of planning assumptions, competitive analysis, current and future market assessments for products and services to the business, and a common set of planning processes and tools to assist those with planning responsibility in IT. Assists IT and business leadership in actualizing the business plans within their own area of responsibility, working with them to ensure that technical and resource decisions link to the overall IT plan. Works closely with the enterprise's business planning leaders to ensure alignment.

Responsible for ensuring that business planning and purpose is considered in all key IT decisions, and therefore must be involved in the discussion and decision making process for technology, business, and human resource investments on an on-going basis. Works with Finance and Human Resources to represent the needs of IT and understand the cost and human resources impact of those needs in creating, implementing and adjusting business plans.

This position typically reports to the CIO. Ensures alignment of the IT strategy to the business strategy. Responsible for ensuring integration of all work performed across all business units. Responsible for educating senior business leaders on the IT strategy as well as educating senior IT leadership on the direction of the business. High degree of business complexity and impact to overall success of IT in meeting business needs.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, Business Administration, Finance, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of IT and business work experience with a broad range of exposure to various technical environments and business segments. Experience with managing team(s) responsible in strategic planning, infrastructure and operational support functions.

**Breadth:**

Middle level management. Works under general direction of senior level management. Typically manages and mentors supervisors, project leads and/or technical staff. Works on multiple, complex projects as a project leader and a subject matter expert. Frequently reports to a Chief Information Officer, IT Chief Operating Officer, Chief Technology Officer or Operating Unit IT Executive.

**JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS ANALYSIS AND PLANNING****Job Title: Enterprise Architect****Job#: 7610****General Characteristics**

Provides overall direction, guidance and definition of an enterprise's architecture to effectively support the corporate business strategy. Responsibilities include researching, analyzing, designing, proposing, and delivering solutions that are appropriate for the business and technology strategies. Must have significant business knowledge and have one or more areas of technical expertise in which they concentrate. Interfaces across several business areas, acting as visionary to proactively assist in defining the direction for future projects. Responsible for conception of solutions, building consensus and the selling and execution of such solutions.

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of IT work experience in multiple IT areas and 2 to 3 years of relevant enterprise-wide architecture experience in one or more specialty areas.

**Complexity:**

Expert/lead technical role. Defines enterprise-wide architectures and designs across multiple IT functional areas. Works on multiple projects as a project leader or as the subject matter expert. Works on highly complex projects that require in-depth knowledge across multiple technical areas and business segments. Coaches and mentors more junior technical staff.

**JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS ANALYSIS AND PLANNING****Job Title: Business Process Consultant****Job#: 7620****General Characteristics**

Facilitates the optimization of business unit performance by enhancing the alignment between business processes and information technology. Responsible for actively resolving day-to-day technology needs of the business unit with a focus on the analysis of processes—dissecting problems and suggesting solutions. Includes complex systems process analysis, design and simulation. Must understand technical problems and solutions in relation to the current, as well as the future business environment. Must be able to suggest plans to integrate new and existing processes. Provides input and supports planning and prioritization for business process engineering related activities, including developing the business unit process engineering plan and integrating that plan with the corporate plan. Possesses knowledge and experience leveraging both IT solutions and business process improvements.

Participates in continuous review and update to ensure that processes meet changing business unit conditions. Identifies processes for improvement, documents existing processes, identifies and analyzes gaps between current processes and the desired state, designs new processes, develops process performance measures and plans the transition to a new process. Provides counsel and leadership on future use of technology and business process improvements. This requires a high level of understanding of the organization's business systems and processes as well as industry-wide requirements. Must demonstrate expertise in strategic planning, tactical execution, project management, process management and business systems requirements definition.

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, Business Administration, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of IT experience, 4 years of experience in process engineering and 2 years experience in project management.

**Complexity:**

Expert/lead technical role. Works on large, complex projects that have enterprise-wide impact and require subject matter expertise of multiple process improvement areas and mastery of process improvement tools. Works as a project team member on multiple projects to facilitate process improvements involving multiple sites or business areas, often as a project leader. Coaches and mentors more junior staff.

**JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS ANALYSIS AND PLANNING****Job Title: IT Business Consultant****Job#: 7630****General Characteristics**

Works with business leaders and acts as a liaison between IT and business units (typically leadership for assigned business units) or vendors. Viewed as integral to the business in any decisions that may be impacted by technology. Acts as a business relationship manager responsible for the collection, analysis, review, documentation and communication of business needs and requirements to the IT organization. Leads the gathering of business needs as well as the design of solutions through direct interaction with business unit leaders. Focuses on developing and improving business processes at all times, assisting with the development of metrics, both within the technology and business organizations.

Has a strong understanding of information systems, business processes, the key drivers and measures of success for the business, and the short- and long-term direction of the business and technology. Identifies, proposes and influences business solutions, negotiates deliverables and requirements across multiple business customers or organizations. Ensures that the design and integration of proposed system, software and hardware solutions leads to the development and growth of the business through effective use of technology. Integrally involved in 'buy vs. build' decisions.

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, Business Administration, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of relevant technical and business work experience.

**Complexity:**

Expert/lead technical role. Works with business senior management in one business segment and corporate staff executives to align technology solutions with business strategies. Demonstrates breadth and in-depth knowledge of a business area to identify and communicate how IT solutions can add value. Supports one or more key business functions. Issues and interactions tend to be highly complex and have significant strategic importance. Serves as a project team member for strategic planning or as a team lead.

**JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS ANALYSIS AND PLANNING****Job Title: Business Analyst****Job#: 7640****General Characteristics**

Serves as a liaison between the business community and the IT organization in order to provide technical solutions to meet user needs. Possesses expertise in the business unit(s) they support, as well as, an understanding of the IT organization's systems and capabilities. Analyzes business partner's operations to understand their strengths and weaknesses to determine opportunities to automate processes and functions. Assists in the business process redesign and documentation as needed for new technology. Translates high level business requirements into functional specifications for the IT organization and manages changes to such specifications. Educates the IT organization on the direction of the business. Negotiates agreements and commitments by facilitating communication between business unit(s) and IT from initial requirements to final implementation. Possesses an understanding of technological trends and uses this knowledge to bring solutions to business units supported to enhance the enterprise's competitive edge. May make recommendations for buy vs. build decision.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, Business Administration, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of relevant technical or business work experience.

**Complexity:**

Intermediate professional level role. Works with business partners within one business function to align technology solutions with business strategies. Demonstrates an informed knowledge of a business area to resolve problems on an ongoing business. Supports several moderately complex business processes. Works on multiple projects as a project team member, occasionally as a project leader. May coach more junior staff.

**JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS ANALYSIS AND PLANNING****Job Title: Director, Business Relationships****Job#: 7700****General Characteristics**

Overall responsibility for serving as the strategic interface with assigned business units for the purpose of business/IT strategy development, solution discovery, service management, risk management and relationship management. Serves as the business relationship linkage between the business units and IT (at the executive level). Provides highly-valued strategic consulting level support and guidance through key IT initiatives. Communicates decisions, priorities and relevant project information to appropriate levels of staff regarding business unit requests, projects and initiatives. Proactively shares knowledge of technology risks and opportunities to build competitive advantage and improve efficiency and effectiveness of business units.

Proactively serves as a “trusted advisor”, and is the primary point of contact from IT for business line executives, managers and key contacts and represents IT in selling IT services and capabilities. Provides support in delivering technology products and services to ensure business satisfaction. Strives to be a valued and preferred IT service provider to all business partners. Focuses on strategic initiatives and plans, proactive, anticipatory and driving in nature and provides significant value to business units. Facilitates the planning and execution of business changes through the use of technology. Serves a lead role in enabling the business to achieve their objectives through the effective use of technology.

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Information Systems, Business Administration, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 10 years of IT and business work experience with a broad range of exposure to various technical environments and business segments. At least 3 years of experience with managing team(s) responsible in strategic planning, business development or client management and working with a broad range of diverse and complicated business units. Must possess very strong business acumen.

**Breadth:**

Senior level management. Works with business unit and corporate staff executives to develop a technology strategy that aligns with IT and across all business units. Must have strong understanding of each business unit to include their business drivers for success, process and approaches to business models. Frequently reports to a Chief Information Officer, IT Chief Operating Officer or Chief Technology Officer.

**JOB FAMILY DESCRIPTIONS****JOB FAMILY: BUSINESS ANALYSIS AND PLANNING****Job Title: Manager, Customer Relations****Job#: 7800****General Characteristics**

Overall responsibility for establishing, managing and maintaining strategic relationships with external customers in one or more business segments. Regularly interacts with functional groups within the IT organization to communicate and clarify customer requirements. Performs as liaison between enterprise and end-users, outside vendors, contractors, and consultants to define and establish service and support requirements. Investigates and resolves customer relationship problems. May participate in contract negotiation and administration.

Analyzes and determines operational and financial impact of new product and service offerings. Proposes changes or solutions to products and services for optimal business results. Assists in organization change management and functions as an internal consultant in analyzing business processes, assessing and defining customer specifications and requirements, proposing business solutions that prioritizes technology and services needs to satisfy customer requirements, and facilitating solution design, building and testing.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, Business Administration, Marketing, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 7 years of relevant IT and business work experience. Experience with managing teams and projects.

**Breadth:**

Middle level management. Works under general direction of senior level management. Typically manages and mentors supervisors, project leads and/or technical staff. Works on multiple, complex projects as a project leader and the subject matter expert. Frequently reports to a Chief Information Officer, IT Chief Operating Officer or Chief Technology Officer.

**JOB FAMILY DESCRIPTIONS****JOB FAMILY: RELEASE MANAGEMENT****Job Title: Configuration Management Analyst****Job#: 8000****General Characteristics**

Provides Configuration Management (CM) support for the customer's software baseline control efforts. Maintains the baseline using automated CM tools. Responsible for maintaining project software and documentation inventory and configuration baselines. Establishes and maintains the CM processes and procedures. Defines and implements procedures for releasing products throughout the whole product life cycle. Serves on the Configuration Control Board (CCB). Produces builds of products for use in testing and in production; identifies and implements processes to strengthen, streamline and automate build processes; serves as an advocate for best practices; drives the development and maintenance of build automation tools; maintains the source code change control; performs distribution partner and corporate client set-ups.

Performs software deficiency and change request updates and reporting. Maintains the project notebook library and software development folders. Tracks and maintains the project change requests, impact assessments, incident reports, and software change notices on a continuous basis. Measures and reports on success metrics benchmarking performance against world class measures. Supports management with technical performance data from the CM process.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of IT work experience in systems/applications development functions.

**Complexity:**

Intermediate professional level role. Works on multiple products, activities and projects as a project team member, occasionally as a project leader. Works on moderately complex tasks, projects, activities or support issues that require increased skill in multiple technical environments. May coach more junior technical staff.

**JOB FAMILY DESCRIPTIONS****JOB FAMILY: RELEASE MANAGEMENT****Job Title: Release/Build Engineer****Job#: 8010****General Characteristics**

Develops and maintains the build environment, the source code control system and the issue tracking systems. Creates and tests builds, resolves issues, applies labels to file and communicates build status. Responsible for building scripts and installation procedures. Proactively identifies and implements procedures to streamline the build process which may drive the development and maintenance of an automated build process with automatic notification of build and unit test failure problems to responsible engineers. May assist engineering management in making choices for source code management systems, and other development and testing tools. Knowledge of quality methods and procedures as well as PC, PVCS, UNIX and scripting languages is required for successful performance in this role.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of IT work experience with at least 2 years related to release management. Proficient in the use of project management, spreadsheet and database query tools. Has subject matter expertise in release management process.

**Complexity:**

Intermediate professional level role. Works on multiple releases/projects as a subject matter expert and as a project leader. Works on complex projects that require expertise across multiple disciplines and environments. May coach more junior technical staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: PROGRAM MANAGEMENT****Job Title: Director, Program Management****Job#: 8200****General Characteristics**

Responsible for building and managing the project/program management office/function for IT. Defines and develops enterprise-wide IT project/program management practices, governance standards, processes and metrics. Ensures projects/programs are defined, tracked and communicated in a consistent and effective manner. Incorporates effective change and risk management controls. Partners with IT and business leadership and other key stakeholders to define opportunities, to identify and prioritize projects based on predefined criteria (return on investment, productivity, compliance). Directs project/program managers with business case development. Responsible for ensuring all projects within IT portfolios/programs are delivered on time, within budget and to an agreed quality level. Must possess extensive knowledge and expertise in project/program management, portfolio management methodologies and tools. This is a single incumbent position that typically exists in a large enterprise with multiple program managers and/or project managers as direct reports.

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Business Administration, or other related field. Or equivalent work experience. Project Management certification is required.

**Experience:**

A minimum of 10 years of IT and business/industry work experience, with at least 3 years of leadership experience and 5 years managing projects and/or project portfolios.

**Breadth:**

Senior level management with overall responsibility for the enterprise-wide project/program management practices. Accountable for on-time, within budget and quality delivery of all IT projects/programs. Directs and mentors a team of program managers, project managers, portfolio managers and/or other project management staff. Frequently reports to a Chief Information Officer, Chief Technology Officer or IT Chief Operating Officer.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: PROGRAM MANAGEMENT****Job Title: Program Manager****Job#: 8210****General Characteristics**

Responsible for managing one or more highly complex or enterprise-wide IT program(s) consisting of multiple projects. Develops the program strategy, supporting business case and various enterprise-wide high-level project plans. Ensures integration of projects and adjusts project scope, timing, and budgets as needed, based on the needs of the business. Communicates with IT leadership, business leadership and IT Business Consultants to communicate program strategy, direction and changes. Responsible for delivering all projects contained in the IT project portfolio on time, within budget and meeting the strategic and business requirements. Responsible for tracking key project milestones and recommending adjustments to Project Managers. Partners with senior leadership of the business community to identify and prioritize opportunities for utilizing IT to achieve the goals of the enterprise. Must possess extensive knowledge and expertise in the use of Project Management methodologies and tools. This is a single or multiple incumbent(s) position that typically exists in a small to medium size enterprise with multiple project managers, project leaders and/or project support staff as direct reports.

**Dimensions****Education:**

Bachelor's or Master's Degree in Computer Science, Business Administration, or other related field. Or equivalent work experience. Project Management certification is required.

**Experience:**

A minimum of 10 years of IT and business/industry work experience, with at least 3 years of leadership experience and 5 years in managing projects.

**Breadth:**

Senior level management with overall responsibility for the management of one highly complex or enterprise-wide program consisting of multiple projects. Responsible for managing all aspects of the design, development and implementation of the program. Directs and mentors a team of project managers, portfolio managers and/or other project management staff. Frequently reports to a Chief Information Officer, Chief Technology Officer, IT Chief Operating Officer or Director, Program Management.

**JOB FAMILY DESCRIPTIONS****JOB FAMILY: PROGRAM MANAGEMENT****Job Title: Project Manager****Job#: 8220****General Characteristics**

Responsible for overall coordination, status reporting and stability of project oriented work efforts. Establishes and implements project management processes and methodologies for the IT community to ensure projects are delivered on time, within budget, adhere to high quality standards and meet customer expectations.

Responsible for assembling project plans and teamwork assignments, directing and monitoring work efforts on a daily basis, identifying resource needs, performing quality review; and escalating functional, quality, timeline issues appropriately. Responsible for tracking key project milestones and adjusting project plans and/or resources to meet the needs of customers. Coordinates communication with all areas of the enterprise that impacts the scope, budget, risk and resources of the work effort being managed. Assists Program Manager(s) in partnering with senior management of the business community to identify and prioritize opportunities for utilizing IT to achieve the goals of the enterprise. Must possess extensive knowledge and expertise in the use of project management methodologies and tools, resource management practices and change management techniques. This is a management role with human resource management responsibilities (e.g., hiring, performance management). Manages one or more cross-functional projects of medium to high complexity. More senior role has responsibility for multiple large, complex projects with greater impact to the enterprise.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, Business Administration, or other related field. Or equivalent work experience. Project Management certification or successful completion of a recognized project management curriculum is required.

**Experience:**

A minimum of 7 years of IT work experience, including 4 or more years managing projects. Experience with projects in multiple technologies and functions.

**Breadth:**

Middle level management. Works under general direction of senior level management. Responsible for the management of one or more medium to large-sized, moderately to highly complex projects. Typically manages and mentors project leaders and project management staff.

**JOB FAMILY DESCRIPTIONS****JOB FAMILY: PROGRAM MANAGEMENT****Job Title: Project Leader****Job#: 8230****General Characteristics**

Responsible for overall coordination, status reporting and stability of project oriented work efforts. Establishes and implements project management processes and methodologies for the IT community to ensure projects are delivered on time, within budget, adhere to high quality standards and meet customer expectations.

Responsible for assembling project plans and teamwork assignments, directing and monitoring work efforts on a daily basis, identifying resource needs, performing quality review; and escalating functional, quality, timeline issues appropriately. Responsible for tracking key project milestones and adjusting project plans and/or resources to meet the needs of customers. Coordinates communication with all areas of the enterprise that impacts the scope, budget, risk, and resources of the work effort being managed. Assists Project Manager(s) and/or Program Manager(s) in identifying

and prioritizing opportunities for utilizing IT to achieve the goals of the enterprise. Must possess advanced knowledge and proficiency in the use of project management methodologies and tools, resource management practices and change management techniques. This is an individual contributor role without human resource management responsibilities (e.g., hiring, performance management). Manages one or more projects of medium to high complexity. More senior role has responsibility for large, complex, cross-functional or multiple projects with greater impact to the enterprise.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, Business Administration, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of IT work experience, including 2 or more years managing projects.

**Complexity:**

Intermediate professional level role. Responsible for the management of one or more small to medium-sized, moderately complex projects. Leads, assigns and tracks results for a project team under general direction of project/program managers.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: PROGRAM MANAGEMENT****Job Title: Project Management Specialist****Job# 8235****General Characteristics**

Designs, implements, evaluates and audits project management processes and templates for the project management office (PMO). Compiles metrics relating to IT project success, project attributes, and individual productivity and adherence to defined processes. May track costs and performance, service levels and other metrics required to ensure project goals and objectives are met. Serves as a resource to project managers and project leaders to educate and assist them with implementing project management processes and making improvement/changes. Provides administrative support to project managers and project leaders. Ensures project control systems are in place and integrates project data for decision makers. Administers and maintains project management software and tools (e.g., Microsoft Project Server). Organizes and publishes project-related documentation in various sources. Knowledge of project management tools, methods and best practices such as those defined by the Project Management Body of Knowledge (PMBOK).

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, Business Administration, or other related field. Or equivalent work experience.

**Experience:**

A minimum of 3 years of project support/management experience.

**Complexity:**

Intermediate professional level role. Works independently or on a team. Performs tasks of moderate to high complexity that require increased knowledge of multiple technical environments and knowledge of business areas that IT supports. May coach more junior staff.

**Exhibit J****JOB FAMILY DESCRIPTIONS****JOB FAMILY: PROGRAM MANAGEMENT****Job Title: Resource Manager****Job#: 8240****General Characteristics**

Manages the coordination of human resource needs for IT projects. Develops the systems and processes to ensure that business, project and employee needs are met in the assignment of staff to projects. Responsible for developing and managing an employee skills assessment process, forecasting skill and staff needs based on project plans. Develops and manages a staff utilization process, ensuring that staff resources are fairly and evenly distributed and that staff are not over utilized across projects.

Works with IT leadership, IT Staffing Manager and Training Manager in the forecasting of staff needs and skills, to ensure proper recruitment, training and development of staff to meet current and future IT needs. Coordinates the training and development of staff. Continually communicates with both project managers and assigned staff to ensure needs of both are being met, and to continue to improve staff selection and coordination of resources. Acts as the mentor and champion of training and career development processes for assigned staff. Ensures that performance appraisals occur upon completion of projects and that skills are updated. Coordinates and assimilates the performance appraisal information across projects resulting in a cohesive annual appraisal of staff who support a number of projects.

**Dimensions****Education:**

Bachelor's Degree in Computer Science, Information Systems, Business Administration, Education, or other related field. Or equivalent work experience.

**Experience:**

7 years of IT work experience including managing team(s) responsible for staffing, training and development and resource management.

**Breadth:**

Middle level management. Works under general direction of senior level management. Typically manages and mentors supervisors, project leads and/or technical staff. Works on multiple, complex issues/projects as a technical leader and the subject matter expert.
